Those industries which have best learned how to pay high wages, while at the same time getting low Labor costs per unit of output, are the ones which are most prosperous year in and year out, and which hardly know that there is such a thing as Labor trouble. On the other hand, consider the various branches of the textile industry, coal mining and a few others. The workers are underpaid according to American standards. Periodically the front pages of the newspapers contain stories of strikes with more or less bloodshed, while on the financial pages we are regaled with unsatisfactory earning statements of the companies against which the strikes are aimed. How long is it since you heard of a strike in any of the Ford plants?

It is only by constantly raising the real wages that we can prosper. For that reason I am wholly opposed to basing wages upon the cost of living. In times of great emergency wages in certain trades which enjoy a monopoly of essential skill rise far out of proportion. When the emergency ends, such wages fall. The law of supply and demand sees to that automatically.

Must Not Limit Wages

But there is no law—human, economic, natural or divine—which says that any worker is entitled to only so much of the world's goods yesterday, tomorrow and a hundred years hence. Yet that, in effect, is what basing wages on the cost of living implies. When based on the theory of "a living wage," the cost-of-living basis is not only inhuman and insulting to the worker, but unsound, for if it were generally accepted, it would preclude the possibility of greater prosperity for Capital.

Had the sale of goods only kept pace with the growth of our population, the prosperity of this country would be far from notable. It is because all of us have steadily been able to buy and consume more and more things that we are prosperous. Our per capita consumption of everything grows year by year. That makes prosperity. As this buying power continues to increase, per capita, we shall continue to prosper. When it stops, look for a depression. The idea that certain classes of people are entitled to only a certain amount of necessaries, to say nothing of the comforts of life, is deeply rooted in a lot of employers. That attitude was expressed by a benign, kind-faced old gentleman who, I happened to know, was notable for his philanthropic work in a number of fields.

Poor Management Blamed

A member of my organization, who was doing some work in the plant, had been impressed with the production achieved by the operator of one of a group of machines. The men were on piecework and all but this one made fair but not spectacular earnings. He made on the average about a hundred dollars a week.

One day he was missing from the job. We asked about him.

"Oh," said the old gentleman, "he quit when I had his pieeework rate cut. Why, he was making a hundred dollars a week! No workman is worth that much. That is the price of an executive. It's wrong for a workman to make such big money."

"But that man,' I objected, "turned out so much production that he cost you less per unit of output than his fellows on the same job, who earned half as much. He was worth every cent of what he made. He was one of your best investments."

But it was useless to argue. That man was convinced that while it was all right for a not-particularly efficient member of the managing class to make a hundred dollars a week, it was somehow or other scandalous for a highly efficient member of the working class to make as much.

When high wages cannot be paid it is nine times in ten the fault of the management. I have never seen a concern so efficient that it held no possibilities for reducing costs while still paying high wages. The trouble usually is that the management is either too self-satisfied or too sluggish to put forth effort to find better methods.

James E. Solomon and Claude E. Solomon, doing business as Solomon Bros., contractors, of Berkeley, have filed a voluntary petition in bankruptcy in the United States District Court. They owe $52,837.97 with assets of $5500. The principal creditors are the San Jose Building & Loan Association, to which they owe $10,894; R. H. Bailey, $10,894 and H. C. Thomas, $6750.

Bids for heating were held under advisement.

CALIFORNIA'S STATE Fair for 1926.

WILL BE held at Sacramento.

FROM SEPTEMBER 4th to 11th.

AND THE Fair this year.

WILL HAVE exhibits.

OF CALIFORNIA'S wonderful fruits.

AND LIVE stock.

CALIFORNIA'S FAIR is first.

IN STATE fairs.

BECAUSE CALIFORNIA produces.

SUCH A variety of products.

ANOTHER ATTRACTION at Sacramento.

IS THE sand producing plant.

OF SANDY Pratt, president.

OF THE Pratt Building Material Co.

ON THE American River.

AND ONLY twenty miles away.

IS PRATTROCK (near Folsom).

WHERE SANDY Pratt.

PRODUCES CLEAN rock and gravel.

THEN FORTY miles north.

IS SANDY'S Marysville sand plant.

WHERE THE Yuba River.

PRODUCES CLEAN, white sand.

FOR SANDY'S customers.

AT THE State Fair.

THE PLYMOUTH ROCK chickens.

FROM PRATTROCK (near Folsom).

SHOULD WIN the first prize.

IN THE sheep exhibit.

PRATT'S ROCKy mountain sheep.

SHOULD RECEIVE a blue ribbon.

THE SANDwich booths are up.

AND PRATT'S SAND (wiches).

WILL BE served.

"I THANK you."

Sandy Pratt's Burbank Plymouth "Rock" 1926 model chicken, "hatched" in the "hed" of the American River, where Sandy's company, the Pratt Building Material Company, produce clean, sharp sand. Think of the head of Sandy's new bird, containing a set of brains as large as a Durham cow's, and to be sold by the Spreckels and Crystal Palace markets in San Francisco. The ears will be converted into shingles and sold by the Sacramento Lumber Company. Western Lumber Company, Superior Lumber Company, also the Friend & Terry Lumber Company. Weinstock, Lubin & Co. and Hale's will market the trunks. The ivory tusks go to the Ivory Soap Company. The legs (thrown away from ordinary Petaluma chickens and larger than the Powell Street variety) will be sold for fence posts by the Diamond Match Co. of everywhere. Then you have the body to eat, nice delicious white meat, but the most wonderful part about this story is that Sandy's 1926 model Plymouth ROCK chicken has been taught by Luther Burbank to eat crushed rock from Prattrock, near Folsom, home of Sandy's rock company.

SAN FRANCISCO. — Bids will be asked shortly by Board of Public Works to move auditorium building of Lick School, 25th and Noe Sts., to site of Noe Valley School at Douglas and Elizabeth Sts.

WHARVES AND DOCKS

LAGUNA BEACH, Cal.—Application has been made to U. S. Engineer Office by A. B. Derkum and Forrest Carter for permission to const. at the foot of Aster St., Laguna Beach, Calif., a pleasure pier 250 ft. wide and extending into the Pacific Ocean 700 ft. from mean high tide line. This pier to be in lieu of the one authorized by War Department permit issued July 10, 1926, to A. B. Derkum, for a smaller pier at the same location.

OAKLAND, Cal. — Smith Bros., Ray Bldg., Oakland, at $303,326, awarded contract by city to const. wharf at foot of 14th street involving 547 conc. piles varying in length from 56 to 44 ft., and having total length of 25,770 ft.; 677 cresoted piles varying in length from 31 to 68 ft., having total length of 47,-983 ft.; 7950 cu. yds. conc.; 7000 tons riprap. The wharf will have overall length of 1032 ft. of which 900 ft. is of reinforced concrete construction. Along the outer face of the concrete wharf a cresoted pile and timber apron wharf is to be constructed with a width of 31 ft. for support for two standard gauge railroad tracks. The total width of the wharf is 224 ft., 193 ft. of this width is of concrete construction and the remaining 31 ft. is of cresoted pile and timber construction. The entire area of the wharf is 209,183 feet.

MONTEREY, Monterey Co., Cal.—City rejects bids to fur. and install steel rolling doors for municipal wharf and new bids will be asked. Bids were rejected due to the fact that J. G. Wilson Corp., low bidders, desired to correct alleged error in alternative bid, which action was protested by the Pacific Materials Company another bidder. Date for opening bids will be set shortly.

OAKLAND, Cal.—Smith Bros., Inc., Ray Bldg., Oakland, at $303,326 submitted low bid to Oakland city council to construct wharf at foot of 14th St. Project involves 547 conc. piles varying in length from 56 to 44 ft., and having total length of 25,770 ft.; 677 creosoted piles varying in length from 31 to 68 ft., having total length of 47,-983 ft; 7950 cu. yds. conc; 7000 tons riprap. The wharf to be constructed at this time has an overall length of 1032 ft. of which 900 ft. is of reinforced concrete construction. Along the outer face of the concrete wharf a creosoted pile and timber apron wharf is to be constructed with a width of 31 ft. for support for two standard gauge railroad tracks. The total width of the wharf is 224 ft., 193 ft. of this width is of concrete construction and the remaining 31 ft. is of creosoted pile and timber construction. The entire area of the wharf is 209,183' feet. Concrete curtain walls extending from low water up to the underside of the deck of the wharf are to be constructed at intervals of about 300 feet as a fire prevention measure. All the necessary piping required for the installation of the sprinkling systems and for fire protection throughout the wharf shed which will be built under another contract, are included in the present construction. Building pump saw and pump house.

Building foundation for Wood stave water tank.

Plans and specifications for said work can be seen at the office of the Oakdale Irrigation District at Oakdale, California, and at the office of the South San Joaquin Irrigation District at Manteca, California, and copies thereof will be furnished upon application to the Secretary of the Board of Directors of either District when accompanied by a deposit of ten ($10.00) dollars to be repaid to bidders and to all others upon the return of the plans and specifications in good and acceptable condition not later than the day set for opening of bids.

The Boards of Directors of said Districts will be in session at the office of the South San Joaquin Irrigation District in Manteca, California, at eleven (11) o'clock A. M. on the 30th day of August, 1926, and will open all proposals received in response to this notice.

The contract will be let to the lowest responsible bidder, but the Boards reserves the right to reject any and all bids.

Bidders may submit bids upon any or all of the schedules, but no schedule will be subdivided.

Each proposal must be accompanied by a certified check for ten (10) per cent of the amount of the schedule bid upon, payable to order of South San Joaquin Irrigation District, as a guarantee that the bidder will, if successful, execute a satisfactory contract and furnish a bond in the sum of not less than twenty-five (25) per cent of

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section

the amount of his bid for the faithful performance of the work in accordance with the plans and specifications; and a bond of fifty (50 per cent as provided by Chapter 303 of the Statutes of 1919 of the State of California, said bonds to be approved by said Boards of Directors; and that all of said work shall be done under the direction, and to the satisfaction of the engineers and approved by the Boards.

The proposal forms bound with the specifications must be properly filled out by the bidder and the plans and specifications, including the proposal, must be submitted intact with the bid in a sealed envelope addressed to the Boards of Directors of South San Joaquin and Oakdale Irrigation Districts, Manteca, California, and marked "Proposal for Work near the Town of Melones."

Done in pursuance of an order of the Boards of Directors of the Oakdale and South San Joaquin Irrigation Districts this 4th day of August, 1926.

M. P. KEARNEY
Secretary of the Board of Directors of the Oakdale Irrigation District.

S. L. STEELE
Secretary of the Board of Directors of the South San Joaquin Irrigation District.

NOTICE TO CONTRACTORS

OFFICE CONSTRUCTING QUARTERMASTER, Fort Mason, Calif. Sealed proposals will be received here until 11 A. M., August 12, 1926, for removing trees and grubbing out roots at San Francisco National Cemetery. Information upon application.

NOTICE TO CONTRACTORS

(Agricultural Engineering Building—Davis, California)

SEALED BIDS will be received at the Office of the Comptroller, University of California, Berkeley, California, at or before **10 a. m., Friday, August 27, 1926,** for "Structural Steel" and "General Construction" of the Agricultural Engineering Building for the University of California at the University Farm, Davis, California.

Drawings and specifications may be obtained at the office of William C. Hays, Architect, Crocker First National Bank Building, San Francisco, on deposit of $50.00 for each set of drawings taken out. Checks given as deposits are to be in favor of the undersigned. Deposits will be refunded on submission of a regular bid for the work and on return of said drawings and specifications in good condition. No bid will be considered unless accompanied by a certified check or bond in favor of the undersigned, equal to ten per cent of the bid to secure execution of the contract by the successful bidder.

The right is reserved to reject any or all bids.

THE REGENTS OF THE UNIVERSITY OF CALIFORNIA.

NOTICE TO CONTRACTORS

West Side Union High School District

Notice is hereby given that sealed bids will be received and opened by the Board of Trustees of the West Side Union High School District, San Joaquin County, State of California, in the High School Building, at Tracy, California, **at 8:00 o'clock P. M., August 24, 1926,** for the erection and completion of a Steam Heating Plant, and a Concrete Oil Tank, for the High School Building for said School District in accordance with Plans and Specifications made for the same by W. H. Weeks, Architect, 369 Pine Street, San Francisco, and 1924 Broadway, Oakland, California with their several propositions.

HEATING AND VENTILATING
CONCRETE OIL TANK

Plans and specifications may be seen at the offices of the Architect before mentioned, or at the office of the Clerk of the Board of Trustees, in the High School Building, Tracy, California.

Each bids must be accompanied by a Certified Check on some responsible California Bank in a sum not less than five per cent (5%) of the amount of the bid, and made payable to J. N. Lamb, Clerk of the Board of Trustees of West Side Union High School District; said check to be forfeited to the School District if the successful bidder fails to sign the contract and give a good and sufficient bond, as required by law, within 10 days after the awarding of the contract.

Each bid must be made out on Bid Forms obtained from the Architect, enclosed in a sealed envelope which is endorsed "Proposal for Heating," or "Oil Tank," and must be delivered to J. N. Lamb, Clerk of the Board of Trustees, Tracy, California, prior to the date and time set for the opening of bids.

Owner reserves the right to reject any or all bids.

J. N. LAMB,
Clerk of the Board of Trustees, West Side Union High School District, Tracy, California.

NOTICE TO CONTRACTORS

NOTICE TO BIDDERS

(Fencing—Fresno State College)

Bids for erection of woven wire fence to enclose the field at the Fresno State College Stadium will be received at the office of the Fresno State College, Fresno, California, **up to 12 o'clock noon on Saturday, August 28th, 1926.**

Bidders must submit complete specifications for fence with bid. Certified check for 10 per cent of amount of bid must accompany bid.

Fence must be 6 feet high, of steel wire, steel pipe posts set in concrete bases; must have pipe along top and barbed wire overhang.

Estimate 2380 feet of fence, including four corners, two 18-foot double gates, two 16-foot double gates, two 12-foot single gates, four 4-foot single gates.

Must be equal or equivalent of fence built by Standard Fence Co. for the California Highway Commission at new storage yard near Roeding Park, Fresno, California.

The Fresno State College Association reserves the right to reject any or all bids.

THE FRESNO STATE COLLEGE ASSOCIATION.

S. M'CORD, Secretary.

NOTICE TO CONTRACTORS

(Painting, County Infirmary Buildings—Marin County)

Sealed bids will be received by the Clerk of the Board of Supervisors of Marin County at his office until **11 o'clock A. M. of Wednesday, the 8th day of September, 1926,** and at that time publicly opened and read for painting the County Infirmary Building, Isolation Cottage, Superintendent's Cottage, etc.; located at the County Farm, in Lucas Valley, Marin County, California.

All in strict accordance with the specifications therefor, dated August 3rd, 1926.

Each bid to be accompanied by a certified check drawn on any responsible bank or a contractor's bond for an amount not less than five per cent of the aggregate of the proposal and made payable to the order of the Chairman of the Board of Supervisors of Marin County, as a guarantee that the bidder will enter into a contract for the performance of said work.

The successful bidder must, at his own cost and expense, furnish a bond satisfactory to the Board of Supervisors of Marin County in an amount not less than 50% of the amount bid, for the protection of laborers and materialmen, also a bond not less than 25% of the amount of his bid as a guarantee of faithful performance of contract and shall also give satisfactory assurance that such bidder is fully covered by insurance under the Workmen's Compensation Act.

The Board reserves the right to reject any or all bids.

Dated: August 4, 1926.

ROB. E. GRAHAM,
Clerk of the Board of Supervisors of Marin County.

NOTICE TO CONTRACTORS

(Bates Joint Union School District)

Notice is hereby given that up to **Wednesday, September 1st, 1926, at 2 o'clock p. m., of said day** (at which time bids will be opened at the Bates Joint Union Schoolhouse, Courtland, California), bids will be received for the construction of a two-room addition to the Bates Joint Union School

building and of a two-room addition to the Oriental School building of Bates Joint Union School by the trustees of said Bates Joint Union School District according to the plans, blueprints and specifications, which may be obtained from R. E. Herold, Architect, Forum Building, Sacramento, California.

All bids must be inclosed in sealed envelopes and must be received before 2 o'clock p. m. September 1st, 1926, and must be accompanied by a certified check for 10 per cent of the amount of the bid to guarantee the execution of a contract if bids be accepted. Check will be returned if bid be not accepted.

Trustees have right to reject any and all bids.

Dated: August 7th, 1926.

L. C. PEEK,
Clerk of the Board of Trustees of Bates Joint Union School District, Counties of Sacramento and Yolo.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of **the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M., September 7, 1926,** at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Marin County, through Ross and Larkspur (IV-Mrn-1-B) about two and five tenths (2.5) miles in length, to be widened and surfaced with asphalt concrete.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.

Dated: August 9, 1926.

NOTICE TO CONTRACTORS

(Turlock Union High School District)

Notice is hereby given that sealed bids will be received and opened by the Board of Trustees of the Turlock Union High School District, Stanislaus County, State of California, in the High School Building at Turlock, California **at 8:00 o'clock P. M., August 10, 1926,** for the erection and completion of a steam heating plant, furniture and fixtures, and a concrete oil tank, for the High School Building for said School District in accordance with plans and specifications made for the same by W. H. Weeks, Architect, 369 Pine Street, San Francisco, and 1924 Broadway, Oakland, California, with their several propositions.

Heating and Ventilating, Furniture and Fixtures, Concrete Oil Tank

Plans and specifications may be seen at the office of the Architect before mentioned, or at the Office of the Clerk of the Board of Trustees, in the High School Building, Turlock, California.

Each bid, except furniture and fixtures, must be accompanied by a certified check on some responsible California bank in a sum not less than five per cent (5%) of the amount of the bid, and made payable to A. G. Crowell, Clerk of the Board of Trustees of Turlock Union High School District; said check to be forfeited to the School Distrlct if the successful bidder fails to sign the contract and give a good and sufficient bond, as required by law, within 10 days after the awarding of the contract. There will be no check required with the bid for the furniture and fixtures.

Each bid, except the furniture and fixtures, must be made out on bid forms obtalned from the Architect, enclosed in a sealed envelope which is endorsed "Proposal for 'Heating,' or 'Furniture and Fixtures,' or 'Oil Tank,'" and must be delivered to A. G. Crowell, Clerk of the Board of Trustees, Turlock, California, prior to the date and time set for the opening of bids.

Owner reserves the right to reject any or all bids.

A. G. CROWELL,
Clerk of the Board of Trustees Turlock Union High School District, Turlock, California.

NOTICE TO CONTRACTORS

TRAFFIC TOLL PASSES CREST

Hope that the wave of traffic fatalities, now standing at 24,000 a year, has reached its crest and is beginning to recede is held out by A. B. Barber, Manager of the Department of Transportation of the Chamber of Commerce of the United States and Director of the National Conference on Street and Highway Safety.

"The reports for the first months of this year," he said, addressing the Tennessee Traffic Conference, "while as yet incomplete, seem to indicate a small reduction in the total of accidents for the country taken as a whole. The estimates of this reduction range from 3 per cent to 15 per cent as compared with the corresponding months last year.

"This is very encouraging, for if the record is continued throughout 1926, it will be the first year since the motor vehicle began to be a problem that an actual decrease, as compared with the previous year, has occurred."

The years 1918 and 1919 showed an increase of 4 per cent. The annual increase jumped to about 11 per cent for 1920, 1921, 1922. In 1923 it rose to 20 per cent over 1922. In 1924 it dropped to 7 per cent.

"I am personally convinced," added Colonel Barber, "that the improvement of the street and highway accident situation is just beginning and that in ten years from now we shall look back at the frightful records of the period through which we are passing and wonder why it took so long to bring about improvement."

Stability...

and speed in Construction

SPEEDY wall construction is valuable only when it builds rigid, lasting walls.

Schumacher Plaster Wall Board insures swift construction, yet it builds permanent walls. Stability has been engineered into it; and it's made only of durable materials.

Wherever permanent walls are needed you can use it with full confidence. Use it in homes—apartment houses, business structures.

SCHUMACHER WALL BOARD CORP.
LOS ANGELES SEATTLE SAN FRANCISCO

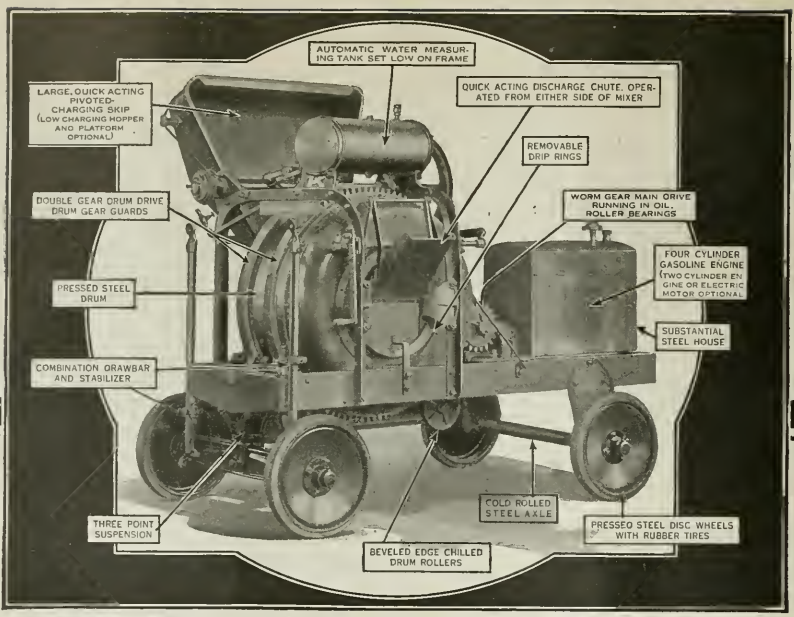
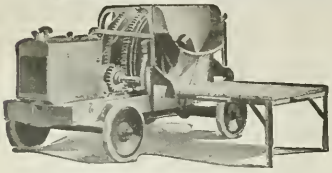
Oakland - San Francisco - San Jose - San Diego

Schumacher Plaster Wall Board

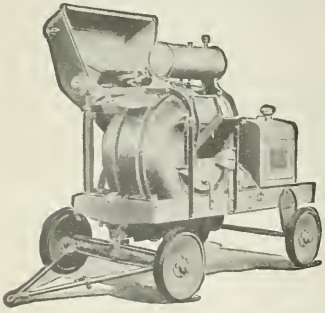
6T



AUTOMATIC WATER MEASURING TANK SET LOW ON FRAME
LARGE, QUICK ACTING PIVOTED-CHARGING SKIP (LOW CHARGING HOPPER AND PLATFORM OPTIONAL)
QUICK ACTING DISCHARGE CHUTE, OPERATED FROM EITHER SIDE OF MIXER
REMOVABLE DRIP RINGS
DOUBLE GEAR DRUM DRIVE DRUM GEAR GUARDS
WORM GEAR MAIN DRIVE RUNNING IN OIL, ROLLER BEARINGS
FOUR CYLINDER GASOLINE ENGINE (TWO CYLINDER ENGINE OR ELECTRIC MOTOR OPTIONAL)
PRESSED STEEL DRUM
SUBSTANTIAL STEEL HOUSE
COMBINATION DRAWBAR AND STABILIZER
COLD ROLLED STEEL AXLE
THREE POINT SUSPENSION
PRESSED STEEL DISC WHEELS WITH RUBBER TIRES
BEVELED EDGE CHILLED DRUM ROLLERS



Low charging platform, steel frame of which is hinged to mixer, and can be folded up against mixer-frame for hauling from job to job! Wide, capacious charging hopper makes charging easy.



Charging Skip goes to high angle charging position — shoots materials into drum without pounding skip! Note low automatic water measuring tank and Disc Wheels! Liberal drum dimensions!

HIGH speed operation — balanced light weight for fast hauling, and strong sturdy construction for long hard service —that's the Koehring Dandie!

Fast charging and fast discharging, the Dandie is a big money earner!

KOEHRING 7-S DANDIE Mixer

is the outstanding value in the light mixer field. Its design includes: 4 cylinder radiator-cooled engine or hopper-cooled two cylinder engine; completely enclosed transmission in dust tight oil bath with shaft on roller bearings; double drum gear drive; drum rollers fixed to shaft turning in big bearings insuring even bearing wear, and perfect lubrication!

7-S Dandie Mixer

Two or four cylinder engine. Charging skip or low charging hopper and platform. Automatic water measuring tank. Rubber tired steel disc wheels, or steel wheels. Complies with A. G. C. Standards.

Send back this coupon

learn the construction of the Dandie, and you will recognize a remarkable value, and big profit earner on the job.

CONSTRUCTION INTERESTS WOULD LIMIT SURETY BONDING

Under existing conditions, field agents for surety companies entering into intensive competition for commissions from selling bonds, have been providing surety for irresponsible builders, it is claimed. Incapable or dishonest builders defaulting on their contracts have been the cause of delays on jobs and serious losses to the owners. In addition to these losses contractor and the general public have sustained a considerable loss because of the fact the defaulting has greatly increased the premium rates on bonds and this extra cost has been borne by the contractor or passed on to the public.

A movement is now under way to relieve the industry of these unnecessary costs and delays. The plans call for a closer questioning by surety officials of bidders who seek bonds. The movement is sponsored by the Joint Conference on Construction Practices which is composed of representativea of architects, engineers, state highway officials, surety company officers and contractors' organizations.

EDWARD L. SOULE WILL SPEAK AT STEEL MEET

Concrete Reinforcing Steel Institute, Chicago, will hold its semi-annual meeting at the French Lick Springs Hotel, French-Lick, Ind., Sept. 13 to 15. In addition to committee reports there will be two papers "Conditions on the Pacific Coast," by Edward L. Soule, San Francisco, and "The Development of Concrete Reinforcement," by A. E. Lindau, Chicago.

Building Material Lower And Labor Costs High During 1925

The August number of the National Lumber Bulletin points out that in 1925 cost of building material was relatively lower and labor costs relatively higher than in any year recorded, according to a building construction study in the July issue of the Department of Labor's Monthly Labor Review, based upon permit figures of 130 cities relating to new construction of all kinds, residential and non-residential.

The survey gives the following index numbers of costs of constructing a typical building, amount of building done and the ratio of cost of material to labor:

Year	Cost of Constructing a Typical Bldg.	Amount of Building Done	Ratio of Cost of Material to Labor
	(1914—100)		
1914	100	100	44.1 : 55.9
1915	102	102	44.3 : 55.7
1916	115	114	49.7 : 50.3
1917	137	64	54.9 : 45.1
1918	152	36	54.3 : 45.7
1919	176	95	54.8 : 45.2
1920	235	76	54.0 : 46.0
1921	189	113	41.9 : 58.1
1922	183	178	44.1 : 55.9
1923	204	194	44.3 : 55.7
1924	207	198	40.5 : 59.5
1925	212	224	39.8 : 60.2

The survey as reviewed by the bulletin of the National Lumber Manufacturers Association finds in each of the years 1923, 1924 and 1925, an excess of building over normal requirements, as shown by the population lines. At the end of 1924 the shortage during the war period had been more than made up. The year 1925 reveals a surplus of building over the normal needs of the year; in fact, the country as a whole, as indicated by the 130 cities at the end of 1925, was 11.2 per cent over-built as compared with the year 1914.

Over-Built and Under-Built Cities

This situation is not true, however, for some of the individual cities. Comparison of building done with population shows that, based upon a twelve-year average, 1914 to 1925, the following are among the important **underbuilt** cities, that is, their volume of building has not kept pace with their population increase.

12-Year Average—1914—100

	Population Index	Index of Volume of Construction
Altoona, Pa.	109	88
Baltimore, Md.	118	88
Binghampton, N. Y.	118	72
Butte, Mont	104	84
Dubuque, Ia	101	69
El Paso, Texas	145	93
Galveston, Texas	110	60
Kansas City, Mo.	115	94
Lynn, Mass.	106	56
Minneapolis, Minn.	113	81
Mobile, Ala.	110	69
Peoria, Ill.	107	56
Pittsburgh, Pa.	106	73
Rochester, N. Y.	117	93
St. Paul, Minn	105	66
Salt Lake City, Utah	113	80
San Francisco, Cal.	111	61
Savannah, Ga.	113	80

Following are a few of the cities which, according to this study, have been over-built:

12-Year Average—1914—100

	Population Index	Index of Volume of Construction
Canton, Ohio	134	193
Jersey City, N. Y.	106	161
Jacksonville, Fla.	126	150
Knoxville, Tenn.	161	382
Memphis, Tenn.	112	173
New York City, N. Y.	109	192
New Orleans, La.	108	154
South Bend, Ind.	115	212
Topeka, Kansas	108	171
Wichita, Kansas	118	435

Several cities, including Los Angeles, Detroit, Akron, Denver and Washington, D. C., show heavy volume of building but no estimates are made of their population increase due to unusual conditions which make such estimates uncertain. On the other hand, Seattle, Hoboken, Superior, Wisconsin, and Wheeling, W. Va., have building indexes of 72, 70, 67 and 74 respectively, with no population estimates.

Of the 130 cities listed, 43 are shown as underbuilt, 87 as over-built.

While concrete units have long been used in building construction it is only within the past few years that the manufacture of concrete brick, block, and tile has attained a rapid growth. This growth has been brought about largely by the heavy demand for building materials and the efforts of interested associations in bringing to the attention of the public the desirable features of concrete units. Numerous inquiries are received at the Bureau of Standards, of the Commerce Department from people who are interested in learning more of the properties of concrete units and the details of the manufacturing methods. In order to answer these questions in a reasonably complete manner, a circular has been prepared covering the essential features of concrete brick, block, and building tile, and giving some general information about their manufacture. Copies of the circular may be obtained from the Superintendent of Documents, Government Printing Office, Washington, on payment of 20 cents. The paper is known as Circular No. 304 of the Bureau of Standards.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Pittsburg, Calif., city council has passed a plumbers' ordinance, effective in thirty days, which clamps stringent regulations on the plumbing business, requiring all plumbers who operate within the city to pass a qualifying examination before the board of health and placing them under $1000 bond for the faithful performance of work. Licenses may be revoked by the city council for violation of any provision of the ordinance.

A New Jersey contractor is in trouble and wants someone to dig up a court decision that will help him out of his dilemna. According to the story, the contractor was erecting a building on a cost-plus contract and before it was completed it was destroyed by fire. The owner decided not to rebuild and the contractor found himself in possession of a large amount of quartered oak paneling which he had ordered and paid for out of his own pocket and which the owner declared he did not need and refused to accept. Suit has been brought by the contractor to recover the cost of the material from the owner.

Testimony in the San Francisco carpenters' strike injunction suit was completed Aug. 11 and Superior Judge Walter E. Herzinger ordered the case submitted on briefs. A decision is not likely to be given for several weeks. Attorneys for the building contractors, who brought the suit, were given five days to prepare their first brief, attorneys for the union were given an additional five days to answer it and five days more was allotted for the preparation of the final brief by the plaintiffs.

Volunteering to break the "high cost of rent" for 60,000 government employes in Washington, D. C., an unnamed philanthropist plans to erect a chain of downtown apartments for rental at cost. He proposes to rent them on a basis of about $12.50 per room, bathrooms free. Tenants also would be permitted to purchase apartments outright, with an initial payment of about $250 per room.

The movement toward standardization of industrial products has been considerably extended during the past year; and savings from standardization work are constantly growing in magnitude, according to the Year Book of the American Engineering Standards Committee, just issued. More than 200 definite standardization projects are in process or completed under the auspices of the A. E. S. C, and 365 national trade associations, technical societies and government bureaus are co-operating in the work through some 1600 representatives.

The country as a whole is on "fairly satisfactory employment basis," in the opinion of the labor department which has just made public its July industrial survey. Seasonal slackening and the vacation period were held largely responsible for decreased employment and industrial activity. Many iron and steel mills experienced the usual seasonal let down while the larger establishments maintained a high level of production and employment. Although buildings operations were curtailed, during July, state and municipal improvement work absorbed the majority of local tradesmen, with road construction employing large number of skilled and unskilled laborers.

A deficit of $17,984 in the city water department is announced by the Santa Rosa city council. Disbursements in the department were high this year due to the amount of new mains laid on streets ordered paved and because of the rapidly growing residential districts. Expenditures at the pumping plant were listed at $11,820.60 while $25,317.98 was spent on improving old and laying new distributing systems. Receipts were as follows: water sales, $15,237.96; new services, $3,481.72; miscellaneous charges, $434.15.

OVEN

A warning that a shortage of skilled workmen will continue to exist unless a more concerted effort is made by employers to train apprentices is sounded in a pamphlet on "Apprenticeship" just issued by the Department of Manufacture of the Chamber of Commerce of the United States. The pamphlet is based on a nation-wide investigation of the subject and contains much useful information concerning methods of training now used in certain industries and vocational schools. The purpose of the pamphlet, as explained, is to "awaken employers to the need of training skilled workmen to meet the growing demand of industry."

The Oakland city planning commission, which was re-established as an active body last October, is doomed to an early death because of the small appropriation made in the new budget, Chester K. Hunt, city planning engineer, declares. On the $5500 allotted it, the commission can continue to function only until November, Hunt estimates. Since July 1, beginning of the fiscal year, it has cost approximately $2000 of the $5500 to carry on the commission's work. The amount requested in the budget was $17,500.

Expenditures for highways, bridges, city streets and road maintenance constituted one of the main items in the cost of government tabulations for California municipalities during the last fiscal year, State Controller Ray L. Riley declares in a special report. In the aggregate, reported the controller, expenditures for road building and maintenance by the various cities totaled $20,296,648.28. San Francisco street appropriations for the 12 months reached a grand total of $2,018,845.38, divided as follows: Streets, roads and alleys, $446,065.28; curbs, bridges, gutters and sidewalks, $99,564.11; prevention of street dust, $6383.11; street lighting, $562,325.72; outlays, $904,507.16. Oakland reported a street total of $1,050,900.67, the controller said, composed of the following items: Streets, roads and alleys, $406,322.87; curbs, bridges, gutters and sidewalks, $27,655.18; prevention of street dust, $1066.84; street lighting, $169,548.99; outlays, $446,306.79.

ALONG THE LINE

George A. Schwabland has been appointed city engineer of Maywood, Cal., succeeding Vaughn Wood.

Berkeley Board of Education contemplates a bond issue for $3,000,000 to finance erection of new schools and additions to present structures.

Annual meeting of the American Association of State Highway Officials will be held, this year, at Pinehurst, N. C., Nov. 8 to 12.

Durite Asphalt Company of San Francisco has been incorporated with a capital stock of $25,000. Directors are: A. J. and A. G. Raisch, T. A. Clark, Charles Swan and H. F. Wrigley.

Nov. 2 has been fixed by unanimous vote of the City Council of Seattle, Wash., as the date for a popular vote on the proposed modified city manager plan of government.

City of Portland has surveys under way for proposed $3,000,000 Beach Creek dam project in connection with municipal water system. Dam will be 200 feet high and 930 feet across the top, according to Ben E. Morrow, chief engineer for the Municipal Water Bureau.

Chas. U. Heuser of Glendale submitted the lowest bid to the Los Angeles Department of Public Works to construct Section No. 3 of the Arroyo de la Sacatela Storm Drain System, Section No. 3. The bid is $965,000. Chas. and Geo. K. Thompson of Los Angeles were next low at $1,013,957.

G. E. Verrill has been appointed resident engineer on the Monterey municipal wharf project at Monterey, succeeding D. E. Root who returns to the East Bay section to work in connection with the Alameda county estuary tube project.

Fifty members of the Architectural Alumni Association will attend the annual banquet of the organization at 7 P. M., August 24, in Stephens Union on the University of California campus. Plans for entertainment during the evening are in charge of Creston H. Jensen, Hobert Sibley, executive manager of the California Alumni Association, will be the speaker.

Antone L. Da Roza, pioneer road contractor, died in Sacramento, Aug. 12. He was 67 years old and came to Sacramento in 1875 from the Azores Islands, and he became engaged in road and street grading more than a quarter of a century ago before the modern methods of paving were conceived. He constructed many of Sacramento's streets and extended his road building activities to nearly all sections of California. He graded and paved many roads in Southern California.

Lawrence A. Williams, 48, former president of the Marysville Builders' Exchange, committeed suicide in that city Aug. 14. Recently he suffered a number of financial reverses, including a fire.

Salaries of employes of municipal waterworks are exempt from taxation, the board of tax appeals held in dismissing a claim for taxes on the salary of P. Frank Durkin, superintendent of the bureau of water of Syracuse, New York, for the years 1922 and 1923.

W. H. Weeks, architect, with main offices at 369 Pine street, San Francisco and a branch office in the Ray Building, Oakland, will shortly open an office in San Jose with a representative in charge to take care of projects in course of construction for which Architects Weeks prepared plans.

W. W. Harmon, city engineer of Oakland, according to reports, plans to submit his resignation to the city council on his return from his annual vacation which started August 12. His resignation is prompted, it is said, as the result of numerous controversies that have arisen over improvements ordered by the street department.

A claim of $196,000 against the city and county of San Francisco as a part of its fee for construction of the Hetch Hetchy mountain division tunnels has been filed with City Attorney John J. O'Toole by the Construction Company of North America. The tunnels were built on a cost plus basis, the company guaranteeing that the work could be done for $7,902,752. Actually it cost about $1,000,000 more than this. If the work was done for the guaranteed cost the company was to get $360,000. Part of this has been paid. Now the company asserts that the added cost was due to delays and other causes outside its control and hence that the city should not penalize it, but should pay the entire fee.

TRADE NOTES

Coast States Construction Company, capitalized at $20,000, has been incorporated in Oakland. Directors are: E. M. Washburne, E. O. Potter and L. F. Washburn, all of San Francisco.

E. B. Lacer Co., announce the removal of their offices and salesrooms from Fulton St. and Van Ness Ave., to 521 Golden Gate Ave., San Francisco. The concern carries a complete line of air compressors.

Dunn Painting Machine Co., Dettner Building, San Francisco, has appointed Charles W. Harris to organize a sales organization for it. Robert S. Weintraub has been appointed special representative for the company.

Dealers' Refrigerator Company, of San Francisco, has been incorporated with a capital stock of $75,000. Directors are: Morris Langfelder, Sadie Langfelder, M. A. Nathan, E. Palmuth and J. Z. Hertzler.

Aladdin Heating Corporation of Oakland has been incorporated with a capital stock of $50,000. Directors are: Alexander W. Bergevin of San Francisco; Samuel W. Terry of Lafayette, Calif., and Laurence H. Tharp, San Francisco.

The Boowstaver-Burns Lumber Co. has opened offices in the Chamber of Commerce Bldg., Los Angeles, and a branch in Seattle.

Annual meeting of stockholders of the K. C. B. Electric Manufacturing Company of Sacramento, will be held in that city August 27.

J. R. Reinike will operate from 3004 Thirty-eighth Ave., Oakland, under the trade name of Allendale Hardware Company.

Guy W. Sanders will operate in the East Bay section under the trade name of East Bay Glass Company with headquarters at 369 5th street, Oakland.

Meda Art Tile Company is having a new plant constructed in San Bruno Ave. near Oakdale Ave., San Francisco. The structure will cost in excess of $10,000.

Burndy Engineering Company, 10 East Forty-third St., New York, manufacturer of high-tension bus fittings, announces the appointment of the H. M. Thomas Company of San Francisco as California representative.

The Etwol Commercial Company, 1431 Echo Park Ave., Los Angeles, is a newly organized manufacturer's agency handling electrical lines. The company is looking for additional lines to handle in southern California.

W. J. Sircy for the past four years an estimator in the Pittsburg office of the Redwood Maunfacturers Company, has resigned to accept a position with Holland, Beck & Busch, a lumber concern of Fresno.

After 30 years' experience in the building material business George A. Bowman has formed his own company and has acquired the business of the Union Lime Company at Long Beach. The new company is known as Geo. A. Bowman, Inc. Mr. Bowman's partners are L. C. Hanks, who has been associated with him for seven years, and T. H. Wilson, who has been with him for four years. Mr. Bowman was manager of the Union Lime Company's business at Long Beach for many years.

Fentress Hill, San Francisco timber expert, has been appointed receiver for the Hutchinson Lumber Company of California. Judge C. O. Moncur, of Plumas County, sitting for Judge H. D. Gregory, made the appointment. In order to readjust the company's finances, the Capital City Bank of Charleston, West Virginia, brought suit recently to foreclose on a $950,000 mortgage.

Grinnell Company of the Pacific, with main offices and warehouse in San Francisco, has leased 1500 square feet of floor space at 1815 E. Twelfth street, Oakland, for warehouse and East Bay office quarters. The company will carry a complete line of fire protection supplies, automatic sprinklers, pipe valves, cast iron fittings and plumbers' supplies.

United Lighting Standard Corp., of Compton, manufacturers of concrete, steel and cast iron ornamental lighting standards will start operations at once. H. N. Elliott is president of the concern. Other officers are: E. J. Adams of Compton, vice-president and Harold Kemp of Long Beach, secretary-treasurer.

Oakland Lumber & Terminal Company, capitalized at $500,000, has been incorporated. The company proposes to operate lumber mills, steamship transportation lines and terminal facilities. Incorporators are Charles A. Strong, Piedmont; Pauline Harris, and Resi Green, San Francisco.

Baker, Hamilton & Pacific Co. of San Francisco, announces opening of office and warehouse quarters at Third and Market Sts., Oakland. The branch will specialize in iron pipe, bars and structural steel and is equipped with special three-ton hoists to facilitate handling these materials.

Certified articles of incorporation of the Sudden & Heitman Lumber Company of San Francisco, capitalized at $2,500,000, have been filed at San Jose. Directors of the company are: Wm. A. Heitman, Samuel Towle and Edwin R. Sudden of San Francisco, and Robt. C. Sudden and Austin Keogh of San Mateo.

Trial of a suit for $200,000 profits alleged to have been made by the Pacific Portland Cement Company on the building of the Exchequer reservoir and power house for the Merced Irrigation District was begun before Superior Judge Walter Perry Johnson in San Francisco, Aug. 12. The suit is brought by the Cowell Lime & Cement Company, which claims that the bid for the work should have been awarded to them. They ask the court to determine that they were entitled to the contract and they also seek an accounting of all profits made on the job.

A manual of Concrete Hardners containing detailed architectural specifications for all approved types of hardners, both integral and surface treatments, and both colored and uncolored, has been compiled by the Master Builders' Company and published for architects, engineers, builders and building owners. The book is loose-leaf in form, of file size 8½x11 inches, with pages indexed enabling the reader to turn directly to the specification without having to thumb through pages of data and descriptive matter. This is a complete manual of Concrete Hardner specifications with illustrated descriptive matter arranged systematically and including specifications so worded that they can be incorporated in a general paragraph or in detail into building specifications. Compiled by the originators of the principal of hardening concrete, the information contained in these manuals is based on sixteen years of experience in this specialized field of building construction, in the laying of concrete floors of all kinds in buildings of practically every type. A second book of the same size covering Master Building Concrete Waterproofings has the same unique and convenient arrangement of contents. These manuals were described by one architect as "containing the truth, the whole truth and nothing but the truth, and as easy to refer to as the telephone book." Both books are supplied free upon request by the Master Builders Company, Cleveland, Ohio.

Pacific States Electric Company of San Francisco will lease a three-story reinforced concrete structure to be erected at Tenth and Bryant Sts., San Francisco, at a cost of $350,000. The contract for construction has been let and will be rushed to completion. The company is distributor for General Electric and other national electrical products.

STANDARDS BUREAU PERFECTS NEW QUICK HARDENING CEMENT

A new type of cement which develops in 24 hours a strength comparable to what ordinary Portland cement develops in 28 days, recently has been put to practical use by the United States navy, following years of experimentation by the United States bureau of standards.

The product is called a high-alumina hydraulic cement, since its chief feature is a large amount of alumina content. At the Puget Sound navy yard, Bremerton, Washington, the navy used 9,000 barrels of the new cement in making hollow piles for a dock. A smaller quantity was used in building a hydroplane runway at the Norfolk navy yard.

For the Puget Sound work, 240 hollow piles of 60 foot length were made. In 24 hours after pouring, each one was hardened and could be removed from the forms and placed in water. This enabled the work to be done with only a small framework for forms, and the saving in space and lumber thus affected more than offset the greater cost of the cement, which was brought from the Atlantic coast.

The department of the navy saved a considerable sum from the estimates for the job. The hollow high-alumina cement piles were filled with Portland cement concrete after being placed.

The quick action of the alumina cement in acquiring a strength which can only be secured by ordinary cement after some weeks is believed by government authorities to open a wide field of usefulness where rapid work is needed.

Tests have been made in Europe in street paving, where city traffic was heavy and could not well be diverted for long periods, and high-alumina cement enabled paving to be completed in 48 hours and streets reopened to heavy bus traffic. These tests were made on Boulevard Haussman in Paris and Tottenham Court Road in London.

A recent scientific paper by P. H. Bates, chief of the division of ceramics of the United States bureau of standards, suggests that while the new cement may remain more costly than Portland cement and hence not universally available for such work as road building, there may be instances where the final section of a new road can be made with the high-alumina cement and the road thrown open in 24 hours, instead of waiting a month.

PAVING BRICK PRODUCTION FOR JUNE, 1926

Increases in production, shipments and unfilled orders with a corresponding decline in stock-on-hand is reported by the paving brick industry to the United States Department of Commerce for June as compared with May.

Production went from 21,103,000 in May to 26,342,000 in June. Shipments went from 22,645,000 in May to 30,312,000 in June. Stock fell from 123,808,000 in May to 115,971,000 in June. Unfilled orders climbed from 71,430,000 to the first day of May to 75,283,000 the first day of June.

These figures are compiled from the reports of 26 companies representing 76 per cent of the normal tonnage of the industry.

Ohio lead the list in consumption for June with 8,685,000. Kansas was next with 3,700,000, Texas third with 3,198,000 and Illinois fourth with 2,446,000.

Paraffine Companies Acquires Interest In Schumacher Plant

One of the most important transactions in the history of the construction industry in California is the announcement that the Paraffine Companies, Inc., has acquired an interest in the Schumacher Wall Board Corporation and will be responsible for the management of that concern.

Hunter, Dulin & Co., represented all parties in the deal which involves approximately $1,800,000, according to reports. It is said that some of the securities will be offered to the public through a syndicate composed of Hunter, Dulin & Co., Cass, Howard & Sanford, Inc., and Schwabacher & Co. of San Francisco.

Under the new regime, A. R. Moylan, who has been associated with the Paraffine Companies for eleven years, will be executive vice-president and general manager of the wall board corporation. The Board of Directors will be made up of several of the Paraffine Companies' principal officers and men of prominence in other lines of business.

The Paraffine Companies, Inc., an $18,000,000 corporation, own and operate seventeen plants in various cities along the Pacific Coast. Head offices of the corporation, which, manufactures roofing, paints, building papers, floor covering and allied products, is maintained at San Francisco, although five plants are operated in Los Angeles.

Expansion of the Schumacher Wall Board Corporation since its inception in 1913 probably has no parallel on the Pacific Coast. During the thirteen years it has developed into the largest manufacturer of plaster wall board and kindred products west of the Rocky Mountains.

John Schumacher, Sr., is credited with being the inventor of plaster wall board, and his son, J. E. Schumacher has been serving as president of the corporation. John Schumacher Jr., another son, has been secretary. Starting with an investment of $5000, today the corporation owns two fully equipped plants, one on a six acre tract at Slauson avenue and Fifty-eighth and San Pedro streets, Los Angeles, and the other on a three acre site at Seattle, Wash.

Records of the corporation disclose that the 1925 sales represented an increase of 9400 per cent over the sales of 1915. District sales offices are maintained in San Francisco, Seattle and Portland, and warehouses are located in San Francisso, Oakland, San Rafael, San Jose, Stockton, Tacoma, Portland, Seattle, San Diego and Sacramento. Sale of the Corporation's products is handled through 1650 dealers in every western State and foreign countries. The corporation has patented all of its processes and machines used in the production of plaster wall board and allied products, so that today it owns some eighty odd patents and application for patents basic in the industry.

Backed by the tremendous resources of the Paraffine Companies, Inc., it is expected that the Schumacher Wall Board Corporation soon will be one of the outstanding industries of the country.

July, 1926, Building Shows 12% Increase Over Last Year

A grand total of 12,781 building permits issued during July in 93 cities of the Pacific Coast States, involving $46,818,752 in construction costs, reflects a 12% increase over the comparable figures of last July, as shown by an analysis comprised in the Pacific Coast section of the National Monthly Building Survey of S. W. Straus & Co.

While this total shows a 4% reduction from the June total, properly attributable to seasonal influences, the Straus survey shows that 35 of the 93 cities report increases over June and more than half of them show gains over last July.

British Columbia, Idaho and Oregon cities, as a whole, show substantial gains over the comparable figures of both June and last July. California shows a slight gain over last July. In many of the cities a notable activity is indicated and in others a marked recovery from recent depression is shown.

Los Angeles reports a remarkable recovery in building, the July record of 2906 permits for $14,126,776 of building being the highest monthly figure for a year except that of last December. It represents 44% of the California total reported from 56 cities and 30% of the total from 93 cities of the Pacific Coast area. This figure is 19% above the June record and 25% above that of last July. The Los Angeles metropolitan area, comprising 15 contiguous municipalities, issued $18,786,777 in building permits, a 12% gain over last July.

San Francisco issued 864 permits for $3,556,069 of building construction during July, the lowest monthly total, except that of May, reported this year, 30% below that of last July and slightly below that of July, 1924. In the San Francisco Bay area, 12 municipalities issued 2303 permits for buildings to cost $7,380,938, which is 34% below the comparable figure for last July.

Portland's July record of 1039 permits for building to cost $3,257,405 is the highest since last August except for the March total. This figure reflects an increase of 13% over June and an increase of 41% over the total for July of last year.

Seattle issued 897 building permits involving $2,426,485 in construction costs during July, 9% less than in June and 1% less than during last July. It is the lowest monthly total since September except for the February figure.

Oakland reports 887 permits for $2,362,726 in buildings issued during July, 11% less than in June and 44% less than the July total of last year. It is the lowest July figure this city has reported since 1922.

Notable gains over last year's July figures are also reported from all of the Idaho cities, all of the Washington cities except Seattle, Spokane and Tacoma, Logan, Utah, and from the following California cities: Alameda, Burbank, Colton, Emeryville, Fresno, Lynwood, Ontario, Redwood City, Salinas, San Mateo, South Gate, Vernon and Whittier.

Following are the official July, 1926, building construction cost figures as reported to us by building department executives from 93 cities comprised in the Pacific Coast Section of the National Monthly Building Survey of S. W. Straus & Co.:

City	July, 1926 No.	Cost	July, 1925	June, 1926
CALIFORNIA				
Alameda	82	$ 203,892	$ 187,997	$ 217,373
Alhambra	67	158,075	136,650	433,398

BERKELEY BUILDERS' EXCHANGE HEARS CEMENT TALK

The history of the manufacture of cement from the commencement to the present day, by George Buell of the Pacific Portland Cement Company, was the main feature of an educational night of the Berkeley Builders' Exchange, Aug. 3. Motion pictures dealing with the manufacture of cement and stucco work, were shown in connection with the talk. Buell also dwelt, at length, on the building of earthquake-proof buildings. Dwight Baldwin, concrete engineer, presided at the meeting, which was attended by 100 contractors, builders, and engineers. Refreshments were served at the close of the session.

SUIT FILED IN REDWOOD CITY ON GILROY STREET WORK

A street work contract that failed to go through is the cause of a suit for $30,263.37, filed in superior court at Redwood City by Attorneys Kirkbride & Gordon in behalf of D. C. Brooks against the City of Gilroy.

On March 17, 1924, city trustees of Gilroy engaged Charles E. Sloan, a San Francisco civil engineer, to do street work and agreed to pay him 8 per cent of the contract price, the complaint avers.

The contract price was $464,845, and Sloan's alleged share was $37,187.60.

But on September 11, 1924, the city abandoned its street work proceedings.

On May 4, 1926, Sloan presented his claim for $30,263.37 to the trustees and it was rejected.

Sloan has since assigned his claim to Brooks, who is a member of the firm of Kirkbride & Gordon.

PAINTERS WIN IMPORTANT COURT DECISION

The United States District Court of New Jersey has decided that the painters have a right to demand the highest rate of wages where an employer in one city contracts to do a job of painting in another city. If the wage rate is higher in his home town town the court says that it is not unlawful for the journeyman to demand that he pay the high rate even though man in the city where the work is being done are paid a lower rate. The Parker Painting Company of New York had some work to do in New Jersey and because the painters demanded the rate being paid in New York City, the company sought an injunction restraining them from interfering with the company employing men to work for them at a lower rate than that paid in New York. Under the ruling of the court the injunction was denied.

Law and Order in summing up the situation says that it is apparent that the Court did not consider whether the painters rule is not an effort to limit and prevent competition among employers. The purpose of the union seems obvious to discourage outsiders from bidding and to afford special protection to local bidders. This issue they say must finally be decided by the United States Supreme Court as disputes of this kind will be continually arising.

July wholesale prices of standard plumbing fixtures for a six-room house, as collected by the Department of Commerce from reports of 12 representative manufacturers and wholesalers, continued to decline, the total being $106.78, as compared with $107.13 in June and $111.15 in July, 1925.

The San Francisco Carpenters' Strike As Seen By L. A. Engineer

(By Edgar R. Perry, Consulting Engineer, Merchants and Manufacturers Association of Los Angeles, in the California Constructor

In the strike of union carpenters at San Francisco and the Bay District—a disturbance which has been in progress four months, the pubic has had an opportunity to witness a determined effort on the part of the unions to crush the Open Shop and force contractors and working men to submit to the dictation of paid officials representing organized labor.

Working under the most severe handicaps imaginable the Industrial Association of San Francisco has resisted efforts of the union to close up San Francisco, by resorting to every reasonable recourse, and slowly, but surely, a great victory for the Open Shop appears to be emerging from chaos. Yet at a terrible cost to property owners, contractors and workmen.

The battle began last March after the carpenters' union issued an order that After April 1, 1926, nonunion carpenters would not be permitted to work with union men. The order was issued by a personal representative of President Hutcheson of the international organization.

At that time carpenter work in the Bay District was proceeding along Open Shop lines with a reasonably full measure of employment, wages being $8 per day. It is asserted that between 70 and 80 per cent of the workmen belonged to the union, but that they were working harmoniously with nonunion mechanics.

When the strike order went into effect nothing very unusual happened. It appeared for a time that the strike was a failure. But, within a few days a new form of progressive strike action manifested itself. It appeared to be the plan of the union to keep as many union men as possible on the various jobs, and by systematically assaulting job after job, the strikers, either forced the Open Shop mechanics to join the union, or ran them off. Failing in either of these two undertakings, they pulled off the union workmen.

The answer of the unions to the refusal of the contractors to knuckle down was a direct action program that manifested itself in the form of organized bands of terrorists who piled into automobiles and rode from job to job, wherever nonunion carpenters were at work. Arriving at such a location the thugs, armed with clubs, gaspipe, sap-sticks and in some instances guns, would swarm over the place, frightening the nonunion workmen if possible, and giving them the alternative of taking out union cards or being beaten up.

In a great many cases carpenters were yanked off the jobs, thrown into automobiles, hauled to Carpenters Hall, and there browbeaten into taking out union cards. In many other instances good, honest workmen were knocked down and beaten mercilessly. In several instances legs were broken, skulls were fractured, features were mutilated, and arms were shattered. Dozens of Open Shop workmen were taken to the hospital following these riots. With such a campaign the strikers were able to force the union card upon the men on countless jobs without having more than 300 to 400 union carpenters idle at any time.

The chief of police undertook to enforce the law impartially while the riots were at their heights, but is reported to have found it almost impossible to get the desired results, owing to asserted interference on the part of county supervisors who guide the destinies of the city as well as the county.

There is, back of this, the interesting fact that in San Francisco proper most of the residents and voters are working people, to whom politicians cater, while the employers are to a great extent, residents of communities across the bay. It is asserted that the political machinery of San Francisco city and county is dominated by the unions, even to the courts.

Upwards of 200 assaults have taken place, many of the men are permanently injured, buildings have been wrecked, and the entire morale of the industry shattered. Pages of the record of these months read like this:

Six American Plan carpenters employed by Paul de Martini, on a job at Green and Pierce streets, kidnapped by 50 union carpenters who raided the job in nine automobiles, and took their victims to Union headquarters where they forced them to join the union. No arrests.

Walter Hansen, American Plan contractor, beaten and kicked by four of a mob of union men who drove up to his job at 113 Monterey boulevard, left leg broken and body bruised from kicking. Police arrested four men who were subsequently released by the Court.

Louis Anderson, American Plan carpenter employed by the Marian Realty Company, beaten into unconsciousness, on job at Sacramento and Franklin streets. No warrant issued.

Charles A. Michelson, union foreman, employed by Cahill Brothers, contractors, on a job on Mission street between Eighth and Ninth streets, on which nonunion carpenters were employed, attacked and beaten in front of his home at 17 Temple street by two men who struck him down from behind. Jaw broken and face mutilated. This man has been a union carpenter foreman in San Francisco for 30 years. His crime was employing nonunion men. His assailants were not apprehended.

And so goes the lists, with evasion, and ineffective motions by police and courts.

As soon as the strike was launched the Industrial Association of San Francisco which handled American Plan Open Shop matters around the Bay, began shipping Open Shop carpenters from Los Angeles to that city. For the reason that the Los Angeles market was adequately supplied with Open Shop carpenters, San Francisco was able to recuit several hundred mechanics from here, and the treatment which they have been accorded in the Bay district is reported to have permanently cemented their loyalty and enthusiasm for Open Shop conditions. The fact that such an army of Open Shop mechanics were available in Los Angeles is said to have been one of the reasons why San Francisco has been able principally to keep construction moving forward on an Open Shop basis.

To enforce its position against the reign of lawlessness, the Industrial Association put into effect the Permit System, whereby with the co-operation of the material interests, no building materials are delivered unless the job is American Plan. Thus, gradually, the Open Shop has been re-established until now, out of about 2300 carpenters working, approximately 650 are card men under closed shop conditions.

So effective has been the work that President Hutcheson of the carpenters union made a trip to the coast about three weeks ago to find some way to save the situation, and even offered to call off the strike if the Los Angeles Open Shop men were withdrawn. Failing in this he is asserted to have hurriedly left town before a bench warrant could be served upon him.

Contractors in Los Angeles can readily appreciate the blessing of operating in an Open Shop city. Eternal vigilance is the only way to keep the city safe and prosperous, and it is only by insisting upon **open shop foremen and mechanics,** in every craft and on every job, that profits can be insured. The building industry of Los Angeles will be prosperous through the Open Shop in the same proportion that Open Shop mechanics are employed.

LINK-BELT COMPANY HOLDS SALES CONFERENCE

Fifty sales representatives of the Link-Belt Company attended the sixteenth sales conference of the company held recently at Indianapolis, Ind. The keynote of the open discussion of the three days' meeting was to develop a true round table discussion, better methods of serving their respective fields, and to promote an increased outlook through a dissemination of the idea that: "Business is obtainable if the product is good, it its presentation is correct, and if the buyer can be told where to look for it, fortified in his knowledge that the most thorough service is awaiting his demands."

ELIMINATION OF FIRE TRAPS PLAN OF WORKS BOARD

Full co-operation of the Board of Public Works in any movement to cleanse San Francisco of dangerous "fire-traps" is pledged by Timothy A. Reardon, president of the board.

President Reardon added his name to the rapidly growing list of city officials demanding more rigid building laws as a result of the recent death of R. H. Cox in a fire in an alleged "firetrap" lodging house at 777 Howard street. Reardon said:

> There is no doubt that there are many buildings in San Francisco, consisting chiefly of cheap lodging houses, that are a constant source of danger from fire and a menace to the lives of the occupants.
>
> Many of them should be torn down, or remodeled, but, unfortunately, they are technically within the existing building laws, and cannot be removed.
>
> It is up to the Board of Supervisors to inaugurate new building legislation, furnishing greater protection for the public. If that is done, the Board of Public Works will see that those laws are strictly enforced.

Condemnation of property is in the hands of the supervisors, according to Reardon, rather than with the Board of Public Works. Quick action against dangerous buildings, he said, also lies in the hands of the Board of Health, which is empowered to close property to occupancy if the health laws are not strictly complied with. He concluded:

> In my term of office I have torn down approximately 1600 shacks and "firetraps," most of them built immediately after the fire of 1906. Practically all of the so-called "flop houses," or cheap lodging houses, erected in that period, were destroyed.

Building News Section

APARTMENTS

Completing Plans
APT. BLDG. Cost, $150,000
SAN FRANCISCO, Cal. S Geary 32-6 W 11th Ave.
Six-story Class "C" reinforced concrete store and apt. bldg. (112 rooms).
Owner—Calif. Realty & Financial Co., (O. A. Brown, President. Phone Kearny 5446) De Young Bldg., San Francisco.
Architect — J. C. Hladik, Monadnock Bldg., S. F.
Bids are being taken for concrete construction, plumbing, plastering and roofing.

Completing Plans.
APARTMENTS Cost, $125,000
SAN FRANCISCO, Calif. S Broadway 137 W Octavia St.
Two 6-story and basement reinforced concrete class C apartment buildings (2 and 3-room apts.)
Owner — California Real Estate and Finance Corp., O. A. Brown, pres, phone Kearny 5446, De Young Bldg., S. F.
Architect — J. C. Hladik, Monadnock Bldg., S. F.

Bids For Plastering and Elevators To Be Taken About Aug. 20.
APT. BLDG. Cost, $100,000
OAKLAND, Alameda Co., Cal. E Webster St, 200 N 17th.
Four-story reinforced concrete and hollow tile apt. bldg. (26 2 and 3-room apartments and stores).
Owner—R. W. Farmer, 544 Hobart St., Oakland.
Architect — Chas. W. McCall, 1404 Franklin St., Oakland.
As previously reported ornamental iron work awarded to Frauneder Ornamental Iron Works.

Contract Awarded
APT. BLDG. Cost, $28,245
BERKELEY, Alameda Co., Cal. E. Oxford St. near Hearst St.
Three-story and basement frame apartment building and garage.
Owner—H. C. Castle.
Architect — Samuel Lightner Hyman et al, 821 Foxcroft Bldg., S. F.
Contractor — Hill & McCorkle, 319 Fourteenth St., Oakland.

To Be Done By Day's Work.
APARTMENTS Cost, $70,000
SAN FRANCISCO, Calif. E Hyde 84 S Lombard.
One-story and basement steel frame and concrete apartment building, (10 apts.)
Owner—Joseph Greenbach, 707 Hearst Bldg., S. F.
Architect—C. O. Clausen, Hearst Bldg. San Francisco.

Contract Awarded.
FLATS Cost, $12,000
SAUSALITO, Marin Co., Cal.
Two-story frame and stucco duplex flats (2 6-room).
Owner — A. Palmer, 303 2nd St., Sausalito.
Architect—Walter Falch, Hearst Bldg., San Francisco.
Contractor—Wm. Veo, Mill Valley, Cal.

Sub-Contracts Awarded.
APARTMENTS Cost, $150,000
SAN FRANCISCO, E Larkin St. 80 N Turk treet.
Six-story and basement concrete (45) apartments of 2 and 3-room (100 rooms and 2 stores).
Owner—J. G. Kincannon, 560 Larkin St. San Francisco.
Architect—Office of Owner.
Structural steel — Golden Gate Structural Iron Works, 1541-63 Howard St., San Francisco.
Plumbing—J. Gibbs Sons, 1706 Geary St., San Francisco.

Contract Awarded.
STORE & APTS. Cost, $23,500
SACRAMENTO, Cal., 2730 M St.
Store and apt. bldg. (11 apts. and 4 stores).
Owner—J. Giametti, 305 J St., Sacramento.
Contractor—W. R. Saunders, 2614 I St., Sacramento.

Segregated Contracts Awarded
APARTMENTS Cost, $200,000
SAN FRANCISCO. Franklin and Clay Streets.
Six-story and basement steel frame and concrete apartment building (2, 3 and 4-room apts).
Owner—Marian Realty Co.
Architect—H. C. Baumann, 251 Kearny St., San Francisco.
Reinforcing Steel — Gunn-Carle, 444 Market St., San Francisco.
Structural Steel — Golden Gate Iron Works, 1541 Howard St., San Francisco.
Grading — Granfield-Farrar-Carlin, 67 Hoff St., San Francisco.

Contract Awarded.
APARTMENTS Cost, $14,000
BERKELEY, Alameda Co., Cal. 2683-97 Mabel St.
One-story 16 room stucco apt. bldg., (18 apts.)
Owner—Hial. W. Wakefield, 3035 Harper St., Berkeley.
Architect—None.
Contractor—C. D. Neader, 830 McKinley Ave., Oakland.

Contract Awarded.
APARTMENTS Cost, $25,000
SAN FRANCISCO. W Pierce St. 49 S Capra Way.
Three-story and basement frame (6) apartments.
Owner—Francis Stephens, 3475 Pierce St., San Francisco.
Architect—E. E. Young, 2002 California St., San Francisco.
Contractor—Louis Johnson, 729 Occidental Ave., San Francisco

LOS ANGELES, Cal.—Lilly-Fletcher Corp., National City Bank Bldg., plans the erection of a 12-story Class A apartment building on Arcady Apartments site at the northeast corner of Wilshire Blvd. and Rampart St.; reinforced concrete construction; $1,500,000. Walker & Eisen, 701 Great Republic Life Bldg., are the architects.

Contractor Taking Sub-Figures.
APT. BLDG. Cost, $97,000
BERKELEY, Alameda Co., Cal., 2711 Durant Ave.
Three-story 65-room frame and cement plaster apt. bldg. (29 apts).
Owner—Annie M. Willis, premises.
Architect & Builder—Harry C. Knight, 1128 Franklin St., Oakland.

Bids Opened
STORE Cost, $26,000
OAKLAND, Alameda Co., Cal., — San Pablo Ave., 21st and Castro Sts.
Two-story frame and brick veneer store and apt. house (6 stores, 8 2-room apts).
Owner—A. T. Anderson.
Architect — Schirmer Bugbee & Co., Thayer Bldg., Oakland.
Low Bidder—S. Rasori, 270 Tehama St., San Francisco.
Other bidders were: Jensen & Petersen, $33,341; R. W. Littlefield, $33,500; Schuler & McDonald, $34,700; Barrett & Hilp, $36,200.

Preliminary Plans Being Prepared
APARTMENTS Cost, $20,000
BERKELEY, Alameda Co., Cal.
Two-story frame and brick veneer store and apartment house (4 stores and 7 apts).
Owner—Name withheld.
Architect—Wm. K. Bartges, Mercantile Bank Bldg., Berkeley.

Completing Plans—Ready for Bids In About a Month.
APT. HOUSE Cost, $1,500,000
OAKLAND, Alameda Co., Cal., Grand Ave., Euclid Ave. and Hillpoint.
Sixteen-story class A steel frame community apt. house with stucco exterior (90 apts., 450 rooms. Garage in basement for 100 cars).
Owner—Bert Bercovich et al.
Architect—H. C. Baumann, 251 Kearny St., San Francisco.

Contract Awarded.
APARTMENTS Cost, $30,480
SAN JOSE, Santa Clara Co., Cal. W Santa Clara Street.
Two-story brick and concrete store and apartment building (3 stores and 6 apartments).
Owner—Henry Guilbert, San Fernando and Locust Sts., San Jose.
Architect—Chas. S. McKenzie, Bank of San Jose Bldg., San Jose.
Contractor—Herbert Jorgensen, 63 W. Santa Clara St., San Jose.

LOS ANGELES, Cal.—Archt. Arlos R. Sedgley, 1103 Kerckhoff Bldg., has compl. wkg. plans for 4-story class C brick apt. bldg. at 510 Westmoreland, for Harris N. Dickerman, Pac. Natl. Bank Bldg; 125 rms, divided into 59 apts; 54x156 ft., part basement, press. br. and art stone facing, tile and comp. rfg., gas steam rads., cem., pine and hdwd. flrs., pine trim, tiled baths and drainbds., wall beds, aut. elec. elevator, ornam. iron wk., storage water htr; $150,000. Day work and sub-contr. by owner.

Owner—John W. Baxter.
Architect — Ralph Wyckoff, Growers Bank Bldg., San Jose, Cal.
Bids are being taken for plumbing, heating, electric wiring, painting, etc.

Charles Kellogg, the famous nature man, who sings like the birds, will appear before the microphones of KGO between 8 and 9 o'clock tomorrow night. A few months ago reports from his native mountain region said he was dead, and he states that the first he heard of his "death" was over the radio. He listened to all the details read by the announcer. At the time he was in the High Sierra, having the time of his life, singing the language of the birds and animals around him, and recovering from an operation which in fact had imperiled his life.

Because of theatrical contracts Kellogg has never before broadcast in the West, and but a few times anywhere in the world.

In his KGO program Kellogg will include a few of the songs of birds and animals of islands of the South Seas, from which he returned last May, after months with the natives, who hailed him as "chief."

While in Fiji, Kellogg learned of "cannibal radio" transmission—pounding upon hollow logs—and will tell his radio listeners in North America how the art is practiced.

For many years Kellogg has attracted attention among musicians and scientists of the world. All his bird tones are produced by natural means. He has a throat formation, which all of us possess in rudimentary form, perfectly developed, so that he can produce sounds which lie in pitch far above the range of the normal human voice.

Kellogg is a charming talker. His demonstration before the KGO microphones, while unique in itself, will be especially interesting to thousands who have seen and heard him on the stage.—San Francisco Examiner, Aug. 18, 1926.

MR. KELLOGG is a friend.
* * *
OF MRS. Sandy.
* * *
AND SANDY Pratt, president.
* * *
OF THE Pratt Building Material Co.
* * *
DOUGLAS 300—"easy to remember."
* * *
AND THEY heard Mr. Kellogg.
* * *
AND HIS wonderful talk.
* * *
ON JULY 4th last.
* * *
AT THE Meadow Valley Inn.
* * *
AT MEADOW Valley, Plumas County.
* * *
WHERE SANDY tried.
* * *
TO CATCH all the trout.
* * *
IN SPANISH creek.
* * *
NEAR WHERE.
* * *
MR. KELLOGG was born.
* * *
IT IS well.
* * *
WORTH YOUR while.
* * *
TO TUNE in.
* * *
ON KGO.
* * *
AND HEAR this talk.
* * *
MR. KELLOGG goes to New York.
* * *
AND WILL appear.
* * *
AT THE New York Hippodrome.
* * *
BEGINNING SEPTEMBER 8th.
* * *
LATER HE may appear.

NOTICE TO BIDDERS

(Marin Junior Union College District)

Notice is hereby given that sealed bids will be received by the Marin Union Junior College for the equipment and supplies hereinafter listed. All bids must be in the hands of Ada M. Fusselman, secretary of the Junior College Board, at her place of business on San Anselmo Avenue, San Anselmo, north of the Town Hall, by five P. M.

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

on Thursday the 26th day of August, 1926. The said bids will be opened at meeting of the Junior College Board held in the building of said Junior College Board at Kentfield, California, on the west side of the Redhill and Ross Landing Road, north of the Greenbrae Road. The Board reserves the right to reject any and all bids. Bidders must specify the kind, quality and amount which they can deliver and such delivery must be immediate except for supplies to be furnished as needed during the year, and as to such supplies the board reserves the right to call for such supplies as needed up to June 30, 1927. In determining the lowest bid kind, quality and comparative values will be considered. Further specifications and descriptions of the articles to be bid upon may be obtained by applying to the undersigned. Any bidder may bid for one or more articles required under the following classifications:

1. Physics laboratory equipment and supplies.
2. Zoology laboratory equipment and supplies.
3. Mimeograph and mimeograph supplies.
4. Toilet supplies.
5. Stationery and supplies.
6. Metal lockers.
7. Library books.
8. One metal fire escape installed.

ADA M. FUSSELMAN,
Secretary, Marin Union Junior College Board.

San Anselmo, California.
Dated: August 11, 1926.

NOTICE TO BIDDERS

(Pumping Machinery and Equipment— Vallejo, Calif.)

Pursuant to the provision of Ordinance No. 31, N. S., of the Ordinances of the City of Vallejo, and a resolution duly adopted by the Council of the said City, sealed proposals or bids will be received by said City Council in open session at its meeting room in the City Hall, Vallejo, California, between the hours of **ten and eleven o'clock A. M., on Wednesday, August 25th, 1926,** for furnishing to the City of Vallejo, pumping plant machinery and equipment.

Bidders must submit a proposal specifying a lump sum price for the above described machinery and equipment and the time of delivery, all F. O. B. Vallejo, California, cars or steamship dock, either under specifications for Plant A or Plant B, or both.

All proposals must be made on regular typed forms which may be procured from the City Engineer and sworn to as prescribed therein.

All proposals must have a copy of this notice annexed thereto.

Each proposal must be accompanied by a check in the sum of ten (10) per cent of the Aggregate amount of the lump sum stated in said bid or proposal drawn on a responsible bank and payable to the City of Vallejo or by a bond for the said amount so payable as a guarantee that the successful bidder will enter into a contract as hereinunder provided.

The successful bidder will be required to enter into a contract within ten (10) days after any Ordinance or Resolution accepting his bid is in full force and effect and at the same time furnish two good and sufficient bonds or certified checks, one in the sum of at least fifty (50) per cent of the total amount of said contract, conditioned upon the faithful performance of his contract, according to its terms, and the other in the sum of fifty (50) per cent of the total amount of said contract conditioned upon the payment of all bills for labor and material used on the work by the contractor and holding the City of Vallejo free from all liens for the nonpayment of same.

The Council reserves the right to reject any and all bids if deemed excessive. Each proposal must be presented by the bidder or his agent in person within the hours above specified.

ALF E. EDGECUMBE,
City Clerk of the City of Vallejo.

(Bridge—City of Santa Cruz)

Sealed proposals for the construction of a reinforced concrete bridge replacing the present wooden structure commonly known as the Ocean Villa Bridge across Pilkington Gulch on the East Cliff Drive in the City of Santa Cruz will be received by the Clerk of the City Council of the City of Santa Cruz, in the City Hall, No. 61 Church Street, Santa Cruz, California, **on or before 8 o'clock A. M., of Thursday the 26th day of August, 1926;** said proposals will be opened at 9.30 o'clock A. M. on the 26th day of August, 1926, by the City Council at a regular meeting.

The following is an estimate of quantities for the purpose of determining bids for the foregoing work:

ITEM NO. 1. Remove old bridge.

ITEM NO. 2, 206 cubic yards excavation for West abutment and piers.

ITEM NO. 3, 40 cubic yards excavation for East abutment.

ITEM NO. 4. 49 timber piles in place (Piles to be furnished by the City of Santa Cruz).

ITEM NO. 5. 45 cubic yards Class "A" concrete in footings in place.

ITEM NO. 6. 320 cubic yards Class "A" concrete in walls and pier above footings and girder spans, in place.

ITEM NO. 7. 27 cubic yards Class "A" concrete in railings in place.

ITEM NO. 8. 60,000 pounds reinforcing steel in place.

All to be in accordance with plans prepared by James K. James, City Engineer and on file in the office of the City Clerk.

All proposals will be submitted on the form attached to said plans and specifications.

Each proposal must be accompanied by a certified check payable to the order of the City of Santa Cruz in the amount of ten (10%) per cent of bid conditioned that the Contractor whose proposal is accepted will execute a contract and furnish bonds for one-hundred (100%) per cent of said proposal within eight (8) days from the date of notice of award.

Payments will be made at the time and in the manner to be specified by the City Council.

The City Council reserves the right to reject any and all bids.

Before any award is made the lowest bidder will be required to satisfy the City Council of his ability to provide suitable equipment and materials for the proper performance of the work.

Plans and specifications may be obtained from the City Engineer, City Hall, upon the payment of a $10.00 deposit which will be refunded upon the return of plans and specifications in good condition.

By order of the City Council.

S. A. EVANS, City Clerk.

1926 Edition

San Francisco Building Laws

Ready For Distribution

With the issuance of this 1926 edition, the Building Ordinance Books heretofore published will be obsolete, inasmuch as many sections of the law have been amended and additional sections added.

This 1926 edition contains all revisions and additions to the code up to and including June 1926.

In addition to the Building Laws of San Francisco, the 1926 edition contains the FIRE ORDINANCES as regards the construction industry, the ELECTRICAL ORDINANCES, the SIGN ORDINANCE, the BILLBOARD ORDINANCE and other laws covering regulations concerning the construction interests.

Price $1.00 per copy.

THE CONTRACTORS' ROOM

BUILDING AND ENGINEERING NEWS maintains a Contractors' Room where plans and specifications may be filed by Architects, Engineers and Owners for the convenience of bidders in San Francisco and the Bay Counties.

Architects, Engineers and Owners are invited to forward plans of their projects to BUILDING AND ENGINEERING NEWS. No charge for this service. The plans will be returned in good condition when contract for work is let.

Stability...

and speed in Construction

SPEEDY wall construction is valuable only when it builds rigid, lasting walls.

Schumacher Plaster Wall Board insures swift construction, yet it builds permanent walls. Stability has been engineered into it; and it's made only of durable materials.

Wherever permanent walls are needed you can use it with full confidence. Use it in homes—apartment houses, business structures.

SCHUMACHER WALL BOARD CORP.

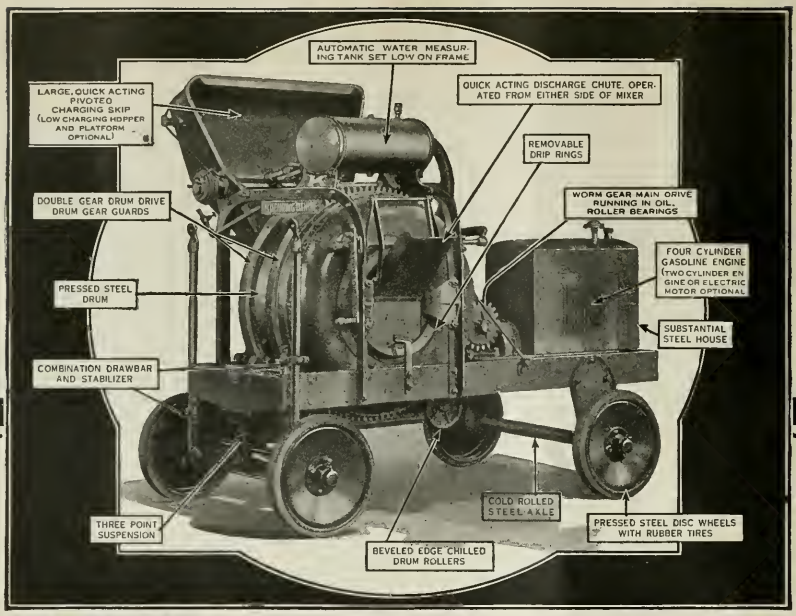
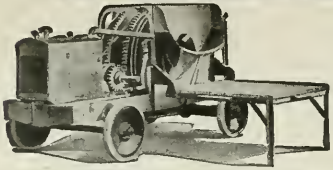
Oakland - San Francisco - San Jose - San Diego

Schumacher Plaster Wall Board

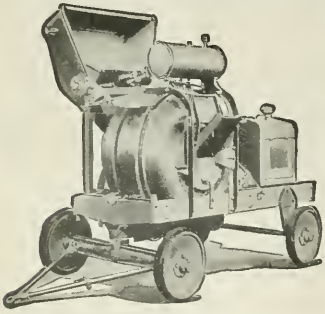
6T



AUTOMATIC WATER MEASURING TANK SET LOW ON FRAME
QUICK ACTING DISCHARGE CHUTE, OPERATED FROM EITHER SIDE OF MIXER
LARGE, QUICK ACTING PIVOTED CHARGING SKIP (LOW CHARGING HOPPER AND PLATFORM OPTIONAL)
REMOVABLE DRIP RINGS
DOUBLE GEAR DRUM DRIVE DRUM GEAR GUARDS
WORM GEAR MAIN DRIVE RUNNING IN OIL, ROLLER BEARINGS
FOUR CYLINDER GASOLINE ENGINE (TWO CYLINDER ENGINE OR ELECTRIC MOTOR OPTIONAL
PRESSED STEEL DRUM
SUBSTANTIAL STEEL HOUSE
COMBINATION DRAWBAR AND STABILIZER
COLD ROLLED STEEL AXLE
PRESSED STEEL DISC WHEELS WITH RUBBER TIRES
THREE POINT SUSPENSION
BEVELED EDGE CHILLED DRUM ROLLERS



Low charging platform, steel frame of which is hinged to mixer, and can be folded up against mixer-frame for hauling from job to job! Wide, capacious charging hopper makes charging easy.



Charging Skip goes to high angle charging position — shoots materials into drum without pounding skip! Note low automatic water measuring tank and Disc Wheels! Liberal drum dimensions!

HIGH speed operation — balanced light weight for fast hauling, and strong sturdy construction for long hard service —that's the Koehring Dandie!

Fast charging and fast discharging, the Dandie is a big money earner!

KOEHRING 7-S DANDIE Mixer

is the outstanding value in the light mixer field. Its design includes: 4 cylinder radiator-cooled engine or hopper-cooled two cylinder engine; completely enclosed transmission in dust tight oil bath with shaft on roller bearings; double drum gear drive; drum rollers fixed to shaft turning in big bearings insuring even bearing wear, and perfect lubrication!

7-S Dandie Mixer

Two or four cylinder engine. Charging skip or low charging hopper and platform. Automatic water measuring tank. Rubber tired steel disc wheels, or steel wheels. Complies with A. G. C. Standards.

Send back this coupon

learn the construction of the Dandie, and you will recognize a remarkable value, and big profit earner on the job.

SEVEN BILLION DOLLARS 1926 CONSTRUCTION ESTIMATE

"It is now being predicted that America's construction activity for the entire 12 months of this year will run close to $7,000,000,000, which would be the highest amount ever invested in construction in the United States in a single twelve months," declares the monthly bulletin of the research department of the Greenebaum Sons Investment Company. Continuing, the bulletin says: "Whether the prediction will prove correct depends upon whether construction activity during the second half of the year continues at its present pace. At present there is little indication of a slackening. "Noting the fact that approximately $3,420,000,000 was invested in new buildings in the United States during the first six months of 1926 and pointing out that this in itself is the highest record ever made for the same length of time, the bulletin continues: "Total new building in the first half of 1925 was $3,020,000,000 or $400,000,000 less than this year. In 1924 the total was $2,550,000,000 and in 1923 it was $2,320,000,000."

SAND AND GRAVEL CONVENTION

The National Sand & Gravel Association will hold their eleventh Annual Convention in Cincinnati January 17, 18 and 19, 1927. This announcement by the Executive Committee at their meeting held in Detroit, Mich., June 29. Headquarters will be the Gibson Hotel.

BIDS ASKED FOR GRADING S. F. "BOTTLENECK"

Work will be under way shortly on the rebuilding of the final section of the Peninsula highway, in San Mateo County, necessary to break the "bottle neck" and end the congestion existing in the vicinity of Colma. Bids have been asked by the California Highway Commission for grading 1.6 miles from Colma to Cypress Lawn Cemetery, largely on new right-of-way which will provide 40 foot roadways to be separated by a strip 28 feet in width, reserved for the car lines of the Market Street Railway.

The present narrow pavement, which shares the street with the car tracks, will give place to two one way pavements, divided in the center by the car lines. The new right-of-way will have a width in excess of 100 feet. Condemnation suits have been filed by the commission and an order of possession secured for all necessary parcels of land which could not be secured by negotiations.

The initial contract, bids on which will be opened in Sacramento on September 20th, will be followed by bids for paving as soon as grading has progressed to a point where paving may be commenced.

Much study has been given to the location and plans for the Peninsula reconstruction by the highway engineers. Much of the highway will be built on entirely new right-of-way, eliminating present curves and other dangers.

The Colma-Cypress Lawn section completes the reconstruction of the Peninsula highway through San Mateo County, initiated in 1927 by the present highway commission. Traffic conditions in and out of San Francisco to the South will be greatly improved.

MANY PAINTERS WORKING UNDER AMERICAN PLAN

A general survey of wages paid journeymen painters throughout the United States and Canada reveals the fact that many cities are today doing painting and decorating work under the American plan or so called open shop conditions. The average scale of wages paid painters in 92 of the principal cities is $1.06 per hour. The low rates being paid at Little Rock, Ark., 40 cents an hour, Los Angeles, Calif. pays 62½ cents an hour and Chicago and a few other large cities the rate of $1.50 per hour, the Chicago rate will top them when the union is given the high scale paid to other trades in Chicago of $1.62½ an hour which it is understood will go into effect September 13.

Fifty-one cities are reported as working on the open shop basis while 41 cities are acknowledged as being strictly closed shop towns. The average wage paid in the open shop cities is 96 cents with Little Rock, Ark., as the lowest at 40 cents an hour and the highest of $1.25 being paid in Hartford, Conn., and New Orleans. The average wage paid in the 41 closed shop towns is figured at $1.19, the scale running from 90 cents an hour in Baltimore, Manchester and Reading, Pa., to the high rate paid in Chicago. —(Bulletin Building Construction Employers Association of Chicago.)

MATERIAL PRICES IN SOUTH DECLARED LOWEST IN 7 YEARS

Prices of building materials in the Los Angeles area now are lower than they have been at any other time during the last seven years, and prospective builders of both business buildings and homes for their own use should proceed at once with their structures, according to a report just released by the Eberle & Riggleman Economic Service.

The statisticians point out that the present situation is more favorable for building than at any other time since 1919, and those who have been waiting to build for their own needs at low costs will not find it safe to wait for further price reductions. They caution builders of structures for rent or sale, however, not to proceed without careful investigations, as certain types are over built.

"The present price situation is very favorable for those who are planning to build for their own needs," Eberle & Riggleman continue. "As stocks of most materials are relatively low, it is doubtful if any further significant decreases will occur, and any substantial increase in demand would cause prices to rise almost immediately.

"Many prospective builders of structures for their own use, both business building and home, have been waiting for building material costs to reach a low level before beginning construction," the report adds. "It is believed that a favorable time for action has come. While prices, of course, may decline still farther (it is not possible to determine the exact low point) it is not safe to wait longer for further price declines."

According to the report, those who are in position to take advantage of the present relatively low level of prices will find that in general, lumber and cement prices (at the warehouse) are roughly one-third less than they were in 1923. Building materials prices should not be expected to decline to pre-war levels at this time, Eberle & Riggleman state. In the great national depression of 1921, the lowest point reached by conservative costs was 62 per cent above the costs for 1913, the report concludes.

STEEL EXPORTS SATISFACTORY

June exports of iron and steel from the United States, while declining from the average total maintained for the first five months of 1926, brought the total for the first six months of this year to more than 18 percent above the total for the same six months of 1925, the iron and steel division of the Department of Commerce reports. The gain shown in the first six months of this year indicates, according to Secretary Hoover, that "we are able to hold our own in competition with Europe in the fact of its lower wages and lower standards of living." The June exports totaled 159,506 gross tons, as compared with 173,418 tons in May, and the average of 173,815 tons for the first five months of this year. Exports in the first half of this year totaled 1,028,583 gross tons, as compared with 812,295 gross tons in the first half of 1925.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Bids to widen and thicken 14.37 miles of the trunk highway in Merced County have been received by the California Highway Commission. The lowest offer was submitted by Allied Contractors Inc. of Colorado whose bid was $161,818.55. The Hanrahan Company of San Francisco was the second low bidder with an offer of $177,082. The engineer's estimate was $193,-941.75. The work will consist of widening the present 15 foot concrete pavement to 20 feet by placing a cement concrete shoulder and an asphalt concrete wearing surface.

According to a recently completed investigation by The American Appraisal Company the cost of brick and steel frame construction has increased less than any other type since prices began to jump in 1913. Figures from the various types of construction basing the yearly averages upon the 1913 costs as 100, give the following: Frame, 204; brick with wood frame, 213.4; brick with steel frame, 200.2, and reinforced concrete, 200. The highest point reached was for brick with wood frame construction in 1920 when the index for this type was 283.5. The same year showed frame construction to be 268.7 and brick with steel frame 256.7.

Total money value of engineering construction contracts for the entire United States in July was $299,099,000, as against $212,509,000 for July, 1925, Engineering News-Record reports. The actual volums of contract letting for the period, when corrected for inflations in costs which have occurred since 1913, is the heaviest July letting in history and greater than that for any month of this year excepting May. Buildings, and construction other than buildings, both gained 41 per cent in total contracts, comparing last month with July, 1925. Contracts awarded for the United States from January 1 to August 1 were 23 per cent ahead of the same period last year. The construction cost index number is noted at 208.30, a figure 0.2 per cent above July. The gain is due to increased cost of labor. Material prices continue to tend downward in a decline which started six months ago.

Reports are rife in business circles in Fresno that within another week or ten days complete peace will be restored in the building industry. J. G. Martin of the Fresno Lumber Company, president of the Builders' Exchange, gave some substance to the reports by admitting that he was considering issuing a call within the next two or three days for a meeting of his directorate. Asked if the directors would authorize negotiations with the unions who appointed a special committee to seek a settlement, Martin answered non-committally. The unions, acting through the building trades council, several weeks ago sought to break the three months' long deadlock with the employers by withdrawing demands for a wage raise and asking for a conference with a view to renewing the contract of last year, insofar as the major items were concerned.

July bookings of architectural terra cotta, as reported to the Department of Commerce by 27 manufacturers who produced over 95 per cent of the architectural terra cotta made in 1923, were 17,613 tons as compared with 10,581 tons in June, and 10,774 tons in July, 1925.

City of Santa Cruz contemplates the adoption of the city manager form of government. An election will be held shortly to submit the proposal to the voters.

A remarkable increase in the exportation of lumber from the west coast of America during the last year is shown in figures compiled by Abe Marks, manager of the marine department of the San Francisco Chamber of Commerce.

Production of Portland cement amounting to 17,121,000 pounds, reached a new high level in July, while shipments were exceeded only by those of the preceding month and were over 3 per cent greater than the shipments in July, 1925, according to statistics issued by the bureau of mines. Portland cement stocks decreased but were still high and at the end of July were more than 23 per cent greater than on July 31, 1925.

Bids will be considered by the City of Portland, Ore., October 15, to construct the Front Street Intercepting Sewer and Drainage System, a project estimated to cost $1,936,620.

A. G. C. TO HOLD FALL MEET

The fall meeting of the executive board, advisory board, president's council and secretaries' council of the Associated General Contractors of America will be held in Kansas City, Mo., October 4, 5, 6, 7. It is planned to devote the whole of Tuesday, October 5, to sectional meetings, those interested in building construction problems on the one hand, and a separate meeting for the consideration of matters appertaining to highway construction.

ALONG THE LINE

After six months of labor on the part of L. W. Going, chief electric inspector; the electric code committee and representatives of the board of electrical workers, the new electrical code for Portland, Ore., is now completed. The code sells for 50 cents a copy.

R. Roy Cowles, assistant engineer, department of engineering, Pacific Gas & Electric Company and chairman of the technical section of the Pacific Coast Association, will conduct a course in fundamentals of electricity for the University of California, Extension Division. The classes will begin September 16 at 7:30 P. M., Room 315, Oakland City Hall.

Pronouncing it a measure hostile to San Francisco and all Northern California, the San Francisco Chamber of Commerce is on record against the proposed State highway bill, known as initiative measure No. 8 on the forthcoming November ballot. The measure is otherwise known as the "Southern California highway bill," and would supplant the 1-cent gas tax increase generally indorsed by chambers of commerce, automobile associations and the County Supervisors' Association of the State as the best means of completing the State highway program.

The Allied Architects' Association of Los Angeles has filed a libel suit for $150,000 damages against Charles Scribners' Sons, publishers of the magazine Architecture and Elbert C. Martin, author of an article published in the magazine which critized the association. Martin's article is said to have charged that the association resulted in extra costs to patrons and pointed to alleged mistakes in the construction of buildings in Santa Barbara damaged by earthquakes. The article is quoted as saying that "had this work been in the hands of competent architects, several lives would have been saved." The association, an organization of 69 architects, declares in its suit that the article is false.

An ordinance providing for the abandonment of all proceedings calling for so called patent paving is being drawn up by the city attorney's office under instruction from the Los Angeles city council. Projects which will cost several million dollars are involved. Direct cause of the council's action taken in the form of the adoption of a report from the public works committee, was the decision of the circuit court of appeals by which charter provisions concerning license agreements and competitive bidding were upheld. Unless the so called patent paving companies submit new license agreements to conform with the provisions of the charter as interpreted by the court's decision, the new proceedings will call for the concrete or asphalt paving.

TRADE NOTES

Barney Abrahams, 132 Ronada Ave., Piedmont, will operate from 4252 Piedmont Ave., Oakland, under the trade name of Abrahams Tile Company.

Ray Ziegler has purchased the Coalinga Electric Shop at 299 North Fifth St., Coalinga. The business was previously operated by O. J. Meadows.

Completion of a building materials testing laboratory at Santa Barbara by the California Institute of Steel Construction is announced by President Robert P. Miller.

Construction has been started on a plant at Benicia, Solano county, for the River Sand & Gravel Company of San Francisco. The plant will be served by the Southern Pacific Railroad.

Ambursen Dam Company, capitalized at $100,000, has been incorporated in San Francisco. Directors are: E. H. Burroughs, E. D. Bronson Jr., and J. Charleston.

Cleveland Tractor Co., Cleveland, Ohio, has moved its San Francisco offices and warehouse from 1265 Battery street to 1345 Howard street. I. L. Traux is manager of the San Francisco branch.

Electric Steam Radiator Corporation of San Francisco, capitalized at $75,000, has been incorporated. Directors are: J. Wahrhaftig, F. E. Crawford, R. B. Oshier, E. J. Oshier and Edith G. Wharhaftig.

Dunham, Carrigan & Hayden Company, wholesale hardware concern of San Francisco, has leased a structure in Kirkham street between Fifth and Seventh Sts., Oakland, for East Bay office and distributing headquarters. The new plant contains 15,000 square feet of floor space and has spur track facilities.

Massey Concrete Products Co., Chicago, Ill., announces removal of its Pacific Coast headquarters from the Matson Bldg., San Francisco, to 801 Pacific Electric Bldg., 6th and Main Sts., Los Angeles. S. V. Shannon is Western Manager of the company.

Lynn S. Atkinson Jr. of Los Angeles, Guy F. Atkinson of Portland, Ore., C. H. Gorrill and A. W. Gorrill of Oakland, will operate under the firm name of Atkinson Construction Company with headquarters in the Ray Bldg., Oakland.

Sugar Pine Lumber Company of Fresno has called a special meeting of stockholders for October 12 to vote on the proposal to increase the capital stock of the company from $2,500,000 to $5,000,000. The meeting will be held at the company offices, 3100 East Tulare street, Fresno.

Truscon Steel Company, Youngstown, Ohio, has issued a twenty-eight page catalog (revised) on "Truscon Permanent Building Products." Positions of prominence have been given in the book to those products which are particularly adapted for delivery through dealers and Truscon warehouses. Steel Casements, Standard Steel Sash, Steel Basement Windows, Steel Garage Doors, Lintels and Steel Lath and accessories are treated in detail.

Unions Strive To Hold Present Wage Scales And Conditions

desire to retard building but they are going to hold their ground and to maintain to the utmost of their ability the wage scales and conditions which have required so many years and hard efforts to obtain," writes William J. Tracy, executive secretary, Building Trades Department, American Federation of Labor, in the August issue of the Miller Builder-Economist, published by G. L. Miller & Co., nationally known real estate investment bond house.

Mr. Tracy said that the building trades unions were enjoying "a wonderful period of peace and prosperity" and "there is not a single building craftsman in the country who cannot find a job at good wages". His article follows:

"International unions comprising the Building Trades Department have added more than 30,000 new members since the first of the year and are today enjoying a wonderful period of peace and prosperity.

"I cannot recall a time when affairs in the building industry were running more satisfactorily. This applies to both employer and employee. So far as I know, there is not a single building craftsman in the country who cannot find a job at good wages. All wage agreements that expired during the months of May and June have been renewed, and most of them at an increase over last year.

"Building permits indicate that the total for the United States this year will pass the six billion dollar point, the highest ever recorded in the industry. And modern methods of construction, measured by volume, durability, floor space and efficiency of the workers, make building operations today cheaper to the investor than ever before.

"In the southern states there is a greater amount of new building this year than last. There has been no slowing down in Florida with the coming of summer, and the operations there continue on a vast scale. In the Carolinas, Georgia, Alabama, Tennessee, Louisiana and Texas more new structures are under way right now than at any previous time.

"All this means plenty of work and increasing prosperity for that section of the country—a prosperity in which the wage-earners participate in a larger degree than formerly, because they are better organized.

"Out on the Pacific Coast, particularly San Francisco and Los Angeles, where boss contractors, at the urge of big business and the banks, attempted to inaugurate the so-called "American" plan of "Company Unions," open shops and low wages, the building trades unions have successfully weathered the storm and are again writing regular wage contracts.

"The same is true in Chicago, where it was sought to establish the "open" shop under terms of the Landis award. Today the unions have contracts there calling for a higher wage scale than has ever hitherto prevailed. Of course, the reason in each instance is that the building craft unions held their ground and refused to surrender what they had gained through years of struggle.

"The building trades unions have no desire to retard building but they are going to hold their ground and maintain to the utmost of their ability the wage scales and conditions which have required so many years and hard efforts to obtain. Wage reductions are out of the question. Those interests which are clamoring to reduce wages, or opposing reasonable wage advances appear to fail to take into consideration that all of the construction work is now in progress or has been constructed during this period of prosperity in the building industry would be immediately brought down to the level of cheaper construction if wage reductions and low labor costs were to prevail. In order to make any point clear, a building located on a certain plot of ground. On one of four corners, costing anywhere from one million to five million dollars, would only be worth the same amount of money in actual cash as one that cost ten, fifteen or 25 per cent less, if wages of the building trades mechanics were reduced in proportion, hence I fail to see the logic of the financial interests, bankers and others, who at all times seem to insist on low wages and oppose reasonable wage advances.

"Then again the average building is constructed through increased efficiency on the part of labor and through modern building construction methods, in approximately half the time of former years, which in itself gives to the owners of the building an opportunity to get the revenue from the rent of this building and save untold amounts in interest on money that he would of necessity be compelled to borrow.

"All of our jurisdictional troubles are being satisfactorily adjusted, meaning greater solidarity of the building trade unions. Low wages and bad conditions of employment cannot long prevail where the workers of an industry unite their efforts in a forward and upward movement.

"There are today nearly one million organized workers in the building industry of this country. What they receive in wages and spend for the necessaries and luxuries of life—yes, we now enjoy some things that were formerly termed luxuries—are a big factor in keeping the wheels of other industries moving—thus adding to the general prosperity of the nation.

"It seems that some people do not stop to think of this before attacking the unions."

OPTIMISTIC BUSINESS SENTIMENT PREVAILS

"The third quarter of 1926 begins with business sentiment so buoyant that it almost verges on rampant optimism," says Col. Leonard P. Ayres, Vice President of The Cleveland Trust Company.

"Forward ordering is being substituted for hand-to-hand buying," according to Col. Ayres. "Stock prices are advancing on their way to make a double-topped bull market. It is probable that the volume of industrial output in 1926 will exceed that of any previous twelve months' period, and that the industrial profits will be the greatest of any peaceful year. Employment is general; wages are high; credit conditions are easy; the consuming power of the country is enormous; and the agricultural outlook is better than fair.

"Business now is good and it will probably continue high in activity and output until it becomes involved in serious over-production, over-construction and over-expansion of industrial equipment. All this could happen within the space of a few months. The developments of this quarter should indicate whether or not such a prospect is shortly ahead of us."

Corporation May Practice Architects In California—Ruling Of Supreme Court

There is nothing in California statutes to prevent a corporation engaging in the practice of architecture in the opinion of Judge Hartley Shaw of the superior court, who ruled in the case of The People vs. The Allied Architects' Association of Los Angeles that a contract which it has with the county supervisors for architectural service on new buildings for the Los Angeles county general hospital is valid. He held that there is no parallel between the services of an attorney and the services of an architect as contended by the plaintiff, and that the reasons which prevent a corporation practicing law do not apply in the practice of architecture. Moreover the statute regulating the practice of architectural service conditional upon a license, but permits anyone to perform such service provided he notifies his client that he is not a certified architect. It is further pointed out that while the law provides a penalty for failure to give proper notice that architectural service is being performed without a license there is no law by which the offender may be barred from further practice of architecture. Full text of the opinion is printed herewith.—EDITOR.

The People of the State of California, plaintiff, vs. the Allied Architects' Association of Los Angeles, a corporation, defendant. No. 195,910. Opinion.

This is a proceeding in quo warranto in which the plaintiff seeks a judgment that the defendant be excluded from the practice of architecture in the State of California and from the exercise of any and all corporate rights, privileges and franchises therein, and also asks for a temporary injunction to restrain the defendant from proceeding further with the performance of certain contracts which it has made with the county of Los Angeles for the performance of architectural services in connection with the erection of an addition to the county hospital. Defendant has filed a demurrer to the complaint which has been submitted to me with the application for a temporary injunction.

The complaint alleges that the defendant was organized as a co-operative association under the provisions of Sections 653b, 653c and 653d of the Civil Code; that the purposes for which it was formed were, in general, the practice of architecture in connection with the erection of public buildings and the rendition of architectural services for its members, with other incidental powers; that neither its articles of incorporation nor its by-laws require that its members, officers or employes be certified architects under the statute hereinafter referred to; and that defendant has been and now is engaged in the practice of architecture and in particular that it has made several contracts to perform architectural services for the county of Los Angeles, all of which have been completed but one. The uncompleted contract is for architectural service in connection with an acute hospital building for the county of Los Angeles, and it is against the further performance of this contract that a temporary injunction is sought.

Cite Practice of Law

Plaintiff relies upon People vs. Merchants Protective Corporation, 189, Cal. 531, and other cases holding that a corporation cannot practice law and that if it undertakes to do so quo warranto will lie against it. In view of certain other decisions of the supreme court, I have come to the conclusion that the principles on which the cases relating to the practice of law were decided do not apply to the instant case. Those principles, as stated in the case just cited, are: First, that individuals may not generally and as a matter of right associate themselves together for the practice of law, special licenses being required in all cases for the practice of law, and hence the provisions of Section 286 of the Civil Code that corporations may be formed for any purpose for which individuals may lawfully associate themselves confers no right to form a corporation for the practice of law; and, second, that the essential element underlying the relation of attorney and client is that of trust and confidence of the highest degree, growing out of the employment and entering into the performance of every duty which the attorney owes the client in the course of his employment, and that the intervention of a corporation between the client whom it secures and the attorney whom it employs, even though the latter be duly licensed, prevents this relation of trust and confidence from arising.

Taking up the second proposition first, it must be noted that the relation of attorney and client is, as the court says, a relation of trust and confidence of the highest degree. An attorney may be and often is entrusted with his client's most intimate and vital secrets and details of his financial and business affairs, so that a violation by the attorney of his trust will in many cases result in financial ruin and perhaps shame and disgrace for the client. Such a relation is sui generis. If a corporation could enter into this relation it might be, as the court points out, that those in control of its affairs would be without character, learning or standing and the standards of the profession would thereby be degraded, to the great injury of the state. This is not true in the same degree of any other profession, and it is hardly true at all of the practice of architecture.

Licensing of Architects

The law in this state regulating the practice of architecture, after providing for the issuance of certificates entitling architects to practice, declares that it shall be unlawful for any person to practice architecture without a certificate, but adds to this a proviso that "nothing in this act shall prevent any person from making plans for his own buildings, nor furnishing plans or other data for buildings for other persons, provided the person so furnishing such plans or data shall fully inform the person for whom such plans or data are furnished, that he, the person furnishing such plans is not a certified architect."

In ex parte McManus, 151 Cal. 331, the Supreme Court held that this statute is valid against the objection that it discriminates between uncertified architects. The court said:

> "There is no class discrimination as to uncertified architects, but, on the contrary, the act operates uniformly upon all that class. Any one of the class of uncertified architects can practice his profession under the terms of the act—that is, prepare plans and other data for buildings—without rendering himself amenable to punishment, by informing his client or patron that he is not a certified architect. . . . Neither do we preceive how under the act any special privileges or immunities are granted to any of the class of uncertificated architects which are not possessed by or extended to all. That entire class are accorded the privilege and right to practice architecture, provided they inform their patrons that they do not hold certificates, and they are granted immunity from punishment provided they do so."

Thus the act, as construed in this case, does not prevent a natural person from practicing architecture without a certificate, but merely requires him, if he has no certificate, to inform his patrons of that fact; or to follow the language of the court in the case of People vs. Merchants Protective Corporation, individuals may generally and as a matter of right associate themselves together for the practice of architecture, such right not being limited to those who have certificates; and hence the first proposition on which People vs. Merchants Protective Corporation was decided is not applicable here and the defendant was lawfully formed to engage in the practice of architecture.

Corporation Can Make Plans

In Binford vs. Boyd, 178 Cal. 458, this statute again came before the supreme court in an action to recover the amount due to a corporation for plans and specifications prepared by it for the construction of a building for the defendants. These plans were prepared by the corporation in pursuance of contract between it and the defendants to that effect and were made by a duly certified architect who was employed by the corporation for that purpose. The defense was that the contract was void as in contravention of the statute regulating the practice of architecture. The court held the contract lawful, however, saying:

> "Prior to this statute there was no restriction upon the right of any person to contract for or to furnish plans and specifications for another, or to follow the profession of architecture. All persons were at liberty to form corporations for any lawful purpose, and such corporations, when formed, had full capacity and power to make all contracts necessary or convenient for the carrying out of their lawful powers. . . . The terms of

the act show clearly that it was directed only to individuals as distinct from corporations. It requires an examination of the person who applies for license, and its language shows that a license can be given only to human beings and not to artificial creations such as corporations. A corporation could not obtain a license to engage in the profession of architecture, and as it must act wholly by human agency, it could engage in that art or business only by employing individuals who would carry on that business as its officers, agents or employes. The act is effective upon corporations only to this extent, that if it undertakes to do business of that character, either the persons whom it engages therein must be certified architects under this statute, or, when contracting for plans and specifications for the erection of buildings for other persons, such persons must be informed that the plans and specifications will be prepared by someone who is not a certified architect. The act does not prohibit a corporation from contracting to furnish to another person plans and specifications which are to be prepared by a third person who is a certified architect. Nor is there anything in the object of the act or the evil to be removed thereby which would raise the necessary implication that it was intended to prevent such practice."

It appears to me that this decision fully covers the present case and holds that a corporation may practice architecture. Defendant was, therefore, lawfully formed for that purpose and cannot be ousted from the exercise of that privilege.

Penalty Is Limited

The complaint in this case alleges that defendant's articles of incorporation and by-laws do not require its members or employes to be certified architects, but does not charge that they are not in fact certified, or that if any of them are not certified defendant has failed to inform the county of Los Angeles of that fact; and hence for all that appears in the complaint, the defendant may be practicing in an entirely lawful manner. Whether it is so doing or not, the fact remains that the practice of architecture was lawfully open to it, and that it was lawfully formed for that purpose. Should it in fact violate the law by engaging uncertified persons to perform the architectural services for which it has contracted without informing its patrons of the fact, it will be subject to penal prosecution for violation of the statute and its contracts with its patrons will be void, but I know of no law by which the loss of the right to further practice architecture may be inflicted upon it as a penalty for such violation of the statute.

Plaintiff's complaint also alleges that defendant's articles of incorporation were filed in the office of the secretary of state on July 1, 1921, but that defendant has never filed in the office of the county clerk of Los Angeles county, where its principal place of business is located, a copy of its articles of incorporation certified by the secretary of state, as required by Section 296 of the Civil Code, and that, therefore, it is not authorized to transact any business. I do not think the provision of Section 296 to which reference is thus made is applicable to the defendant. In 1921 the statutory mode of organizing corporations was remodeled and substantially changed in several respects. Prior to that time the original articles of incorporation were in all cases filed with the county clerk of the county in which the principal place of business was located, and a certified copy thereof was filed with the secretary of state, upon which, if the name did not conflict with that of other corporations, he issued a certificate of incorporation and the organization of the corporation was then complete (C. C. 296); but the corporation was required to file in every county where it owned property, except that where its original articles were filed, a certified copy of the copy of its articles filed with the secretary of state (C. C. 299). In 1921 this plan was changed so as to require the original articles of incorporation to be filed with the secretary of state and a certified copy thereof to be filed with the county clerk of the county where the principal place of business is located and in every county where the corporation transacts business; and to carry out this change the legislature amended Sections 296, 299 and other sections. These amendments took effect July 29, 1921, while the plaintiff's incorporation was completed under the then existing law on July 1, 1921. The amendment of Section 296 contains the following provision:

> "Upon the filing of articles of corporation, over the great seal secretary of state . . . . the secretary of state must issue to the corporations, over the great seal of the state, a certificate that the original articles containing the required statement of facts have been filed in his office, and thereupon the persons signing the articles and their associates and successors shall be a body politic and corporate . . . .; provided however, that no corporation shall be authorized to transact any business until it shall have filed in the office of the county clerk of the county in which its principal business is to be transacted a copy of the articles of incorporation certified by the secretary of state."

Incorporation Held Valid

Plaintiff claims that this proviso, which was first inserted in the section by this amendment, applies to corporations organized before the amendment took effect and hence to the defendant. In support of this claim, plaintiff contends that the legislature has full power to make such a change of law applicable to existing corporations. This may be conceded, but the question here is whether under a proper construction of the law it has done so. Such a conclusion would be most far reaching in its scope, making it necessary for all corporations previously organized to file such copies of their articles before continuing their business—unless they were organized prior to 1905, Section 299 before that date having required corporations to file in the county where the principal place of business was located, in addition to the original articles, a copy thereof certified by the secretary of state.

The construction of the amendment which plaintiff proposes would give it a retroactive effect. Plaintiff disputes this proposition, but I see no escape from it, for corporations, including defendant, which were fully organized before July 29, 1921, were entitled to do business from the date of organization until July 29, 1921, and on the latter date, if the plaintiff's construction be followed, this existing right was terminated by the amendment. In other words, a corporation which had been fully organized under the law in force at the time, lost its corporate existence, or at least its corporate powers, by the effect of a subsequent law. Such a statute is within this definition of a retrospective law in 5 Cal. Jur. 747: "A retrospective law is one which operates upon matters which occured, or rights and obligations which existed, before the time of enactment." The established rule regarding such statutes is that "no statute or constitutional provision shall be so construed as to give it a retroactive effect, to divest individuals of rights vested previous to its passage, or to affect pending litigation, unless such intent is expressly declared or necessarily implied in the language of the provision to be construed." 5 Cal. Jur. 750. I find no such intent expressed in the amendment of Section 296. Its language indicates rather that it was dealing with corporations whose organization should be thereafter begun. Such corporations would not file their original articles in the county where the principal place of business was located, and to assure persons there doing business with them some local means of ascertaining their corporate existence and powers, the legislature added the proviso requiring a copy of the articles to be filed in the office of the county clerk of the county where the principal place of business is located. No such provision was needed as to corporations previously organized, their original articles already being on file in that office. The word "shall" found in this proviso, while mandatory in meaning, usually refers to the future, and the expression "Shall be authorized" is directed to such authority as may be conferred in the future. It does not cover the case of the defendant, which had already received its authority when the amendment took effect.

For the foregoing reasons the temporary injunction is denied and the demurrer is sustained without leave to amend.

Dated this 29th day of July, 1926.

HARTLEY SHAW, Judge.

(Reprint from Southwest Builder and Contractor, Los Angeles).

U. S. SUES LUMBER FIRM FOR FOREST FIRE DAMAGES

Believed to be the forerunner of a national campaign by the government to collect damages for federal forests burned as the result of carelessness, announcement is made at Sacramento that the $170,000 suit of the government against the Feather River Lumber Company resulting from the destruction of thousands of acres of timber land in the Plumas national forest would be tried at the next session of federal court in the Capitol city.

Victory by the government, it was indicated, will result in more than a score of similar suits being brought against individuals by the government, where timber land is said to have been destructed by carelessness.

The fire, according to government investigators, was started from sparks from an engine of the Feather River company on private lands adjacent to the Plumas national forest. Negligence on the part of employees of the lumber company is charged by the government.

Thousands of acres of valuable timber land are claimed to have been devastated by fire which raged uncontrolled for several days in the summer of 1924.

Jensenite Pavement Saves Fresno County Much Money

Maintenance of the Jensenite type of paved highways in Fresno County for the last five years cost an average of $2.20 a mile, while the maintenance of the Warrenite type of pavement cost the county an average of $8.50 per mile according to a report compiled by County Surveyor Chris P. Jensen. The Jensenite, known as Fresno County type A pavement, has a 1½-inch top, and a three inch asphalt concrete base, while Warrenite is of the five-inch asphalt concrete type.

Jensen's figures show the county realized a large saving through the use of Jensenite type during the fiscal year, ending June 30th. Type two, the Warrenite with a five-inch asphalt concrete base, cost an average of $13.81 a mile for maintenance, while type three, the Jensenite, with a three-inch asphalt concrete base and 1½-inch top cost an average of $3.80 per mile for maintenance. (The exact amount saved has not been figured).

The total cost of road maintenance and also betterment costs and overhead and equipment expenditures for 1925-1926 was $143,254.74, while during the preceding year the cost was $143,758.51.

Costs of the various types are listed in the report as follows:

Type one, hydraulic base, 1½-inch asphalt top, Warrenite-Wallace, 19.78 miles, an average of $72.68 per mile.

Type two, 5-inch asphalt concrete base, Warrenite-Wallace type top, 42.44 miles, average of $326.78 per mile, in which $8,551.10 was spent for road widening.

Type 3, 5-inch asphalt concrete, Fresno County type A, 122.22 miles, average of $56.15 per mile.

Type four, four-inch asphalt concrete, Fresno County type A, 24.84 miles, average of $67.40 a mile.

Type five, gravel roads, oiled surface, 66.82 miles, average of $1,004.22 a mile.

Type six, mountain roads, graded, 134.50 miles, average of $383.51.

Uniform Mortgage Law Sought By National Conference Board

A uniform mortgage act to facilitate interstate dealings in mortgages will be framed for recommendation to the American Bar Association at its next meeting by a special committee just appointed by the National Conference of Commissioners on Uniform State Laws. The conference has framed a tentative model law which is to come under the consideration of the committee for possible changes. Upon approval by the conference, the act will be placed before the Bar Association for its approval and recommendation.

Uniformity of state mortgage law would make the supply of capital between states more liquid, would aid greatly in making clear the title to real property and would prevent the present cumbersome and diverse systems of mortgage foreclosure in the several states, according to the National Association of Real Estate Boards, which, in resolutions adopted at its recent annual convention held at Tulsa, Oklahoma, in June, called on the National Conference and on the American Bar Association to take action to endorse the tentative model act .

A model act looking toward the uniformity of federal tax lien records in the various states has just been endorsed by the American Bar Association upon the recommendation of the National Conference of Commissioners on Uniform State Laws.

The recommended uniform federal tax lien registration act stipulates a definite procedure for filing of notices of liens for taxes payable to the United States and of certificates discharging such liens and looks toward the uniformity of tax lien records in the various states.

The measure would aid in the matter of investigating titles to property and would lead to a more efficient handling of tax lien records throughout the states.

Wood An Important Electric Power Fuel In Oregon State

Wood as a fuel for the production of electric power by public utility power plants is a factor of great importance in Oregon, according to a bulletin just issued by the Geological Survey. In that State during the month of June 18,664,000 kilowatt hours were produced by burning wood, as against only 33,000 kilowatt hours from other fuel sources, and 47,857,000 from water power.

In the State of Washington, wood fuel produced more electric power than all other fuels, the total for wood being 2,581,000 kilowatt hours, against 895,000 for all other fuels. Other states in which wood is an important electric power fuel are Alabama 90,000 kilowatt hours in June; Arkansas 530,000 Florida 150,000; Georgia 329,000; Louisiana 97,000; Minnesota 494,000; Mississippi 93,000; South Carolina 64,000 and Wisconsin 90,000. All the other states produced 2,369,000 kilowatt hours from wood, making a total for the country of 25,551,000.

In some of the forest states, notably Washington and Oregon, the showing for wood as a fuel in the production of electric power for private industries would be more impressive, as the lumber mills and other forest industries in those states frequently provide their own electric power from the combustion of saw-dust, slabs, and other waste from their operations. Wood, however, is used more extensively in domestic heating than for power. Surprisingly enough, about one-third by cubic measure, of all the wood consumed in the United States goes into fuel—about as much as goes into lumber—although only a small proportion of it is suitable for lumber or other industrial uses.

CONSTRUCTION COMPANY PROPOSES NEW BAY BRIDGE

Construction Company of North America with main offices in San Francisco, has filed application with the San Francisco Board of Supervisors seeking a franchise to construct a bridge over San Francisco Bay from Rincon Hill to the Oakland Mole. The cost of construction is estimated at $100,000,000. The bridge would be four and one-half miles in length and would provide tracks for surburban and transcontinental rail lines with a 58-foot highway on the super-imposed deck. The itemized cost of construction is segregated as follows:

Superstructure, $28,750,000; foundations and piers, $35,000,000; deck flooring, lights, signals, etc., $9,000,000; San Francisco terminals, $7,500,000; contingencies, $8,750,000; financing, $11,000,000. Financial plan provides for $60,000,000 of 6 per cent first mortgage bonds and $40,000,000 in preferred stock. It was estimated that the bonds would sell at 90 and the preferred stock at 87½.

SUIT FOLLOWS IN RENTAL OF STEAM SHOVEL

Failure of the Associated Construction Company, builders of the Monte Rio-Freestone unit of the Sonoma county highway system, to return a steam shovel to the White, Brown & Leahy Company of San Francisco, formed the basis of a $17,000.68 suit filed at Santa Rosa against the construction company, the County of Sonoma, a surety company, and seven county officials.

Reimbursement for monthly rental of the steam shovel and other equipment at $700 a month is the biggest item in the long list of damages asked by the San Francisco firm. They also seek payment for loading and shipping the equipment from Boca, on the Truckee river, for depreciation during use, and for failure to return the steam shovel to San Francisco, as asked in the original agreement.

The complaint alleges that the road builders, under contract with the County of Sonoma, agreed to pay a monthly rental for the machinery, to pay for its shipment and upkeep and loading and shipment from Monte Rio after the highway was completed. This, they claim, has not been done.

Defendants named in the suit include the Associated Construction Company, The County of Sonoma, County Clerk W. W. Felt, County Auditor Olney G. Pedigo, County Treasurer James Ramage, Supervisors Blair Hart, Thomas Ferguson, Fred Lowell and Wilfred Cole, and the Southern Surety Company.

SACRAMENTO AWARDED STATE LUMBER MEET

Sacramento has been selected for holding the state convention October 22 and 23 of the California Retail Lumber Dealers' Association. Fred Shaffer, manager of the Los Angeles branch of the Sacramento Chamber of Commerce, made the plea that won approval for Sacramento. San Francisco and Oakland also made bids for the state convention. It is estimated that about 400 delegates will attend the state convention.

ADOPT TRADE NAME

J. O. Rognas and F. L. Warren will operate from 77 O'Farrell street, San Francisco, under the trade name of General Water Heater Sales Company.

D-2179—Grand Junction, Colorado. Organization offers for sale scrap mica for insulating purpases. Can make carload shipments on 10-days' notice.

CARPENTERS FIVE-DAY WEEK IS IN EFFECT AT SAN MATEO

The five-day working week schedule was inaugurated in San Mateo, Aug. 21, according to announcements sent to all contractors by the San Mateo Building Trades Council. The new working schedule will cause no increase in the wage scale as the carpenters will be paid only for the five days instead of for five and one-half as has been the custom.

The five-day plan was adopted to give more constant employment to a larger group of men and in no way will effect building costs in the community. The notice sent out by J. F. Cambiano of the Building Trades Council of San Mateo County, reads as follows:

To All Contractors and Others Interested:

Please be advised of the following changes in the warking rules of the carpenters of San Mateo county:

"Five days a week to take effect August 21, 1926."

Same has been approved by the Bay Counties District Council of Carpenters and the San Mateo Building Trades Council.

This does not affect any changes in wages.

Trusting that we may have your cooperation in this matter we have the honor to remain yours very truly,

SAN MATEO BUILDING TRADES COUNCIL

J. F. Cambiano, Business Agent.

AMERICAN PLAN MEETING FAILS TO BRING DECISION

While nearly fifty members of the Valley Industrial Association met Aug. 19th to outline action toward American Plan activities in Fresno, a difference of opinion developed as to whether the association should start operations along the plan lines, and as a result the labor situation in Fresno still remains unsettled.

Strong arguments for and against any American Plan activities were advanced which resulted in adjournment without a decision.

It is understood that another meeting will be held this week.

Officials of the association refused to give any official meeting information.

Failure of association members to vote to reaffirm their action to introduce the American Plan was taken as an indication that the membership is divided in its opinion. As a result, directors of the Fresno Builders' Exchange will resume meetings with a view to bringing about a settlement.

The exchange directors have met several times since the members of the employers' organization empowered the board to decide on the proposal of dissolution because of the failure of the Fresno Building Trades Council to sign the agreement which expired June 16th.

Officials of the Builders' Exchange also declined to comment as to the probable action of the exchange in view of the Industrial Association meeting.

The building trades council has agreed to sign the agreement without any wage increases for the crafts involved.

NOTICE TO CONTRACTORS

Burlingame Grammar School District

Notice is hereby given that the undersigned trustees of the Burlingame Grammar School District, San Mateo County, Calif., will receive sealed bids **up to the hour of eight (8:00) o'clock P. M., on Monday, the 13th day of September, 1926,** at the Pershing Grammar School, Newlands Avenue, Burlingame, at which said time and place said bids will be publicly opened for the construction of additions to the Howard Avenue and Roosevelt Schools and a five class room frame and concrete school building at Grove and Paloma Streets, Burlingame. Plumbing and heating will be separate contracts.

All bids will be addressed to the Clerk of the said Board of Trustees and must be accompanied by a certified check made payable to the order of aforesaid clerk in amount equal to at least ten (10) per cent of the largest bid so submitted, and no proposal will be considered by said Board unless accompanied by such check.

The said check to be forfeited to said School District, as ascertained and liquidated damages in case the successful bidder fails or refuses to enter into a contract to perform the work, and give satisfactory bonds required, within ten days after the date of the award.

The plans and specifications for said work may be obtained from E. L. and J. E. Norberg, architects, 407 Occidental Avenue, Burlingame.

The said Board of Trustees expressly reserves the right to reject any and all bids. A deposit of $10 required on plans.

Done by the order of the Board of Trustees of the Burlingame Grammar School District, San Mateo County, California.

W. H. EDDY,
Clerk.

NOTICE TO CONTRACTORS

(California Exposition Building—Reno, Nevada)

Sealed bids will be received by Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, **up to 2 o'clock P. M., September 21st, 1926,** said bids then and there to be publicly opened and read for furnishing all plant, materials, and labor required for the erection and completion of the California Building, Nevada Trans-Continental Highways Exposition, Reno, Nevada, in accordance with plans and specifications therefor, copies of which may be obtained upon application to the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California.

Cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

A deposit of twenty-five ($25.00) dollars will be required on plans and specifications, the deposit to be returned immediately upon the return of the plans and specifications to the Division of Architecture at Sacramento, California, in good condition.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

All bids must be addressed to Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, and plainly marked on the envelope: "Proposal for California Building, Nevada Highways Exposition."

STATE DEPARTMENT OF PUBLIC WORKS, DIVISION OF ARCHITECTURE,
GEORGE B. McDOUGALL,
State Architect.
PAUL BAILEY,
Director of Public Works.

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section

M. of Monday, September 13, 1926,** for furnishing and installing complete in boiler plant at the San Joaquin General Hospital, French Camp, California, one water tube boiler with oil burning furnaces and oil burners, stack, breeching, brickwork, and piping, necessary to connect up to present plant equipment, in accordance with specifications, etc., adopted and filed by said Board, August 23, 1926, and to which bidders are particularly referred.

QUANTITY SURVEYOR
Valuation Engineer
ARTHUR PRIDDLE
693 Mission Street, at Third St.
San Francisco, Calif.
Telephone Douglas 8-4-9-3
ACCREDITED APPRAISER

Duplicate plans and specifications may be obtained at the office of the Board of Supervisors upon depositing the sum of $10 to insure the prompt return of same on or before the expiration of seven days.

All bids must be made on forms to be obtained at the office of the Board of Supervisors, and presented in sealed envelopes addressed to the Board of Supervisors, and marked to indicate the work for which bid is submitted.

All proposals must be accompanied by United States Currency or certified check made payable to the chairman of said Board of Supervisors in the sum of 10 per cent of the amount of the bid, or by a bond for such amount, and two bonds, each equal in amount to 50 per cent of the contract price, will be required of the successful bidder.

Also, a third bond must be furnished at the time of acceptance of the work with guarantee as called for under "General Guarantee" in said specifications.

The Board reserves the right to reject any or all bids.

By order of said Board made August 23, 1926.

EUGENE D. GRAHAM,
Clerk.
By S. A. CARTER, Deputy Clerk.

NOTICE TO CONTRACTORS

(Castroville Union Grammar School District)

Notice is hereby given that sealed bids will be received and opened by the Board of Trustees of the Castroville Union Grammar School District, Castroville, California, in the present school building in Castroville, at **7:30 P. M., on the 7th day of September, 1926,** for the erection and completion of a new Grammar School Building to be erected on the site of the present Grammar School Building, in Castroville; all in accordance with plans and specifications prepared for the same by W. H. Weeks, Architect.

Plans and specifications may be seen at the office of the Architect, W. H. Weeks, 369 Pine St., San Francisco, or 1924 Broadway, Oakland, California, or at the office of the Clerk of the Board in Castroville, California.

All bids should be presented on bid forms furnished by the architect.

Each bid must be accompanied by a certified check on some responsible California bank in a sum not less than five (5%) per cent of the amount bid, made payable to the President of the Board of Trustees of the Castroville Union Grammar School District, to be forfeited to the district should the contractor be low bidder and fail to sign up within the specified time and furnish the surety bonds required.

Each bid must be delivered in a sealed envelope and addressed to the Clerk of the Board of Trustees and endorsed:

"Proposal for New Grammar School Building."

The Board reserves the right to reject any or all bids.

(Signed) JOS. F. GAMBETTA,
Secretary.
Castroville Union Grammar School District.

NOTICE TO CONTRACTORS

(Navalencia Union School District)

Notice is hereby given that the Board of Trustees of the Navalencia Union School District, of the City of Navalencia, County of Fresno, State of California, will receive sealed bids for the furnishing of all labor and materials necessary in the erection and completion of a one-story frame addition to present building, including works, according to plans and specifications prepared by Kump & Johnson, architects, of the City of Fresno, and in strict accordance with the bids and alternate bids asked for in specifica-

tions.

Said sealed bids will be received **up to and including 2:30 P. M. of the 4th day of September, 1926,** by the undersigned clerk of the Board, at the offices of the Architects, 532-5 Rowell Bldg., Fresno, California.

Said sealed bids must be accompanied by a certified check or bidder's bond in a sum equal at least to ten per cent (10%) of the total amount of bid to do the work mentioned and made payable to the undersigned clerk of the Board as a guarantee that the bidder will execute proper contracts and bonds in case the contract is awarded to him or them by reason of his or their bid.

Plans and specifications are on file at the offices of the undersigned clerk of the Board, and additional copies may be secured at the office of the district's architects, Kump & Johnson, 532-5 Rowell Bldg., Fresno, California.

All bids to be made out on blank forms furnished by the architects.

The successful bidder will have to give a satisfactory bond in the sum of fifty per cent (50%) covering labor and materials, and an additional twenty-five per cent (25%) bond for faithful performance, as fully set forth in specifications, and ten per cent (10%) maintenance bond at completion of building.

The said Board of Trustees of the Navelencia Union School District, as Owners, reserve the right to reject any and all bids or alternate bids, or any part or parts of any bids and reject the balance thereof, and to waive any informality in any bids or alternates received.

All bids to be addressed to Mr. M. Damkier, Clerk of the Board of Trustees of the Navelencia Union School District.

By order of said Board of Trustees.
M. DAMKIER, Clerk.

NOTICE TO BIDDERS

(Copper Wire—City of Redding)

NOTICE TO CONTRACTORS AND BUILDERS

(Manual Training Buildings — Santa Barbara)

The Board of Education of the Santa Barbara High School District, County of Santa Barbara, California, will receive sealed bids **up to 7 P. M., September 1, 1926,** at the office of the Board of Education, 1235 Chapala St., Santa Barbara, at which time and place said bids will be opened and read in public for furnishing all the required labor and material for the construction, erection and completion of a manual training building to be located facing Nopal Street on the High School site, in accordance with plans and specifications prepared therefor by W. H. Weeks, Architect. Bids will be received separately for each kind of work as follows:

1. General
2. Plumbing.
3. Electric.

A cashier's or certified check or bidder's bond issued by a Surety Company accredited by the Board of Education for an amount not less than ten per cent (10%) of the amount of the bid, shall accompany each proposal, drawn payable to the Board of Education as a guarantee that the bidder will within five days after being informed of the acceptance of his bid enter into a contract with said Board in accordance with said bid and that he will furnish the necessary surety bond, said check or bond to be forfeited to the said Board should the bidder fail to execute contract and furnish bond as above mentioned.

All bids must be made out on forms furnished by the architect. Plans and specifications for all the above work may be seen at the office of the architect, W. H. Weeks, 369 Pine Street, San Francisco, or at the office of the Board of Education, 1235 Chapala St., Santa Barbara. A limited number of plns will be loaned out to bidders upon deposit of $25.00 for each set, said deposit to be refunded to bidder when plans and specifications are returned in good condition.

Said Board of Education reserves the right to reject any or all bids and to waive any informality in any bid received.

By order of the Board of Education of the Santa Barbara High School District, County of Santa Barbara, Calif.

E. CARLOTTA DENGATE,
Clerk.

1926 Edition

San Francisco Building Laws

Ready For Distribution

With the issuance of this 1926 edition, the Building Ordinance Books heretofore published will be obsolete, inasmuch as many sections of the law have been amended and additional sections added.

This 1926 edition contains all revisions and additions to the code up to and including June 1926.

In addition to the Building Laws of San Francisco, the 1926 edition contains the FIRE ORDINANCES as regards the construction industry, the ELECTRICAL ORDINANCES, the SIGN ORDINANCE, the BILLBOARD ORDINANCE and other laws covering regulations concerning the construction interests.

Price $1.00 per copy.

INDUSTRY FAILS TO USE SHORT LENGTH LUMBER

Eighteen wood fabricating industries consume 857,900,000 feet of softwood lumber annually; apply 69.3 per cent of it in lengths under eight feet but purchase only 13.8 per cent in such lengths.

This is one of the striking facts brought out by the study the Forest Products Laboratory has been making of short-lengths in the wood-using industries in connection with American Lumber Standards, says the Research Bureau of the National Lumber Manufacturers Association. The results of the study have just been published as Department of Agriculture Circular 393 under the title "Industrial Outlets for Short-Length Softwood Yard Lumber."

Besides an intensive study of eighteen fabricating industries general data were obtained regarding short-lengths in thirteen other wood using industries and also in the non-wood industrial groups.

Copies of the booklet are being mailed to 3000 softwood lumber manufacturers.

THE CONTRACTORS' ROOM

BUILDING AND ENGINEERING NEWS maintains a Contractors' Room where plans and specifications may be filed by Architects, Engineers and Owners for the convenience of bidders in San Francisco and the Bay Counties.

Architects, Engineers and Owners are invited to forward plans of their projects to BUILDING AND ENGINEERING NEWS. No charge for this service. The plans will be returned in good condition when contract for work is let.

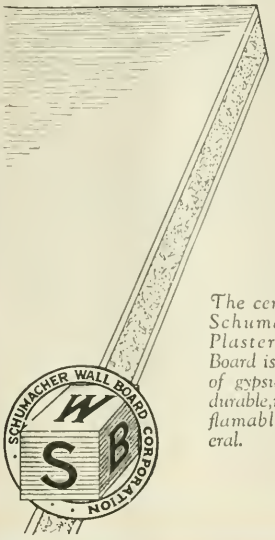
More than a strong smooth wall

a barrier against fire



The center of Schumacher Plaster Wall Board is made of gypsum—a durable, non-inflamable mineral.

IT'S just human nature not to worry about fire—until after it's happened.

But each wall built of Schumacher Plaster Wall Board is a protection against fire. It has center of gypsum—a non-burnable mineral. While you are building a smooth, sturdy wall you are also building a worthy fire wall. Yet this added protection is without extra cost.

ALL GALVANIZED
Standard Steel Buildings

Manufactured and Carried in Stock on the Pacific Coast

COASTEEL Standard Buildings are the first *all galvanized* standard unit steel buildings to come on the market. They are the joint product of three old established companies—years of experience in manufacturing steel, fabricating steel products and erecting steel structures stand behind COASTEEL Buildings.

If you are an engineer, a contractor, an owner or a prospective tenant, you are interested in learning the facts about COASTEEL Standard Buildings.

BUILDING AND LIVING COSTS ARE COMPARED

Of all the different building materials commonly used in the construction of dwelling houses, the wooden shingle has shown the least advance since pre-war years, according to the "Monthly Review of Wholesale Prices of Commodities," issued by the United States Department of Labor. The price index of the most commonly used shingles has advanced only 33.2 since 1913, though some shingles have advanced 69.4 in the same period, and slate roofing 202.7, according to the National Lumber Manufacturers' Association.

Lumber, as a whole, has advanced 81.4 since 1913; common brick, 101.3; cement from 68.4 to 96.6 according to location of the plant; lime, 117.4; sand, 63.5; crushed stone, 94.4, and gravel, 89.4.

All commodities have increased 50.7 in the last 13 years; building materials, as a group, 71.5. The latter figure is apparently not so high as might be inferred, because structural steel, virtually unused in dwelling houses, is included in the average.

In the same period farm products have gone up 40.8; food, 53.6; clothing materials, 73.3; fuel, 77; metals and metal products, 26.2; house furnishing goods, 61.1.

Planing mill of Nicholai-Neppach Company, Portland, Ore., suffered a $50,000 fire loss, August 28. Sparks from a flue were blamed for the blaze.

ELIMINATION OF "SHIRT FRONT" BUILDINGS IS PLEA

Campaigns have been launched in New York by civic beauty organizations and bodies connected with the architectural and structural industries to eliminate two atrocities of modern city building—the "shirt front" syle of architecture and the placing of unsightly pent houses and water tanks on roofs.

A "shirt front" building is one of which only the street elevation is given a finished architectural treatment, the sides and back being of common brick, with no attempt at unification with the front.

Architects who design such buildings claim that it is not from inclination but at the behest of the owner or builder who wished to save money. Those opposed to this building style point out that in skyscraper construction the sides and rear of a building are almost as noticeable as the front and therefore the rough finish of these walls detracts from the beauty of the building and also of the surroundings.

The modern trend in high structures among builders with an eye for beauty as well as utility is to treat the entire building as a unit, of which the four sides have an equal value, rather than as a pile of masonry with only a fine face. In order to achieve this unity and also to give a more pleasing appearance to sheer walls of buildings in which it is not practicable to place windows, shaded brick often is used to create the impression of windows, niches and set design.

The ugly roof structures, which make the skyline of many cities appear as seas of water tanks and packing boxes, have come in for vigorous condemnation, particularly by city beautiful organizations. And here, the clever architect, aided by a builder who believes the beauty achieved is worth the money expended, is coming to the rescue.

In many modern buildings these unsightly structures are so placed as to form an integral part of the building unit, in other words, placed inside and surrounded by a roof. Skyscrapers of the old style largely were packing box affairs, with a flat roof surrounded by a gigantic cornice and surrounded by small service structures. The upbuilding of roofs over penthouses and water tanks and smoke stacks gradually is eliminating this style of architecture and resulting in structures of pleasing proportions from the base to the top.

AMERICAN PLAN SECRETARY AT FRESNO RESIGNS

Rumors of dissension between officials of the Valley Industrial Association crystallized with the resignation of Guy Barrack as secretary of the organization, it is learned. William Stranahan, former city commissioner of public works at Fresno, succeeds Barrack.

It has been reported that Barrack and J. W. Hunt of the industrial association, had disagreed, though whether it was merely personal disagreement or a difference in opinion on policies could not be learned. Barrack, when asked specifically, declined to comment on his reasons for resigning his post.

MUNICIPAL LIGHT PLANTS PROSPER

SACRAMENTO, Aug. 15.—The 22 municipally owned electric light plants in California did a $13,000,000 business last year at a profit of about $3,666,000. This was revealed in the annual report of municipal and county financial transactions made public by Ray L. Riley, state controller.

Total ordinary receipts of the 22 municipal plants aggregated $12,986,000, the report shows, while the 1925 expenditure, including interest and redemption of bonds, administration and collection expenses, operating and maintenance expense, purchase of current and other ordinary expenses, amounted to $9,319,999. An aggregate of $1,878,506, derived either from operating revenue or sale of bonds, was invested in plant improvements. Deposits made by consumers totaled $181,922 and deposits refunded $121,315.

Only six of the twenty-two municipalities in the electric light business generate their own current. They are Los Angeles, Pasadena, Alameda, Riverside, Palo Alto and Avalon. The others, which buy electricity wholesale and retail it to consumers are Glendale, Anaheim, Santa Clara, Lodi, Roseville, Colton, Burbank, Redding, Azusa, Healdsburg, Uklah, Lompoc, Banning, Gridley, Biggs and Tehachapi.

By far the largest of the municipal dealers in light and power is Los Angeles, where the revenue last year totaled $9,209,101 as against expenses of $7,105,260. Consumers there at the end of the fiscal year numbered 207,746 and the plant and system were valued at $39,256,861.

At the other extreme is Biggs, with 160 consumers and less than $11,000 capital invested. This Butte county municipality's light revenue last year totaled $5765 as against expenses of $3999.

S. F. PERMITS IN AUGUST TOTAL $4,163,510

Building activities in San Francisco for the month of August represent an expenditure of $4,163,510, according to John P. Horgan, chief inspector of Buildings of the Department of Public Works. During the month 862 permits were issued. No large projects were listed among the activities of the month.

Following is a segregated report of the August operations as compiled by the Department of Public Works:

Class	No. of Permits	Est. Cost
"A"	2	$300,000
"B"	1	250,000
"C"	19	601,402
Frames	371	1,725,127
Alterations	468	1,066,161
Public Bldgs.	1	220,820
TOTAL		$4,163,510

August, 1925, activities totaled 939 permits, the valuation being $3,840,076.

July, 1926 operations totaled 864 permits, the valuation being $3,556,069.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Edwin M. Doherty, state corporation commissioner, has resigned to accept a position with a San Francisco bank.

A total of 13,826 gross tons of steel railroad ties were manufactured in the United States during 1925; 87,964,517 timber ties were purchased by Class I railroads during that year.

E. C. Baker Construction Company of San Francisco has been incorporated with a capital stock of $250,000. Directors are: E. C. Baker, C. R. McQuestion, V. W. Houghton, M. Robb and H. J. Melby.

Holbrook, Merrill & Stetson, plumbing supply house of San Francisco, have been granted a building permit by the Sacramento city council to erect a structure, 80 by 160 feet, at 20th and R streets, that city, to house offices and distributing quarters.

Philippine mahogany is not mahogany according to the Federal Trade Commission which has issued "cease and desist" orders against its being handled under that name. The commission found the wood wasn't known as mahogany in its native wilds. The case will be appealed.

Bear River Orchards Company is taking bids to construct a circular reinforced concrete dam in Nevada county, about ten miles north of Auburn on the Grass Valley Highway. Will be approximately 162 feet long and about 25 to 30 feet high, impounding approximately ten million gallons of water. Plans for the project are obtainable from D. L. Jungck Company, 2135 Center Street, Berkeley.

Statistics of hydraulic cements, other than Portland cement, in 1925 in which are grouped masonry, natural, and puzzolan cements, as compiled by the Bureau of Mines, Department of Commerce, show an increase in quantity of over 23 per cent, and in value of over 27 per cent as compared with the output in 1924. The output has been expressed in terms of 376-pound barrels to correspond with the statistics of Portland cement.

Misconduct on the part of the trial judge and errors in the introduction of certain testimony by the prosecution are charged in a brief filed at Los Angeles in the appeal of Paul F. Mahoney, contractor, from his conviction of manslaughter in connection with the collapse of a grandstand in Pasadena last New Year's day, which resulted in several deaths. Mahoney was sentenced to from one to ten years in prison but filed notice of appeal.

August building records in Sacramento were broken by approximately $7000 when a total of $662,286 was recorded last month. Two hundred seventeen building permits were issued during the month. The August, 1925, total was $655,454. Sixty-one housing permits represented $238,800 and included fifty-nine single family dwellings costing $210,800 and an apartment house valued at $23,500. The $300,000 State motor vehicle department building also included in last month's total.

The exports of iron and steel products to the Far East for the January-June period of 1926 recorded gains over the corresponding period in 1925 to all countries, except China and even there the loss was small, according to the Department of Commerce. Total exports to the Far East for the first six months of this year amounted to 233,399 gross tons, compared with 133,531 tons for the same period of last year, representing a 75% increase.

During the first 24 days of August, 1926, the Los Angeles city building department issued 2394 permits with an estimated valuation of $7,569,246. For the corresponding period in July the number of permits issued was 2343 with an estimated valuation of $12,399,338, and for the first 24 days of August, 1925, the number of permits was 2768 and the estimated valuation was $8,438,481. If the ratio for the first 24 days of August, 1926, is maintained throughout the total for the month will be between nine and ten million dollars. For the current year up to and including August 24 Los Angeles' building total was $84,857,417, as compared with $102,912,834 for the corresponding period last year.

According to Concrete and Constructural Engineering, London, there was recently held in Mosman, New South Wales, a public demonstration of a new method of concrete pipe-laying. A trench was prepared in which was placed a long rubber tube, 30 feet long connected by pipes with a motor and inflated under pressure until it reached the diameter decided upon—in this instance it was 14 inches. Concrete was then shoveled into the trench and tamped around the rubber core. The core was allowed to remain until the concrete had set, and was then deflated and withdrawn without difficulty, and another 30-ft. section added. The method is a Japanese invention and is reported to be extensively used in the Orient.

Massillon Steel Joist Company of Canton, Ohio, announces the completion of an extreme fire test by the Pittsburgh Testing Laboratory on a standard Massillon Bar Joist Floor Panel. In making the test the standard floor panel was built over an oil-fired furnace, thermo-couples were imbedded at 14 points in the air space surrounding the joists and directly under the panel. The furnace temperature was rapidly raised to 1800F and this temperature held to the completion of the test—4 hours and 28 minutes. The slab was fully loaded to its designed rating, 125 lbs. per sq. ft. Deflection and temperature readings were taken at 10 minute intervals throughout the test. An eight page pamphlet describing the results of the test will be furnished by the Massillon Company on request.

During the year from May 15, 1924, to May 15, 1925, the average hourly wage rate for building mechanics increased 3.9 per cent according to the Bureau of Labor Statistics. The average hourly rate of both the skilled and common laborers one year ago was $1.199. The average rates per hour on May 15, 1925, for the major trades were as follows: Plasterers, $1.485; bricklayers, $1.475; slate and tile roofers, $1.419; stone masons, $1.401; lathers, $1.398; tile layers, $1.325; elevator constructors, $1.312; plumbers, $1.281; inside wiremen, $1.272; steam fitters, $1.271; structural iron workers, $1.271; marble settlers, $1.268; hoisting engineers, $1.265; cement finishers, $1.238; painters, $1.232; ornamental iron workers, $1.23; glaziers, $1.222; mosaic and terrazzo workers, $1.215; sheet metal workers, $1.209; carpenters, $1.184; asbestos workers, $1.165; composition roofers, $1.165; plasterers laborers, $1.00; plumbers laborers $.954; building laborers, $.77.

ALONG THE LINE

W. H. Weeks, San Francisco architect, has opened a branch office in the Burrell Building, San Jose. A branch office is also located at 1924 Broadway, Oakland.

A. J. Hurley, city building inspector of Richmond, reports the issuance of 85 building permits in August for improvements costing $133,495. August, 1925, activities totaled $65,118.

A builders' bureau of the Alhambra Business Men's Association has been organized to assist the builders of that city in the solution of various problems confronting the construction industry.

Robert Proctor, city superintendent of Buildings at Seattle, has submitted his resignation, effective Sept. 15. "I have no definite plans for the future," Proctor announced when submitting the resignation.

By unanimous vote the board of public works of Los Angeles voted to place the inspector of public works under the supervision of the city engineer. Heretofore the inspector has reported directly to the board of public works.

Declaring that George C. Stowell, until recently in the building contracting business in Menlo Park, absconded and disappeared with approximately $8000 of his assets, Menlo Park creditors of Stowell have petitioned federal court to adjudge Stowell an involuntary bankrupt.

R. W. Chrouch, secretary of the California Reinforcing Steel Institute, has established southern headquarters in the W. M. Garland Bldg., Los Angeles. Northern headquarters of the Institute are at 311 New Call Bldg., San Francisco. Mr. Chrouch was formerly secretary of the Fresno Builders' Exchange and during his connection with that organization did much constructive work for the building industry of Fresno. He brings to his new position valuable experience and a wide knowledge of the industry.

Harland Bartholomew, noted city planner, has been retained by the city of Glendale to prepare a comprehensive plan for the future development of that city. He will be paid $18,000 for his services in two annual installments. Glendale hopes by this plan to solve its traffic, zoning, public recreation and other civic development problems.

Charles R. Blood, whose resignation as assistant maintenance engineer of the state highway commission was recently announced, will be appointed September 1st to fill the vacancy in the Sacramento city engineering department caused by the elevation of Samuel A. Hart to the position of assistant city engineer. The latter position was left vacant by the recent resignation of J. E. Tempest.

TRADE NOTES

Warehouse quarters of Red River Lumber Company at Redding, Shasta county, suffered a $25,000 fire loss Aug. 30.

L. R. Penhallegon, Pacific Coast distributor for the Burnham Boiler Corp., announces the introduction of the Burnham "Swas-teeka" water tube type steam and hot water boiler. The boiler was tested over a period of three years before being placed on the market. Among the special features are the double-shaker grates, big fire-box doors, separate clean-out doors for each flue and short tie-bolt construction. The operating parts are all on the front and automatic draft doors are on the back, out of the way.

RENO CONTEMPLATES A NEW PLUMBING ORDINANCE

An ordinance providing for a municipal board of plumbing examiners, similar in nature to proposed measures turned down by the council as unconstitutional, has been submitted to the Reno (Nevada) City Council by the master plumbers and journeymen plumbers of Reno. The measure would force master plumbers and journeymen plumbers to submit to examinations at the hands of the examiners, licenses to issue only upon the passage of such examinations.

The board, according to the provisions of the measure would be made up of the city health officer, the city plumbing inspector, a master plumber of not less than five years' experience and a journeyman plumber of not less than five years' experience, the mayor to appoint the latter two subject to the approval of the council, the terms of the members to continue until the next municipal election. Members of the board would receive no compensation and the fees collected for licenses would be used in paying the expense of the administration.

The proposed measure provides that within sixty days after the adoption of the ordinance, master plumbers and journeyman plumbers actually engaged in business as such at the time of its adoption may procure licenses upon payment of the fees without examinations but those applying after sixty days will be required to take the examination.

A schedule is proposed of $10 for master plumbers and $2 for journeymen with an annual renewal fee of $5 for the master plumbers and $1 for journeymen.

Most Curiously Shaped Buildings in N. Y. City

Some of the most curiously shaped buildings in the world are located in New York without one of them being planned as a freak.

This condition arises from their having been planned according to streets, which originally were laid along twisting roads or Indian trails.

The Flatiron building is the best known, with its knife like edge facing north while the southern exposure is widened in the space between converging streets. Broadway has a similar shaped building every few blocks up to Times Square.

Broadway bisects Manhattan Island from the southeast corner to the northwest. The remainder of the main streets are laid out in rectangular squares, which cause the odd-shaped lots to appear at each intersection.

Times Square itself is formed by a junction of this sort, and is anything but square, being rather more the shape of a diamond, as Broadway crosses Seventh avenue there from the east and then turns north.

An apartment house located at Riverside Drive and 116th street is built of a long curve to the latter street, which makes the building a triangle with one side "ballooned" outward. The building across 116th street, a companion to this one, is built with the curve inward. If the street could be removed and the two buildings joined they would dovetail.

The new buildings, in conforming with the building laws, also have created a sky-line which in the case of each building is beautiful but seldom noticed above the street.

The buildings above the 16th or 20th stories are pyramided to allow as much light as possible on the street, but the streets are so narrow that no proper perspective can be obtained to view the upper portions.

One of the few buildings not so hidden is the American Radiator building south of the Public Library grounds. This tower is done in orange and black stone, each insert of the pyramid marked so that when the tower is illuminated at night it has the appearance of a great pile of coals.

Santa Barbara Trades Will Withdraw Demand For Increases

Settlement of a wage scale increase recently asked by five union labor crafts is scheduled for the Santa Barbara Building Trades Council, with indications that the demand will be withdrawn.

According to a member of the Santa Barbara Builders' Exchange committee in charge of negotiating with the crafts demanding the raises, the only probably change will be increasing the scale for building laborers from $4.50 to $5 a day, which a majority of contractors are already paying.

Increases of $1 a day were asked by the building laborers, sheet metal workers, iron workers, stone masons and hod carriers on May 1, effective 90 days from that date, or August 1. When the time was up, it was mutually agreed to suspend the edict until negotiations were completed.

The crafts gave no reason for requesting the raise, while members of the Builders Exchange, most vitally affected, asserted there were many reasons why it should not be granted.

One exchange member states that he has conferred with three banke in Santa Barbara, officers of which stated that building costs already are too high and that this is due chiefly to the present labor wage scales. Any increase would work a serious hardship on the financing of future building operations, he was told.

"I doubt if anything will come of the present request," the exchange member asserted. "We have recommended that the building laborers be given a minimum of $5 a day, and most of the contractors pay this already. I doubt if increases will be granted any other crafts, or even that they will be requested.'

Construction Demand Continues

Business forecasters have been making much lately of the "falling off in building" during July and the beginning of August. They have been professing to find in this recession the only unfavorable indication in the outlook for future business. Building, they all assume, is a basic industry in that it is preliminary to all other production, and therefore when building falls off it is a fair presumption that the demand for increasing production is slackening. This is good enough logic, but it is a question whether the statistics on which the present concern is based have been sufficiently analyzed. It is true that during July and August there was a falling off in residential building, both from previous months of this year and from the same months last year. On the other hand there is not yet in sight any perceptible falling off in engineering construction or in building construction other than residential. It will be remembered that at the beginning of the year it was felt that the continued increase in construction could not persist and that there would have to be a break some time during the year. It was freely predicted by a number of authorities that the break would come about July. It is quite possible that these "hunches" of breaks in construction are back of the general impression that building is falling off. Increasing residential demand would merely indicate a continued failure to supply the higher living standards that prosperity has brought, but residential building may become saturated and prosperity still continue. General engineering construction, however, and building construction other than residential indicate a basic demand for manufacturing and producing necessities which augur well for future production of general commodities. So far, at least, that demand has not apparently slackened and until it does show some signs of slackening one need not be too much concerned about the immediate business future.—Engineering News-Record.

Carquinez Straits Bridge Franchise Refused Third Time

The supervisors of Contra Costa County have denied the third application filed in the past few years by the Northern California Development Company for a franchise to construct a bridge across Carquinez Straits from Eckley to Dillon Point.

Attorneys for the petitioning company announced their intention to seek a writ of mandate from the state supreme court ordering the supervisors to submit the bridge question to vote of the people as an initiative measure. The company had filed a petition containing 6000 signatures of citizens favoring the bridge.

Two protests were filed against granting of the franchise. One came from the American Toll Bridge Company, now building a bridge across the straits which is to be completed next Spring. The other protest was voiced by Hans Miller, as a citizen and taxpayer of Crockett. It was brought out in the hearing that Miller is an employee of the Rodeo Vallejo Ferry Co.

Both protests included seventeen points of objection to the proposed bridge. The important ones were:

That the bridge now being built across the straits at Crockett will be able to handle all traffic for the next twenty years; that one bridge handling all of the traffic will enjoy more business and will therefore be able to give lower rates; that if the second bridge is given a franchise it will jeopardize the investment of stockholders in the Carquinez bridge; that investments in the second bridge would not be secure.

It was pointed out by Sidney Taylor, San Francisco industrial engineer, who appeared as a witness for the company, that the development company has made a thorough and scientific investigation and survey of the problem and believes there is need for the bridge backing up their belief with the intention of investing $3,000,000.

Taylor pointed out that this section of California is growing and developing very rapidly and that the building of bridges to relieve traffic congestion and eliminate water barriers will hasten this development faster than anything else. He predicted that a third bridge from Martinez to Benicia would be built within a few years.

Reservations Being Made For All-Western Road Exhibition

National, state, county and municipal road officials from all parts of the United States and Canada will attend the second All-Western Road Show, to be held here October 7 to 15, inclusive; president Tracy W. Harron, of the highway exposition committee announcing the receipt to date of several hundred inquiries and hotel reservations from officials and highway experts.

In addition to the road officers and commissioners, the Road Show committee expects a tremendous attendance of contractors, engineers and gravel producers, and everybody interested in the construction of highways, streets, bridges, dams, sewers, foundations and general construction projects, irrigation, tunnel and railroad construction, hauling and bus transportation.

Close to one million square feet of space on the Marina, overlooking San Francisco Bay, and within ten minutes of the downtown business section of the city, will be utilized for the four great circus tents in which numerous exhibits are to be housed, and a spacious demonstration field for testing equipment and apparatus. The show is expected to provide a complete display of machinery and equipment of the latest design, illustrating the last word in modern methods and engineering, as applied to the needs of the construction industry in the eleven western states.

During the week of the Road Show several conventions and conferences are to be held here of road officials, county and state engineers, manufacturers and distributors of road-making machinery, and other groups identified with highway construction.

Practically all space for the show has been disposed of, according to executive secretary P. H. Curtis, who has established headquarters at 625 Market St., in advance of the October highway exposition.

Wild Building Practices

An experienced contractor recently put the question, "What do you consider the outstanding evil of the contracting profession?" And the answer was unanimous among those present, "The contractor and his wild bidding practices and unbusinesslike methods of arriving at a figure."

Prominent among those who are responsible for this condition is the gambling contractor—the one who thinks that he can build for a certain figure because the other fellow has named some such amount, and who arrives at his bid without a semblance of consideration of costs. With this gambler goes the one who bets that he can get by under a contract which is almost certain destruction on its face. A recent private letting brought out bids from six local and two outside contractors. Practically every one of the local contractors had previously been severely burned in trying to execute a contract exactly like that submitted for their signature at this letting. Yet they rushed at the job and any one of the eight would have signed up for all of the agonies which the contract unquestionably involves for the man who gets it.

Equally prominent among the contractors to the present state of affairs is the egomaniac who thinks he can corner the construction market for the year. He has seen the same thing tried time after time by his predecessors but can't quite face the facts of the other fellow's disastrous experience in the same attempt.

With these two goes the fellow who adheres to the creed that the contractor must contract, be it ever so painful. He has to keep his organization together; he has to keep his hand in, or the other fellow will forget that he is in the game and will leave him out of consideration if ever a contract does come along in which there is a chance for an actual profit.

In the past we have had considerable to say about the occasionally unfriendly or unreasonable engineer or architect. We have criticized statutes, plans and specifications which impose what we have regarded and still regard as inequitable burdens upon the contractor. We have spoken frankly against the bond evil. We have even deplored the inclemencies of the weather which has seemed at times to conspire against construction.

But in the last analysis we are inclined to agree with the verdict that the outstanding evil in the construction industry is the contractor who bids without recognition of ordinary common sense.—From the Central Constructor.

RENO MASTER PAINTERS REJECT WAGE DEMANDS

Demands of the painters and decorators unions of Reno, Nevada, for $10 a day and a five-day week have been rejected by the Master Painters' Association, it is announced by A. A. Brundidge, secretary, and O. R. McGinty, officials of the association, who added that efforts of the Nevada Highways Exposition board of governors to effect a compromise in the situation had proved futile.

The demand was made some time ago and, according to McGinty, the master painters asked that the union painters consider a proposal of compromise. The painters' union, however, Mr. McGinty said today, declined the suggestion.

On August 24, the president of the board of governors of the exposition wrote to the painters' union claiming an agreement between the union and the board of governors to the effect that no change in present hours or wages should take place until after the close of the exposition.

The new scale of wages and working hours is to become effective on September 8, it is understood. Officials of the painters' union could not be reached this afternoon. The union painters are now receiving $9 a day for a five and one-half day week.

FIVE SANTA BARBARA UNIONS WILL DEMAND INCREASES

Members of the five union crafts which have demanded raises of $1 a day, refused to withdraw their demand at a meeting of the Building Trades Council called to discuss an amicable settlement.

It had been predicted before the meeting that the wage question would be settled, but officials reported afterward that no decision is forthcoming at the present time.

Committees from the crafts have been conferring with the industrial committee of the Santa Barbara Builders' Exchange for several weeks, and it was understood that an agreement had been reached whereby the wage raise would be withdrawn and that the building laborers would be granted increases from $4.50 to $5 a day, a price already paid by most contractors.

The crafts asking the raise are building laborers, sheet metal workers, iron workers, stone masons and hod carriers. The increase was to have been effective August 1, but it was withheld until an agreement could be reached with the contractors.

Requests for additional information should be made to the Business Opportunities Department. Such requests must be accompanied by the Index Number of each opportunity.

10655—Ghent, Belgium. Established importer and exporter wishes to act as buying agent for San Francisco houses. References supplied.

10658—Hamburg, Germany. Firm is seeking agency for California concerns. Is willing to sell California goods in Germany and to act as buyer of German goods for firms here.

10660—Chemnitz, Saxony, Germany. Manufacturer of tonguing and grooving machine desires representative in San Francisco.

10662—Havana, Cuba. Firm of manufacturers' agents wishes to secure connections with San Francisco concerns.

10665 — Matanzas, Cuba. Broker is seeking commercial connections with San Francisco firms, in all lines.

10666—Havana, Cuba. Firm wishes to represent San Francisco houses in Cuba.

10668—Cienfugos, Cuba. Firm with selling agents in all principal cities of Cuba wishes exclusive representations for San Francisco firms.

D-2181 — Los Angeles, Calif. Firm wishes to buy one gallon used cans, of the kind used for canning fruit. Will buy in carload lots, F. O. B. San Francisco.

D-2182—San Francisco, Calif. Gentleman wishes to get in touch with firms desiring representation in the Southern States.

D-2183—Quartz Mountain, Nevada. Townsite association advises that there is an excellent opportunity for establishing lumber yard, to supply mines with mine timber and town with building material, which are badly needed.

STATE FAIR WILL OPEN SATURDAY

$3,000,000 Worth of Products Expected

SACRAMENTO, Aug. 30—California's seventy-second annual State fair will open here September 4 for eight days of exhibits and entertainment. Products valued at $3,000,000 will be on display, and approximately $100,000 will be awarded in prizes and premiums.

A feature of the eight day program will be the dedication of a new $200,000 grand stand and automobile show building, scheduled for the afternoon of September 5. Another high point will be the celebration of Admission Day, September 9, when about 5000 Native Sons and Daughters of California are expected to visit Sacramento.

Thirty counties will participate in the display of deciduous and citrus fruits.

In the educational building will be exhibits from fourteen counties, as well as from scores of individual schools; the live stock and poultry barns will have a million dollars worth of choice stock; in the horse show 250 prize winners from the Pacific Coast and Eastern stables will compete for ribbons; the art gallery will hang paintings and etchings valued at $125,000; the industrial building will have every foot of space taken, and the farm machinery section will be an exposition in itself.

Other entertainment features will include races, a rodeo and circus.

"Special Days" announced by Secretary Charles W. Paine include a California Press day, when newspaper men of California will be guests of Governor Richardson and the State fair directors; California day and Rotary and Farm Bureau day.—San Francisco Chronicle, August 31st, 1926.

MRS. SANDY and Sandy hope.
TO ATTEND the State Fair.
AT SACRAMENTO.
AS WELL as "Builders' Day."
AT SANTA Cruz.
THE STATE Fair begins.
ON SEPTEMBER 4th.
ENDS ON September 11th.
"BUILDERS' DAY" opens.
ON SEPTEMBER 4th.
AND CLOSES September 6th.
SANDY HAPPENED.
TO ORIGINATE "Builders' Day."
SOME SEVEN years ago.
BUT THE State Fair.
STARTED ABOUT 1850.
BOTH ARE California institutions.
AND SANDY Pratt, producer.
OF CLEAN, sharp sand.
AND CLEAN rock and gravel.
IS FOR anything Californian.
SANDY WILL guarantee you,
A GOOD time.
AT BOTH celebrations,
AND ON September 9th.
ALL THE Native Sons.
OF CALIFORNIA (and Iowa).
WILL PARADE in Sacramento.
SANDY IS a native son.
BORN AT Tulare City.
AND SANDY has reservations.
AT THE Hotel Senator.
AND THE horse show.
AT THE fair.
FOR SEPTEMBER 9th.
"I THANK you."

Six Billion Dollars A Year For Construction Is Estimate

Six billion dollars is a reasonable estimate of what the nation is spending for construction each year according to John M. Gries, Chief of the Division of Building and Housing, in a survey published in the new Department of Commerce Yearbook.

In spite of the magnitude of this program, according to Dr. Gries, it is only recently that the building of houses and construction of buildings, roads, canals, bridges, railroads, harbor works, subways, tunnels, water-supply systems, and other work that produces a more or less fixed structure or alteration of the natural topography, have been clearly recognized as a single industry.

The importance of the construction industry is hard to overemphasize. In value of product it ranks considerably above the automobile industry, the largest manufacturing industry, and about on a par with railway operating receipts. Variations in construction activity from year to year have a large share in determining the prosperity of other major industries such as railways and lumber mills. Construction affects scores of manufacturing industries, and bears some relation to retail trade and to the individual incomes of practically every family in the country.

Existing construction underlies the whole economic organization of the country. The production of its manufacturing industries is carried on mainly in buildings, of course, but depends even more on the physical network of railways, highways, telephone and telegraph systems, and lines for the transmission of power and water, all of which are in large measure the products of construction. Living standards of the people depend very largely on the character of dwellings, on the availability of water, sewerage, gas and electricity, and the accessibility of varied recreational facilities, and on the streets and roads which enable them to get from place to place. There is a measurable relation between the character of dwellings and health. The schools require a great number of buildings in order to do their work effectively.

The volume and character of new construction is of great importance. The million and a half to two million increase in population each year requires new dwellings, increased manufacturing facilities, and increased public utilities and other types of construction. Structures worn out or destroyed must be replaced. If living standards are to improve and people are to occupy better houses, continued large construction programs are needed. Some types of construction add to the productivity of industry. In general, progress depends largely on the Nation's devoting a due proportion of its energies to construction.

As Secretary Hoover has stated, "our national savings are accumulating at an unparalleled rate, and it is especially desirable to have them invested now in domestic permanent capital improvements which contribute directly to the well-being of our people, for by such devotion of our savings we both encourage thrift and raise the standard of living."

Probably half the construction in the United States today, measured in value, is less than 30 years old, and another 30 years hence a backward look to the present is likely to show a similar situation.

FIVE DAY WEEK REPORTED DYING SLOWLY

The five-day week is dying hard, but justly. Its supporters have based their stand on the empty theory that if you, I and the other fellow do just a little bit less work, there will be tasks enough for all and none need to fear the possibility of unemployment. This short-sighted theory might be termed a race between the dollar mark and the time clock with a handicap on the latter. The veriest simpleton knows that under such a system some group must pay—and in this case the contractor hiring the men is the first to do so. To him it means a boost in wages, which in turn leads to exhorbitant prices exacted from the buying public, the second to pay. The five-day week places Saturday among the holidays, when work done must be paid for at double time. It shortens the working year by 26 days or more than a working month. During the rush season the mechanic could, if he chose, take off two days of the week and then work Saturday and Sunday at double time. Where, indeed, is the contractor or the company who could tolerate such extravagence, such evident unfairness. With the present shortage of mechanics in a great many trades, the initiation of the five day week into any industry would produce nothing short of a serious industrial situation.—(Bulletin, Natl. Ass'n. Bldg. Trades Employers).

Official Proposals

CALL FOR BIDS

(Reedley Joint Union High School District)

The Board of Trustees of the Reedley Joint Union High School District invites bids on the following:

(1) One electric test bench for instruction purposes. Specifications may be obtained from Mr. Donald Fair, instructor in auto mechanics, Reedley High School.

(2) Apparatus for laboratory work in first year college physics Lists may be obtained from Mr. Ralph A. Jack, instructor in Physics, Reedley high School.

(3) One Ford touring car. Quotations for the above must be filed with Dr. E. W. Hauck, Principal of the High School, not later than Saturday, September 11, 1926, at five p. m.

The Board reserves the right to accept or reject any or all bids, or parts of bids, or to purchase additional supplies of all items quoted.

Reedley Joint Union High School.
J. J. EYMANN,, Secretary.

NOTICE TO CONTRACTORS

(Berryessa School District)

Notice is hereby given that sealed bids will be received and opened by the Board of Trustees of the Berryessa School District of Santa Clara County, State of California, in the present Grammar School Building, **at 7:30 P. M. on the 14th day of September, 1926,** for the erection and completion of a Grammar School building in the Berryessa School District, all in accordance with plans and specifications prepared for the same by W. H. Weeks, Architect.

Bids will be received on the work as follows:

General Contract.
Electric Wiring.
Electric Heaters.

Plans and specifications may be seen at the office of the Architect, W. H. Weeks, 369 Pine St., San Francisco, or 1924 Broadway, Oakland, California, or at the office of the Clerk of the Board in the Berryessa School District.

All bids should be presented on bid forms furnished by the Architect. Each bid must be accompanied by a certified check on some responsible California Bank in a sum not less than five (5%) per cent of the amount bid, made payable to the President of the Board of Trustees of the Berryessa School District for the propose stated in specifications.

Each bid must be delivered in sealed envelope, and addressed to Clerk of the Board of Trustees, and endorsed:

"Proposal for new School Building."

The Board reserves the right to reject any and all bids.

J. C. Vennum,
Clerk of the Board of Trustees of the Berryessa School District.

NOTICE TO CONTRACTORS

(Branciforte Drive Grading — Santa Cruz County)

Office of the Board of Supervisors of the County of Santa Cruz, State of California.

Sealed proposals are invited by said Board of Supervisors for grading about 3½ miles of the Branciforte Drive, in Branciforte Road District, Santa Cruz County, California, in accordance with the profiles, Cross-sections, plans and specification prepared by Lloyd Bowman, county surveyor, and accepted by said Board of Supervisors August 24, 1926.

Proposals must be made on blank forms which will be furnished by the county surveyor upon application.

Blue prints of the profiles, cross-sections, plans and specifications may be obtained from the county surveyor on deposit of $5.00, which will be refunded upon the return of said plans and specifications in good condition.

Bids will be received **up to and including September 14, 1926, at 2:00 o'clock P. M.,** at which time said bids will be publicly opened. Said bids must be addressed to the Clerk of the Board of Supervisors and endorsed "Proposals for grading Branciforte Drive."

The Board reserves the right to reject any and all bids.

By order of the Board of Supervisors.

Dated: August 24, 1926.
H. E. MILLER,
County Clerk and ex-officio clerk of said Board.

A call for bids published in this section indicates that bids are desired from other than local bidders Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section

NOTICE TO CONTRACTORS

(Pressure Pumping Plant—Monticello Union School District)

NOTICE IS HEREBY GIVEN that the Board of Trustees of the Monticello Union School District of Napa County, will, **on Friday, the 10th day of September, 1926, at the hour of Seven o'clock P. M.,** of said day, at Community Hall in the Town of Monticello, Napa County, California, open bids for a Pressure Pumping Plant according to the following specifications:

1 Chippawa No. c-5 double acting, accessible deep well pumping head.
1 Fairbanks Morse, ball bearing Motor, ½ H. P., to be operated by Kohler Light Plant.
1 Double Acting deep well Cylinder, all brass, to furnish 350 gallons per hour.
1 220 gallon Welded Pressure Tank.
1 Pressure Gauge.
1 Water Gauge.
1 Automatic Electric Controller Switch.
65 Feet 2 in. Suction Pipe.
65 Feet Double Pump Rod.

All necessary valves, check valves, safety valves, fittings and pipe to connect pump and tank.

Above plant with necessary part to be completely installed.

Operation of Plant and workmanship must be guaranteed for a period of Ninety days after installation.

All bids or offers must be accompanied by a certified check in an amount equal to Ten (10%) per cent of the bid or offer, payable to the President of the Board of Trustees of the above named School District, or be accompanied by a bond in a like amount with two sufficient sureties, conditioned that the bidder will enter into a legal contract with the said School District in the event his bid is acceptable. The Board reserving the right to reject any and all bids.

C. N. CLARK,
Clerk of the Board of Trustees of Monticello Union School District of Napa County.

QUANTITY SURVEYOR

ACCREDITED APPRAISER

NOTICE TO CONTRACTORS

OFFICE OF THE CLERK OF THE BOARD OF SUPERVISORS OF ALAMEDA COUNTY, CALIF.

SEALED BIDS will be received by the Clerk of the Board of Supervisors of Alameda County, California, at his office **until Monday, September 20th, 1926, at 10:30 o'clock A. M.** (The day when said bids will be opened and the contract awarded) for the construction of a reinforced concrete girder and steel girder bridge over San Lorenzo Creek on County Road known as Meekland Avenue, near Hayward and in Eden Road District, Eden Township, Alameda County, California. Complete plans and specifications are on file in the office of the County Clerk in the Hall of Records Building, Oakland, California, where copies may be obtained by depositing with the County Clerk the sum of $25.00.

Contractors will be restricted as to the length of time they may retain these plans and specifications to **fifteen** (15) days. Deposits of contractors failing to return said plans and specifications in good condition within said fifteen (15) day period will immediately become forfeited to the County of Alameda.

Each bid must be accompanied by a check for at least ten (10%) per cent of the total amount of the bid or proposal, certified to by some responsible bank and made payable to Geo. E. Gross, Clerk of the Board of Supervisors, to be forfeited to the County of Alameda as agreed and liquidated damages should the party or parties to whom the said contract shall be awarded fail to enter into the contract after the award or to give the bond required by the Board for the faithful performance of the contract.

The Board reserves the right to reject any and all bids.

Dated, August 23rd, 1926.
GEO. E. GROSS,
Clerk of the Board of Supervisors of Alameda County, California.

NOTICE TO CONTRACTORS

(Heating Plant Addition — Pacific School District)

Notice is hereby given that **up to Wednesday, September 15, 1926, at 8 o'clock P. M.** of said day (at which time bids will be opened at the Pacific School House, Sacramento, California) bids will be received for the construction of an addition to the heating plant of the Pacific School Building No. 2, of Pacific School District, by the trustees of said Pacific School District, according to the **plans, blue** prints and specifications which may be obtained from C. W. Hack, 2826 Q St., Sacramento, California.

All bids must be inclosed in sealed envelopes and must be received before 8 o'clock P. M., September 15, 1926, and must be accompanied by a certified check for ten per cent of the amount of the bid to guarantee the execution of a contract if bids be accepted. Check will be returned if bid be not accepted.

Trustees have right to reject any and all bids.

Dated: August 30th, 1926.
C. W. HACK,
Clerk of the Board of Trustees of Pacific School District, County of Sacramento.

NOTICE TO CONTRACTORS

(Pier 45—State Harbor Commission)

OFFICE OF THE BOARD OF STATE Harbor Commissioners, Union Depot and Ferry House, San Francisco, California, August 28, 1926.

Sealed proposals or bids will be received at this office **at or prior to 2 o'clock P. M., Thursday, September 23, 1926,** for furnishing necessary materials, labor and equipment and constructing Pier No. 45 and adjacent Bulkhead Wharf, on the water front of the City and County of San Francisco, in accordance with plans and specifications approved by the Board Aug. 26, 1926, and on file in this office, to which special reference is hereby made.

The work to be done under these specifications consist in removing such portions of abandoned existing structures as are within the lines and which will interfere with the construction of the new work, furnishing all necessary materials (except Portland cement, rails and creosoted piles, which will be furnished to the Contractor by the Board), labor, tools, machinery and equipment for the construction of Pier No. 45 and adjacent bulkhead wharf.

The materials to be used in this work shall consist of the requisite quantities of Portland cement, rails, creosoted piles, concrete aggregate, diatomaceous earth, steel reinforcement, castings, structural steel, class A rock fill, class B rock fill, heavy treated Douglas fir lumber, light treated Douglas fir lumber, untreated Douglas fir piles, eucalyptus pile butts, asphaltic paint coat, fittings, bolts, spikes and miscellaneous materials. Portland cement, rails and creosoted piles will be furnished to the Contractor by the Board. All other materials shown on the plans or called for in these specifications shall be furnished by the Contractor.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal, to be made payable to the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail or neglect to execute a contract and give the bond required within six (6) days after the award is made, in that case the said sum mentioned in said check shall be deemed liquidated damages for such failure and neglect, and shall be paid into the San Francisco Harbor Improvement Fund.

Bids will not be considered by the Board unless delivered to the Secretary or to the Assistant Secretary, at the office of the Secretary, Room No. 17, Union Depot and Ferry House, at or prior to 2 o'clock P. M., on Thursday, September 23, 1926, at which time and place the bids will be publicly opened.

The Board reserves the right to reject any or all bids if deemed for the best interests of the State.

Plans and specifications for this work to be had at Room 18, Union Depot and Ferry House, upon depositing $20.00 for same, which will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid: "Bid for Constructing Pier 45 and Adjacent Bulkhead Wharf."

WM. A. SHERMAN,
M. F. COCHRANE,
JOHN B. SANFORD,
Board of State Harbor Commissioners.
FRANK G. WHITE,
Chief Engineer.
J. L. PHELPS, Secretary.

NOTICE TO BIDDERS

(Shades and Blinds—Richmond School District)

Notice is hereby given that the Board of Education of the Richmond School District will receive, **up to the hour of 2:00 o'clock P. M., of Tuesday, September 14, 1926,** at its office in the Lincoln School, 235 Tenth Street, Richmond, California, at which time and place said bids will be opened, sealed bids for the installation of window shades and Venetian Blinds in the Peres, Fairmont, Kensington, Harding and Grant Schools. Specifications for same may be obtained at the office of the Board of Education in the Lincoln School, 235 Tenth Street, Richmond, California.

The Board reserves the right to reject any or all bids.

By order of the Board of Education of the Richmond School District.

W. T. HELMS, Clerk.
Richmond, Calif. August 24, 1926.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the **California Highway Commission, 1111 Sun Finance Building Los Angeles, Cal., until 11 o'clock A. M. on September 27, 1926,** at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State highway as follows:

Orange County, through Tustin (VII-Ora-2-C), about one and six-tenths (1.6) miles in length, to be graded and paved with Portland cement concrete.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' Offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.
Dated: August 30, 1926.
(Setp. 3-10-17-24)

PROPOSALS

Sealed proposals will be received by the Board of Public Works, San Francisco, California, on WEDNESDAY, SEPTEMBER 15, 1926 between the hours of 2:00 and 3:00 o'clock P. M. for the following public work, to wit:

For the Construction of Aqueduct Tunnels in the Foothill Division of the Hetch Hetchy Aqueduct. Contract No. 113, Hetch Hetchy Water Supply.

Proposal forms, specifications and further information may be had on application to the City Engineer, City Hall.

A deposit of $10.00 is required for the specifications.

(tf)

NOTICE TO CONTRACTORS

Burlingame Grammar School District

Notice is hereby given that the undersigned trustees of the Burlingame Grammar School District, San Mateo County, Calif., will receive sealed bids **up to the hour of eight (8:00) o'clock P. M., on Monday, the 13th day of September, 1926,** at the Pershing Grammar School, Newlands Avenue, Burlingame, at which said time and place said bids will be publicly opened for the construction of additions to the Howard Avenue and Roosevelt Schools and a five class room frame and concrete school building at Grove and Paloma Streets, Burlingame. Plumbing and heating will be separate contracts.

All bids will be addressed to the Clerk of the said Board of Trustees and must be accompanied by a certified check made payable to the order of aforesaid clerk in amount equal to at least ten (10) per cent of the largest bid so submitted, and no proposal will be considered by said Board unless accompanied by such check.

The said check to be forfeited to said School District, as ascertained and liquidated damages in case the successful bidder fails or refuses to enter into a contract to perform the work, and give satisfactory bonds required, within ten days after the date of the award.

The plans and specifications for said work may be obtained from E. L. and J. E. Norberg, architects, 407 Occidental Avenue, Burlingame.

The said Board of Trustees expressly reserves the right to reject any and all bids. A deposit of $10 required on plans.

Done by the order of the Board of Trustees of the Burlingame Grammar School District, San Mateo County, California.

W. H. EDDY,
Clerk.

NOTICE TO CONTRACTORS

(California Exposition Building—Reno, Nevada)

Sealed bids will be received by Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, **up to 2 o'clock P. M., September 21st, 1926,** said bids then and there to be publicly opened and read for furnishing all plant, materials, and labor required for the erection and completion of the California Building, Nevada Trans-Continental Highways Exposition, Reno, Nevada, in accordance with plans and specifications therefor, copies of which may be obtained upon application to the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California.

Cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

A deposit of twenty-five ($25.00) dollars will be required on plans and specifications, the deposit to be returned immediately upon the return of the plans and specifications to the Division of Architecture at Sacramento, California, in good condition.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

All bids must be addressed to Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, and plainly marked on the envelope: "Proposal for California Building, Nevada Highways Exposition."

STATE DEPARTMENT OF PUBLIC WORKS, DIVISION OF ARCHITECTURE,
GEORGE B. McDOUGALL,
State Architect.
PAUL BAILEY,
Director of Public Works.

BRIDGES

SAN JOSE, Santa Clara Co., Cal.—Proctor & Cleghorn, Rosenberg Bldg., Santa Rosa, at $19,907 (eng. est. $22,000) awarded cont. by city to const. rein. conc. bridge over Los Gatos Creek at Auzerais Ave.

LOS ANGELES, Cal.—North Pacific Constr. Co., Detwiler Bldg., awarded contr. by Bd. Pub. Wks. at $242,425 to const. Riverside Drive-Dayton Ave. bridge.

Pan Pacific Constr. Co., Citizens Nat. Bank Bldg., awarded cont. at $43,443 to const. earth fill, pave, and other work at Anaheim St. Viaduct.

SAN DIEGO, Cal.—Until 11:30 A. M., Sept. 20, bids will be rec. by county to const. bridge over canyon bet. San Diego county hospital and the Vaucluin Home. Plans and spec. on file at office of the superv. Cert. check or bond, 10%. J. B. McLees, clerk.

SHASTA COUNTY, Calif. — Bordwell and Brugge, Napa, at $110,125 submitted low bid to State Highway Commission to const. rein. conc. bridge over Dog Creek, 1 mi. south of Delta, consisting of one 234 ft. open spandrel arch span and eight 24 ft. girder approach spans. R. B. McKenzie, Gerber, at $130,860, only other bidder. Eng. est. $104,930.

SAN GABRIEL, Cal.—Until 7:30 P. M., Sept. 7th, bids will be rec. to const. reinf. concr. arch bridge across Longden Ave. It will have a 30-ft. arch with 40-ft. rdwy. Est. quan. are: 254.7 cu. yds. class "A" concr., 600.5 cu. yds. class "B" concr., 33.6 cu. yds. class "C" concr., 21,035 lbs. reinf. steel, 960 cu. yds. excav. At the same time bids will be rec. for wrecking 3 span bridge now at that site. Plans may be obtained from Ira H. Stoffer, City Clerk, E. N. Wright, 368 P. E. Bldg., Los Angeles, City Engr. Cert. chk. for 5% must accompany each bid.

LOS ANGELES, Cal.—Until 2 p. m., Sept. 20, bids will be rec. by L. A. county to const. four monolithic conc. silos at L. A. county farm, nr. Downey. Plans on file at office of mech. dept., 10th fl. Hall of Records.

MERCED, Merced Co., Cal.—County Surveyor Bedesen preparing spec. to widen culverts over Ivett Ditch, Ivett Spilliway and Montgomery Ditch on Snelling-Merced Falls rd. and for a culvert over Ruddle Slough on Snelling-and-Hopeton rd., all in Rd. Dist. No. 1.

SAN LUIS OBISPO, Cal. — E. A. Branch, San Luis Obispo, at $2600 awarded cont. by county to const. rein. conc. culvert over Old Creek on Cambria rd.

MONTEREY COUNTY, Cal. — Atlas Construction Co., Menlo Park, at $37,061.89 (asphalt) awarded cont. by State Highway Commission, to refloor, clean and paint bridge over Salinas River, 1-mi. south of Soledad, comprising 11 119-ft. steel spans, three 17-ft. and one 19-ft. timber approach spans. E. K. Angle, Dos Palos, at $32433 for asphalt and $34,975 for redwood, allowed to withdraw bid. Eng. est. asph. $42,377; redwood, $45,043.

TEHAMA COUNTY, Cal.—Until Sept. 13, 2 P. M., bids will be rec. by State Highway Commission, H. S. Comly, division engineer, at Redding, to clean, paint and repair bridge over Sacramento river at Red Bluff. **See call for bids under official proposal section in this issue.**

SANTA CRUZ, Santa Cruz Co., Cal.—Proctor and Cleghorn, Rosenberg Bldg Santa Rosa, at $13,326.75 sub. low bid to city to const. Ocean Villa bridge over Pilkington Gulch, involv. removal of old bridge; 206 cu. yds. excav. for West Abutment and piers; 10 cu. yds. excav. for East Abutment; 49 timber piles in place (fur. by city); 45 cu. yds. class "A" conc. in footings in place; 320 cu. yds. class "A" conc. in walls and pier above footings and girder spans, in place; 27 cu. yds. class "A" conc. in railings in place; 60,000 lbs. reinf. steel. Other bids: Lozier & Carr, Santa Cruz, $13,529; Noble Bros., San Jose, $15,497; Thompson Bros., Santa Cruz, $17,157.

LOS ANGELES, Cal.—L. A. and Salt Lake Ry. and the city of Los Angeles have jointly petitioned state railroad comm. for permit to const. overhead crossing above Downey Rd; est. cost $200,000.

FRESNO, Fresno Co., Cal.—Until Sept. 24, 4 P. M., bids will be rec. by D. M. Barnwell, county clerk, to widen bridge at intersection of Blackstone and Shields Aves. Cert. check 10% payable to Chairman of Bd. of Sups. req. Plans obtainable from County Surveyor Chris. P. Jensen, Cory Bldg., Fresno.

OAKLAND, Cal.—Until Sept. 20, 1030 A. M., bids will be rec. by Geo. E. Gross, county clerk, to const. rein. conc. girder and steel bridge over San Lorenzo Creek in Meekland Ave. near Hayward. Cert. check 10% payable to clerk req. Plans obtainable from County Surveyor Geo. A. Posey on deposit of $25, returnabe. **See call for bids under official proposal section in this issue.**

PALO ALTO, Santa Clara Co., Cal.—Chamber of Commerce urges construction of underpass at point where University Ave. will cross proposed Bay Shore Highway. J. F. Byxbee Jr., city engineer.

DREDGING, HARBOR WORKS AND EXCAVATIONS

LOS ANGELES, Cal.—United Dredging Co. Central Bldg., awarded cont. by U. S. War Dept. to dredge present main channel involv. 2,700,000 cu. yds. material, at 21.24c yd. for north sec., and at 28.34c yd. for south sec. Approx. cost, $700,000.

Carbide Flare Lights
OxyAcetyleneEquipment
Goggles—Respirators
First Aid Supplies
Carried in stock
E. D. BULLARD
565 HOWARD STREET
San Francisco, Calif.
Douglas 6320

LIGHTING SYSTEMS

Alhambra, Cal.—Bids for ornam. lights in San Marino Ave. and other sts. rejected by city. Underground Construction Co. bid $50,977.

SAN DIEGO, Cal.—Globe Elec. Wks., San Diego, sub. low bid to city at $8300 for ornam. lights on 26th St. and Logan Ave.

CULVER CITY, Cal.—Until 8 p. m., Sept. 7, bids will be rec. to construct ornam. lights in Washington Blvd., bet. Centinelle Blvd. and west city limits. Cert. check or bond 10%. Nelle Brown Haus, city clerk.

LOS ANGELES, Cal.—Until 10 A. M., Sept. 13, bids will be rec. by Bd. Pub. Wks. for ornam. lights in: La Jolla Ave., bet. Melrose and Rosewood Aves.: concr. posts; 7th St., bet. Broadway and Figueroa Sts.: pressed steel posts; Rampart Blvd., bet. Temple and Sixth Sts.: C. I. posts.

BEVERLY HILLS, Cal.—City plans ornam. lights in Camden Dr., Linden Dr. and Santa Monica Blvd., etc., involv. 11,238 ft. 1½-in. conduit, 950 ft. 2-in. conduit, 26,193 ft. cable, 94 2-light met. posts; 1911 act. Protests, Sept. 13.

GLENDALE, Cal.—Until 10 A. M., Sept. 16, bids will be rec. for ornam. lights in Ridgeway Dr., Cumberland Rd., Sunset Rd., and Kenneth Rd.: C. I. posts; 1911 act. A. J. Van Wie, city clerk. P. Diedrich, plant supt.

ALHAMBRA, Cal.—Until 8 P. M., Sept. 13, bids will be rec. by city for ornam. lights in San Marino Ave.; 1911 act. Previous bids rejected. R. B. Wallace, city clerk. H. E. Blake, city engineer.

LOS ANGELES, Cal.—R. A. Wattson, 1029 N. McCadden Pl., awarded cont. by Bd. Pub. Wks. at $187,130, for ornam. lights in Veteran Ave., bet. Santa Monica and Pico Blvds.

MACHINERY & EQUIPMENT

SANTA ROSA, Sonoma Co., Cal. — City contemplates purchase of motor street sweeping machine; est. cost $7500.

DELANO, Kern Co., Cal. — Until Sept. 10, 8 P. M., bids will be rec. by H. A. Bower, clerk, Delano Joint Union High School District, (1) to fur. and install print-shop equipment and (2) machinery for woodshops, at high school. Specifications obtainable from clerk.

SACRAMENTO, Cal.—Until Sept. 2, 5 P. M., bids will be rec. by H. G. Denton, city clerk, to fur. three Model 66-S 3-ton used stand. auto trucks for City Garbage Dept. Spec. on file in office of clerk.

MODESTO, Stanislaus Co., Cal.—Until Sept. 13, 7:30 P. M., bids will be rec. by E. D. Abbott, Secty., Board of Education, to fur. and install one electric refrigerator for high school. Specifications obtainable from Secty.

MODESTO, Stanislaus Co., Cal.—Until Sept. 13, 7:30 P. M., bids will be rec. by E. D. Abbott, Secty., Board of Education, to fur. and del. one electric dish washer for high school cafeteria. Specifications obtainable from Secty.

Standard All-Steel Buildings Now Manufactured on the Pacific Coast

For the first time in the history of Pacific Coast building, a local manufacturer is putting out standard all-steel buildings for all types of industrial uses. These buildings, the joint product of three old established companies, bear the name COASTEEL Buildings. They are manufactured and carried in stock in San Francisco, and are entirely suitable for any purpose requiring a one-story building. Contractors, particularly, can profit through the use of all-steel buildings, as one great advantage of such buildings is that they have 100% salvage and can be used on successive jobs.

BUILDINGS of steel, manufactured and erected on the standard unit principle, are used the world over. They are especially adapted to industrial purposes requiring one-story buildings, being economical and durable, and easy to erect, to extend or to move. These benefits, plus low cost, fire protection and insignificant maintenance charges, have led to their quick adoption by industry. Insurance companies recognize the value of all-steel construction by allowing deductions in premiums in many classes of risks.

COASTEEL Buildings represent the topmost value in all-steel standardized unit buildings. They are designed on correct engineering principles, in accordance with standard structural practice, and contain no freak or special ideas. Each building, while completely standard, is built for and suited to the particular purpose for which it is intended. The use of specially manufactured steel and precise design have decreased the weights of columns and trusses, without in any way sacrificing strength.

COASTEEL Buildings are practically indestructible as all of the steel is *hot dip galvanized* after fabricating. This applies to the steel framework as well as to the sidewall, roof sheets and windows. *COASTEEL* Buildings are the only standard unit steel buildings that have this "all galvanized" feature.

Another item of real importance to owners and builders is that of service and delivery. *COASTEEL* Buildings have the big advantage of being a strictly Western product, and delivery can be made well in advance of shipments requiring a long haul. Any rebuilding after a disaster, extensions to existing buildings to protect crops or materials or new construction for factory or industrial purposes can be made quickly. The complete standardization, and the ample stocks on hand assure immediate action.

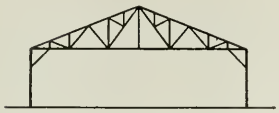
There are no requirements in a one-story building that cannot be covered by *COASTEEL* Buildings. Manufactured in five types—in numerous sizes—these buildings can accommodate any required combination of space, lighting and interior arrangement.

Listed below are some of the industries and businesses that *COASTEEL* Buildings are adaptable for:—

Industrial Plants
Factory Buildings
Garages
Railroad Shops
Forge and Foundry Shops
Farm Buildings
Canneries and Packing Plants
Machine Shops
Warehouses
Storage Sheds
Pump Houses
Assembly Plants
Dock and Wharf Sheds
Metal Working Shops
Woodworking Shops
Oil Refineries
Shop Offices
Yard Offices
Service and Welfare Buildings
Contractors' Buildings
Combined Store and Office Buildings
Clay and Stone Products Plants
Laboratories
Bunk Houses
Steel Sheds for Parking Automobiles
Steel Buildings for Gasoline Distributing Plants
Steel Awnings and Sheds on Shipping Platforms
Gasoline and Oil Service Stations
Fire Stations
Power Houses
The Various Buildings required on Medium and Large Construction Jobs

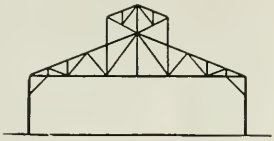
Types and Sizes of COASTEEL *Buildings*

TYPE A—Clear Span Type



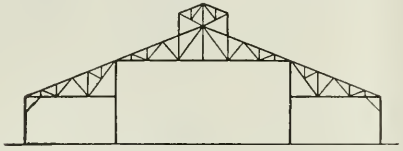
Standard Widths — 30′-35′-40′-45′-50′-55′-60′-70′-80′-90′-100′
Note: For actual center to center of columns subtract 2′2″ from widths noted:
Standard Heights—(Base of Column to Bottom Chord) 9′ (for 30 & 35′ trusses only)-11′-13′-15′-18′-21′
Note: Heights may be varied to suit by raising or lowering base of column in relation to floor.
Lengths:—To suit requirements.

TYPE M—Monitor Type



Standard Widths—40′-45′-50′-55′-60′-70′-80′-90′-100′
Standard Heights—11′-13′-15′-18′-21′
Lengths:—To suit requirements.
Monitor Widths—These vary between 11′ 6″ and 17′ 6″, depending on span of truss.
Standard Heights of Monitor Sash—5′ 2″

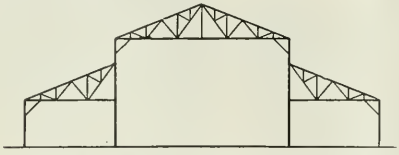
TYPE BMB—Low Crane Type with monitor



Type BAB Buildings also available

Total Width (out to out of building) is sum of the following:
Side Spans (Center to center of columns) 15′-20′-25′-30′
Center Span—30′-35′-40′-45′-50′-55′-60′-70′-80′-90′-100′
Standard Sidewall Heights—11′-13′-15′-18′-21′
Lengths—To suit requirements.

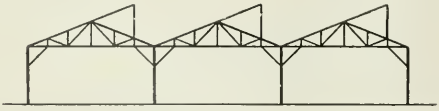
TYPE BCB—High Crane Type



Type M truss also available for center span

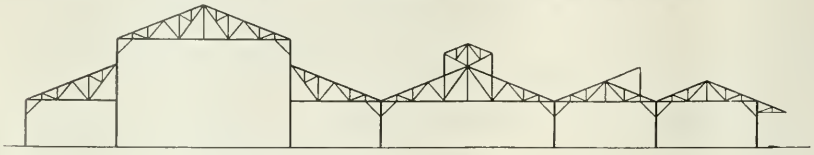
Total Width (out to out of building) is the sum of the following:
Side Spans (Center to center of columns) 15′-20′-25′-30′
Center Spans — 30′-35′-40′-45′-50′-55′-60′-70′-80′-90′-100′
Standard Sidewall Heights—11′-13′-15′-18′-21′
Lengths—To suit requirements.
Note: Crane is supported on independent columns.

SAWTOOTH TYPE (ST)



Spans (Center to center of columns)—27′ 10″ & 32′ 10″
Total Width of any Saw Tooth building (out to out of building) is center to center of outside columns plus 2′ 2″
Standard Heights—11′-13′-15′-18′-21′
Lengths—To suit requirements.
Standard Heights of saw tooth—6′ 10⅜″ for 27′ 10″ span; 8′ 6¾″ for 32′ 10″ span.

Every possible combination of type and size is obtainable, as this sketch indicates.



The Five Types of COASTEEL Buildings

As shown on the opposite page, *COASTEEL* Buildings may be obtained in any one of five distinct types of buildings. They may also be obtained in any combination of two or more buildings of one or more of the types. The size of the finished structure can be made to accurately fit the available ground area. Inside clear heights can also be varied to suit the requirements of any job, within the range of column heights provided. It would be an extreme case where the standard trusses and columns could not be utilized.

INTERIOR ARRANGEMENT:

The matter of interior arrangement is easily taken care of in *COASTEEL* Buildings. Truss widths are well graduated over a wide range, so that the spacing of columns is flexible. The use of continuous sash and amply lighted monitors, or saw tooth construction, permits any desired arrangement of tools, benches, machines, etc. so as to get the proper amount of light on the working surfaces.

The design of *COASTEEL* columns and trusses provides ample support for line shafting. Hangers for the shafting and for motors can be attached as desired. Provision has also been made in the design for light trolleys or monorail hoists at the panel points and the centers of the trusses.

OVERHEAD CRANES

When overhead cranes are to be installed, separate column supports for the crane runways are provided. This permits the utilization of the economical standard columns and adds but very little to the cost of the structure. It is thus possible to erect a standard building for temporary use without cranes, if desired, as the additional standard columns to support the crane equipment may be installed at any time.

Attention is called to the high degree to which standardization has been carried in the design and manufacture of *COASTEEL* Buildings. It is because of this complete standardization that the cost of *COASTEEL* Buildings is low, regardless of what size the finished buildings are, or what their arrangements may be. *COASTEEL* Buildings are the product of sound engineering experience, best quality materials and careful workmanship. Their completed cost, however, is moderate in comparison.

STRICTLY A PACIFIC COAST INDUSTRY

COASTEEL Buildings are strictly a home industry, every pound of material entering into their construction being manufactured on the Pacific Coast. The structural steel is produced in the mills of the Pacific Coast Steel Company and is fabricated at its South San Francisco plant. Sheets for the side walls and roofs, also of local steel, are rolled by the Pacific Sheet Steel Corporation. The sash, known as California Steel Windows, and the steel doors, are manufactured by Michel & Pfeffer Iron Works.

Better service and quicker delivery are the natural benefits of such a manufacturing arrangement—in extreme cases almost overnight shipments of complete buildings can be made.

ENGINEERING SERVICE.

The Engineering Staffs of these three plants are at your service in solving any problems relating to building construction. The reputation of the three companies and their completely adequate manufacturing facilities guarantee first class material, high grade workmanship and prompt delivery.

Multiple Span Buildings

In certain cases a building of ordinary height but of more than ordinary width may be required. This condition can easily be taken care of with a "multiple span" building, which is nothing more than two or more similar truss buildings joined side by side. The trusses are supported at the common points by a common column. Such an arrangement is not off-standard in any way and permits full utilization of the standard unit principle.

When interior lighting requirements permit, a building of the type AA could be adopted. If considerable natural lighting is needed down the center of the building, a structure of the type MM would answer, as the light required in the center would come largely from the monitors.

Any variation of the multiple span idea is possible, in which case buildings of two or more different types of trusses would be used. As shown in the sketch, every possible combination of type and size is obtainable, and this would still be within the standard unit scheme and entirely feasible.

Coasteel Buildings

DOORS AND PARTITIONS

EITHER sliding or swinging doors of standard size are supplied with *COASTEEL* Buildings, the type and size to be chosen by the purchaser in each case.

Provision is made so that doors may be locked from either the inside or outside. Swinging doors are hung with ball-bearing steel butts and are fitted with locks. Sliding doors are provided with galvanized Richard-Wilcox track, ball-bearing hangers and track brackets.

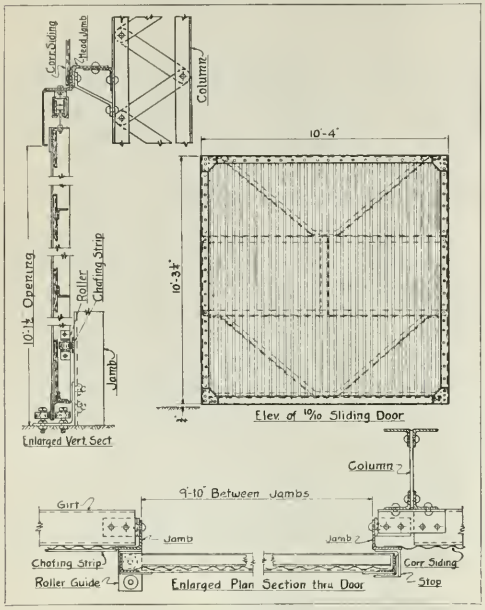


Fig. 10. Details of 10' x 10' Single Sliding Door supplied with COASTEEL Buildings.

The doors usually supplied consist of a steel frame covered with galvanized corrugated sheets. When desired, however, doors will be furnished with steel sash in the upper panel and flat steel sheets in the lower panel.

A third type of door which may be obtained is one with full sash, as illustrated in Fig. 12 below.

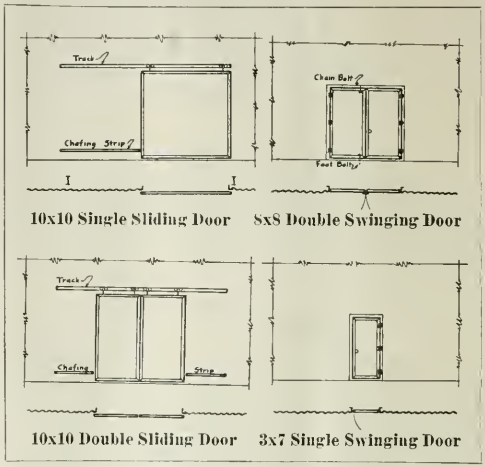

Fig. 11. Types of sliding and swinging doors supplied with COASTEEL Buildings.

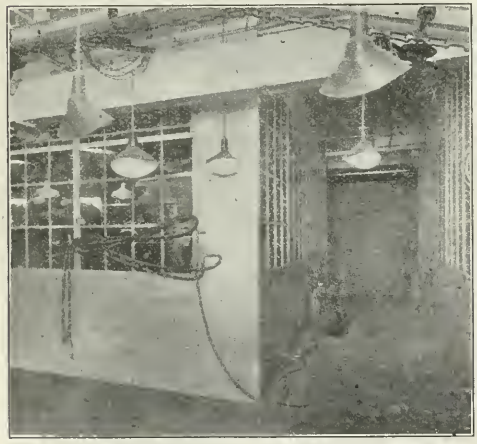

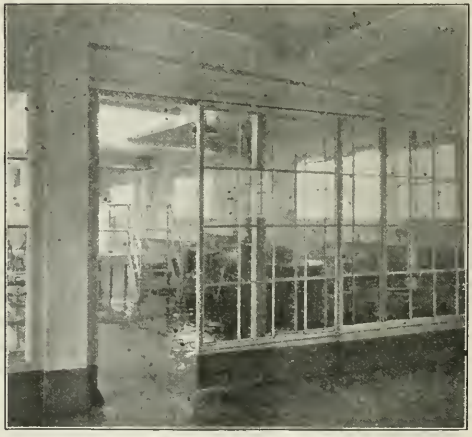

Fig. 12. Typical partitions, fabricated with "Californa Steel Windows." COASTEEL Buildings are equipped with partitions of these types when the plans call for sash partitions. The advantages of these sheet steel and steel window partitions are many. Changes can be cheaply and quickly made, and these partitions give satisfactory fire protection.

RESERVOIRS AND DAMS

GRASS VALLEY, Nevada Co., Cal.—Bear River Orchards Co., taking bids to const. circular reinforced concrete type dam, approx. 162 feet and 25 to 30 ft. high, impounding approx. 10,000,000 gals. F. A. Post, engineer, Berkeley. Plans are obtainable from office of D. L. Jungck Co., 2135 Center St., Berkeley.

LOS ANGELES, Cal.—Until 2 P. M., Sept. 20, bids will be rec. by county for 5 needle type valves; 2 for Big Santa Anita dam and 3 for Pacoima dam. Spec. from chief engr., county flood control dept., 202 N. Broadway.

PRESCOTT, Ariz.—$85,000 bond issue of Chino Valley Irrig. Dist. voted to const. dam across Willow Creek, 5 mi. from Prescott, supplementing present storage on Granite Creek. The project is about 20 mi. n. of Prescott.

PIPE LINES, WELLS, ETC.

LOS ANGELES, Cal.—Until 3 P. M., Sept. 7, bids will be rec. by water and power dept., 207 S. Broadway, for drilling well or rental of well rights and equip.; spec. P. A. Adv. No. P-642. Jas. P. Vroman, secy.

LOS ANGELES, Cal.—Until 2 P. M., Sept. 20, bids will be rec. by county to drill water well and install casing therein at Los Angeles county farm, near Downey. Plans obtainable from mech. dept., 10th floor, Hall of Records. Cert. check or bond, 10%.

MISCELLANEOUS CONSTRUCTION

BIDS WANTED

SANTA PAULA, Cal.—Until 7:30 p. m., Sept. 7, bids will be rec. by city for (1) fur. and del. approx. 800 ft. 48-in. reinf. conc. pipe, (2) lay and backfill for same, (3) const. and install extensions to present reinf. conc. box culv. on Harvard St. Cert. chk. 10%. M. G. Demarest, city clerk.

WATER WORKS

LAGUNA BEACH, Cal.—O. T. Moore, Santa Ana, sub. low bid to city at $6180 to const. miscellaneous struc. at main pumping sta. for Laguna Beach County Water Dist. Other bids: Barrow Constr. Co., $6184.75; Nead Constr. Co., $6492.25; W. W. Hoagland, $7259.50 C. M. Elliott, $7894.

MONTICELLO, Napa Co., Cal.—Until Sept. 10, 7 P. M., bids will be rec. by C. N. Clark, clerk, Monticello Union School District, to fur. and install pressure pumping plant, involv.

1 Chippawa No. c-5 double acting, accessible deep well pumping head.
1 Fairbanks Morse, ball-bearing Motor, 1-2 h. p. to be operated by Kohler Light Plant.
1 Double acting deep well cylinder, all brass, to furnish 350-gal. per hr.
1 220-gal. welded pressure tank.
1 pressure gauge.
1 water gauge.
1 automatic electric controller switch.
65 ft. 2-in. suction pipe.
65 ft. double pump rod, etc.
Cert. check 70% payable to Pres. of Bd. of Trustees of Dist. **See call for bids under official proposal section in this issue.**

VALLEJO, Solano Co., Cal.—Following bids taken under advisement by city to fur. pumping apparatus for auxiliary reservoir at Capitol Hill in connection with water system: Worthington Co., $1650 and $1325; American Well Works, $274.85 and $701; De Laval Steam Turbine Co., $1070 and $1100; Fairbanks Morse Co., $1048.50 and $1410. T. D. Kilkenny, city eng.

EL SEGUNDO, Cal.—Until 7:45 P. M., Sept. 10, bids will be rec. by city for 1200 ft. 4-in. class "B" (or equal) B. & S. C. I. pipe, f. o. b. trenchside, El Segundo. Cert. chk. or bond, 10%. Victor D. McCarthy, city clerk. R. T. Hutchins, city engineer.

MONTEREY PARK, Calif. — City awards contrs. for pumps to Pac. Pump Co., deep well pump, and Byron-Jackson Co. for a booster pump.

YREKA, Siskiyou Co., Cal.—City declares inten. (1B-1926) to install water distributing system includ. lay and relay pipes; const. manholes in 2nd St., from Yama St. to Jefferson St. 1911 Act. Bond Act 1915. Protests Sept. 10. U. F. Brown, city clerk.

SACRAMENTO, Cal.—until Sept. 7, 5 P. M., bids will be rec. by Chas. C. Hughes, Secty., Board of Education, to fur. and install sprinkler system at El Dorado, Coloma and Donner schools. Specifications obtainable from Business Manager of Bd. of Educ., 21st and L Sts., Sacramento.

OAKLAND, Cal.—Until Sept. 10, 5 P. M., bids will be rec. by John H. Kimball, Secty., East Bay Municipal Utility District to fur. four automatic synchronous stop and relief valves for Mokelumne river project. Plans obtainable from Secty. at 1924 Broadway, Oakland.

LOS ANGELES, Cal.—Until 2 p. m., Sept. 20, bids will be rec. by county to const. approx. 2.92 mi. water maine in Hammerton Tr. and adjacent territory; est. cost, $25,479.25.

EL SEGUNDO, Cal.—Until 7:45 p. m., Sept. 10, bids will be rec. by city for 1200 ft. 4-in. class "B" or equal B & S cast iron pipe, f. o. b. trenchside, El Segundo. Cert. check or bond 10%. Victor D. McCarthy, city clerk.

PLAYGROUNDS AND PARKS

FRESNO, Fresno Co., Cal.—See "Schools," this issue. Bids opened for Fresno State College wire fencing.

MODESTO, Stanislaus Co., Cal.—Until Sept. 8, 7:30 p. m., bids will be rec. by H. E. Gragg, city clerk, to pave two tennis courts and resurface one tennis court. Cert. check 10% payable to Mayor req. with bid. Plans on file in office of clerk.

SEWERS & STREET WORK

SAN JOSE, Santa Clara Co., Cal.—City declares inten. (3142) to imp. Taylor St., bet. 7th and 13th Sts., involv. grade; 1½-in. Durite asph. conc. surface on 3-in. asph. conc. base.; hyd. cem. conc. driveways, walks, curb, gut. vit. ironstone sewer laterals; 10-in. vit. main sewers; 13 hyd. conc. storm water inlets; 8-in. vit. pipe drains, etc. 1911 Act. Bond Act 1915. Protests Sept. 20. J. J. Lynch, city clerk. Wm. Popp, city engineer.

SAN BERNARDINO, Cal. — Awards by city for street work are:

Reece St., bet. St. Elmo and Mt. Vernon Aves., to H. H. Lienau, 426 Brookside Ave., Redlands, 14½c. sq. ft. 4-in. concr. pave., curb, 45c ft., walk, 15c sq. ft.

17th St., bet. G St. and 333 ft. west to H. H. Lienau, involv. 4-in. concr. pave., 15c sq. ft., curb, 45c ft., walk, 15.5c sq. ft.

Sepulevada St., bet. 11th and Base Line Sts., to W. D. Bohan, San Bernardino, involv. 4-in. concr. pave., 14.5c sq. ft., curb, 44c ft., walk 14¼c sq .ft., 8-in. vit. sewer, 65c ft., f. t. $100 ea., 4-in. sewer, 44c ft.

Norton Ave., bet. H and I Sts., to A. W. Gardner, Redlands, involv. 4-in. concr. pave., 14.2c sq. ft.

Evans St., bet. J St. and Massachusetts Ave., to A. W. Gardner, involv. 4-in. cem. concr. pave., 14.2c sq. ft.

SAN MATEO COUNTY, Cal.—As previously reported, bids will be rec. by State Highway Comm., Sept. 20, to grade 1.6 mi. in San Mateo county, bet. Colma and Cypress Lawn Cemetery. Project involves: 70,000 cu. yds. rdwy excav. without classification; 9800 cu. yds. struc. excav. without classification; 513,500 sta. yds. overhaul; 240 cu. yds. Class "A" cem. concr. (culv.); 1600 cu. yds. Class "C" cem. concr. ret. walls and flume); 210 cu. yds. Class "A" cem. conc. (curbs and gutters); 36,200 lbs. bar reinforcing steel (struc. and curbs); 130 lin. ft. 12", 66 lin. ft. 15" and 1812 lin. ft. 18" corru. metal pipe; 490 lin. ft. 18" and 150 lin. ft. 36" light reinf. conc. pipe; 435 lin. ft. 6" 490 lin. ft. 12" and 100 lin. ft. 18" vit. clay pipe; 6010 lin. ft. 6" and 1200 lin. ft. 8" drain tile; 800 cu. yds. rubble masonry (ret. walls); 235 cu. yds. riprap (broken conc. and rock); 1500 cu. yds. remove conc. existing pavement, conc. walls and rubble walls; 45 monuments. Comm. will fur. corru. metal pipe.

SANTA MONICA, Cal.—City plans to imp. Pier Ave., bet. Main St. and Washington Blvd., and portions of other Sts.: 2-in. Warrenite-Bitul. w. s. on 4-in. asph. conc. base, curbs, walks, C. I. water mains, fire hydrants, etc.: 1911 act. Protests, Sept. 13.

OAKLAND, Cal.—Until Sept. 16, 12 noon, bids will be rec. by E. W. Sturgis, city clerk, to imp. portions of Hillmount Ave., bet. Tully and "Moss Estate Tract;" Parker Ave., Michigan Ave., etc., involv. const. of sewers with manholes, lampholes, drop-manholes; drop connections and wye branches. 1911 Act. 1926 Edition

San Francisco Building Laws

Ready For Distribution

With the issuance of this 1926 edition, the Building Ordinance Books heretofore published will be obsolete, inasmuch as many sections of the law have been amended and additional sections added.

This 1926 edition contains all revisions and additions to the code up to and including June 1926.

In addition to the Building Laws of San Francisco, the 1926 edition contains the FIRE ORDINANCES as regards the construction industry, the ELECTRICAL ORDINANCES, the SIGN ORDINANCE, the BILLBOARD ORDINANCE and other laws covering regulations concerning the construction interests.

Price $1.00 per copy.

THE CONTRACTORS' ROOM

BUILDING AND ENGINEERING NEWS maintains a Contractors' Room where plans and specifications may be filed by Architects, Engineers and Owners for the convenience of bidders in San Francisco and the Bay Counties.

Architects, Engineers and Owners are invited to forward plans of their projects to BUILDING AND ENGINEERING NEWS. No charge for this service. The plans will be returned in good condition when contract for work is let.

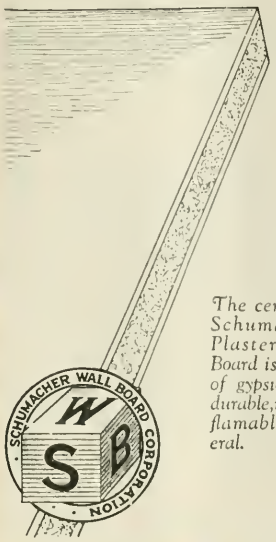
More than a strong smooth wall

a barrier against fire



The center of Schumacher Plaster Wall Board is made of gypsum—a durable, non-inflamable mineral.

IT'S just human nature not to worry about fire—until after it's happened.

But each wall built of Schumacher Plaster Wall Board is a protection against fire. It has center of gypsum—a non-burnable mineral. While you are building a smooth, sturdy wall you are also building a worthy fire wall. Yet this added protection is without extra cost.

ALL GALVANIZED
Standard Steel Buildings

Manufactured and Carried in Stock on the Pacific Coast

COASTEEL Standard Buildings are the first *all galvanized* standard unit steel buildings to come on the market. They are the joint product of three old established companies—years of experience in manufacturing steel, fabricating steel products and erecting steel structures stand behind COASTEEL Buildings.

If you are an engineer, a contractor, an owner or a prospective tenant, you are interested in learning the facts about COASTEEL Standard Buildings.

LOS ANGELES BUILDING FOR MONTH OF AUGUST

While Los Angeles' building total for August was about $5,300,000 under that for July, which included a $4,000,000 permit for the city hall, it was only about $1,900,000 under the monthly average for the year and only about $1,800,000 under the total for August, 1925. Both the January and February totals of the current year were less than that for August. When it is considered there were six holidays in August and that it is normally a seasonally dull month in building, the showing is not so unsatisfactory as it might appear on the face of the figures. September will also have six holidays, and it is not likely the total for the month will be very far out of range of that for August.

During August, 1926, the city building department issued 2906 permits with an estimated valuation of $8,826,776. For July, 1926, the number of permits was identical, 2906, with an estimated valuation of $14,126,776, while for August of last year the number of permits was 3493 and the estimated valuation was $10,221,257. Class A construction for July, 1926, amounted to only $912,000 for five buildings; Class B construction was $552,000 for one building, the largest project started during the month; Class C construction totaled $1,381,459 for 54 buildings, and class D all-frame construction amounted to $4,305,719 for 1835 buildings.

For the current year to Sept. 1 Los Angeles' building total was $86,114,279 for 24,040 permits as compared with $104,695,610 for 29,825 permits, a loss of 16 per cent in the number of permits and 17 per cent in the valuation. —Southwest Builder and Contractor.

BUILDING DECLINE ONLY MODERATE, SAYS REPORT

Moderate decline in building construction is reported by the Guaranty Trust Company of New York in its current issue of "Guaranty Survey." Authorities on building activities and the demands of the country for homes, apartments, office buildings, etc., in the past have not wholly agreed as to the future of the building industry. It is probably true, in the opinion of informed bankers, that in some sections of the country there has been an undue expansion in building construction; i. e., that some cities and towns have been overbuilt.

The "Guaranty Survey" reports a moderate decline in building construction undertaken during July. To quote.

"It must be remembered that a decrease in July is in line with the usual seasonal tendency. A more trustworthy indication of the trend of the industry is seen in the fact that since early spring the rate of increase as compared with last year has been declining, and that in June and July the level of activity was actually lower than a year ago.

"If, as some observers assume, the peak of activity in building has been passed, there is nothing in the present situation to occasion great concern. If not now, then in the near future, a decline from the abnormal rate of the last few years is inevitable. Such reactions as may fall on business in general from this decrease must be regarded as a return to normal, and will be minimized by a slow and gradual recession such as we have witnessed in the last few months.'

CONCRETE CONSTRUCTION IS POPULAR IN FAR EAST

The widespread use of concrete construction by Americans in refugee camps and orphanage buildings, seems likely to revolutionize builders' methods throughout the Near East. Heretofore the native houses and buildings have been mainly constructed from adobe, brick and stone. But Americans found the local cements far more useful and almost equally cheap. Even pipes, bowls, sinks and drains were shaped over reinforcements of steel wire mesh, with entire success.

The native cement is of volcanic origin and is found in pockets in the rocks, ready pulverized for mixing. The best quality comes from the island of Santorini, and is declared to be as easily worked and as durable under local weather conditions as the lower grades of manufactured cement. Few difficulties attend its mining, and its cost is extremely low, only slightly more per cubic yard than sand or gravel.

Concrete plumbing was a complete innovation in Greece when introduced by the engineers of the Near East Relief in building their industrial school on the Greek island of Syra. The interiors of bowls and sinks were lined with a white clay which sets with extreme hardness and lasting quality, not unlike porcelain. This clay was the material used by the ancient Greeks as a lining for their aqueducts and reservoirs.

BUILDING COSTS LEVEL MAINTAINED

Construction costs have remained virtually on a single level since midsummer of last year. They continue to hold to an average slightly less than twice as great as that established in 1913, according to statistics compiled by the Associated General Contractors of America.

The average costs in the principal construction centers of the United States registered in July was identically the same as that marked down in June. It was at the present plane of costs that a three-month period without change was noted from November 1, 1925, to February 1, 1926. Fluctuations immediately preceding and following that period was insignificant.

The average of wages in the construction trades and average prices paid by contractors for building materials remained unchanged in July. Although minor fluctuations in prices of materials were noted, the general figures held their positions. Based on the 1913 average as 100, material prices are now established at index number 179, while wages hold to the 226 point level.

The material pricea are now only one point above their lowest mark since 1922, set in August and September of that year. The average of wages, on the other hand, is only two points below the record high mark of the past three and one-half years

ORDERS FOR ELECTRICAL GOODS ARE HEAVY

Demand for electrical goods is increasing more rapidly this year than at any time in the last five years, according to reports of four principal manufacturing companies made to the U. S. Department of Commerce.

Orders of the four companies totaled $370,000,000 during the first two quarters of 1926. This total represents an increase of fifty-seven per cent over the business of 1922. Total orders for the first six months of 1922 amounted to $236,000,000.

The rates of increase in sales each year in comparison with 1922 are as follows: 1923 fifty-one per cent; 1924 forty-three per cent; 1925 forty-four per cent, and 1926 fifty-seven per cent.

The total of orders received in 1923 is only $16,000,000 below 1926, it will be noted. The year 1923 has a history of large volume for all lines of business, while 1922 is what is known as a "bad" year.

Structural Steel Sales Shows Decline

July bookings of fabricated structural steel approximated 216,550 tons, against 219,600 tons in June and 247,050 tons in July, 1925, according to Department of Commerce. July orders were at the rate of 71 per cent of capacity compared with 72 per cent in June, and 31 per cent in July a year ago.

For the seven months ended July 31, bookings approximating 1,460,950 tons, against 1,609,750 tons in the corresponding period of 1925.

July shipments of structural steel were 265,350 tons, compared with 253,150 tons in June and 250,100 tons in July, 1925. In the seven months, shipments were 1,650,050 tons against 1,534,150 tons in the 1925 period.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

The annual convention of the International City Managers' Association will be held Sept. 21, 22 and 23 at Colorado Springs, Colo. John G. Stutz of Lawrence, Kansas, is executive secretary of the association.

Named by the Industrial Association of San Francisco as an "impartial wage board," Archbishop E. J. Hanna, Judge Max C. Sloss and Selha Chamberlain are to make a survey of building conditions and recommend wage scale for 1927, it is announced by J. W. Mailliard Jr., president of the association.

Elmer E. Pollock Sr., Sacramento lumber man with holdings in Siskiyou and El Dorado counties, died at his home in Sacramento, 1528 O St., following an illness of six months. Pollock was interested in the Ore Lake Lumber Company at Bray, Siskiyou County, and in the Sacramento Timber & Box Company at Diamond Springs, El Dorado County. He had resided in Sacramento from fourteen years.

A total of 2,848,244,631 ft. of lumber moved by water from the northwest coast during the first half of 1926, 837,-298,411 ft. being credited to California, 1,038,367,889 ft., to Atlantic coast and 925,362,095 went abroad. Japan was the best off shore customer with 488,-202,144 ft. Shipments for 1926 were about 600 million feet more than for the same six months of 1925, due to Japanese and East Coast demand.

Plumbing and electrical contractors operating in Stockton must register with the Building, Plumbing and Electrical Inspection Departments of the city, before Sept. 15. A new city ordinance providing for the licensing of contractors instead of the collection of fees has been placed in effect and provides for the examination of all electrical and plumbing contractors before they are granted their licenses to do businesss.

Exports of tractors from the United States have shown rapid and consistent increases during the past five years until at present they constitute about one-third of the total agricultural implement exports, according to the agricultural implements division. During the first six months of 1926 foreign shipments of wheel tractors amounted to 32,109, valued at $17,511,-000. This was more than $7,000,000 greater than the exports in the same period of 1925, and was greater than the tractor exports in any calendar year except 1925 since 1920.

McMyler-Interstate Co., Cleveland, Ohio, has appointed three new distributors in the West and Southwest. W. H. Worden Co., San Francisco, for California, Arizona and Nevada. C. G. Wolfradt, formerly Pacific Coast branch manager for the McMyler-Interstate Co., became affiliated with the Worden Co. August 1. The Holfius Steel & Equipment Co., Seattle, has been appointed distributor in the states of Washington, Oregon, and Idaho and Thurman G. Frazee, Houston, Tex., for the state of Texas.

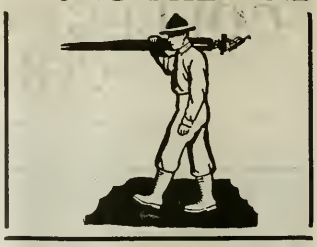
William S. Webber, retired San Jose cement contractor, died recently in Salinas. He was a native of England, aged 68.

Western Gas Equipment Corp. of San Francisco capitalized at $10,000, has been incorporated. Directors are: W. D. Dickey, K. C. Tomlinson and R. M. Ranyard.

Four suits for a sum aggregating $42,443.62, have been filed in the superior court at Sacramento by W. J. Feary as trustee for the California Brick Company. One suit is directed against the Valley Brick Company for $26,593.73, the sum of $5,318.75 is asked in each case in suits against Charles S. Mabrey and Earl Irish, and $5212.39 is sought from Edith Cummings. The three individuals are stockholders in the Valley Brick Company. The suits are for sums alleged due for services rendered and material furnished.

The National Lumber Manufacturers Association announces a joint meeting of the Merchandising Conference Committee of that Association and the Conference Committee of the National Retail Lumber Dealers Association will hold separate and joint meetings at the Congress Hotel, Chicago, September 14. The separate meetings will be held at 10:30 A. M., and the Joint meeting will be at luncheon at 12:30 P. M. This is the fourth meeting of these two committees which are endeavoring to promote better trade practices and more efficient merchandising.

ALONG THE LINE



American River Water and Power Company of San Francisco has filed application with the State Department of Public Works, Division of Water Rights, for the diversion of 200 second feet and 50,000 acre feet per annum from the north fork of the American River in Placer County, for the generation of electrical energy. The construction expenditure is estimated at $1,000,000. A reservoir will be constructed near Donner. A dam 30 feet high and 80 feet long is also contemplated.

The annual convention of the California Retail Lumber Dealers Assn. will be held at Sacramento Oct. 22 and 23.

Glenn Allen, Stockton architect, is confined to his home, due to a fall Sept. 4 while attending a circus in that city. He fell a distance of 10 feet, striking the ground on tne left side of his face and shoulder.

ORGANIZATION NEWS

FRESNO EXCHANGE TAKES NO AMERICAN PLAN ACTION

Though the labor situation in Fresno was discussed at length at a meeting Sept. 1 by directors of the Fresno Builders' Exchange, no decision was arrived at, either to come out in favor of renewing the Fresno plan agreement or definitely deciding to discard it, perhaps to back the proposed introduction of the American plan in Fresno.

The fact that three directors were not present at the meeting is thought to have influenced the decision of the board not to take any definite step.

President Joseph G. Martin and the majority of the directors declined to make any statements. Directors said that Martin alone was to issue a statement, and he proved uncommunicative. Beyond admitting that the meeting was held, he would not comment.

It is known, however, that members of the board of directors want to reach a virtually unanimous agreement among themselves before making a decision on renewal of the Fresno plan or deciding to disband the exchange. That is dictated by the necessity of having the organization leaders definitely backing the decision, whenever it is finally made.

Same time ago the directors were empowered by the membership to either disband or take any other step thought desirable.

The Builders' Exchange has heretofore regularly backed the Fresno plan, but following the temporary refusal of union leaders to sign the agreement for another year, has itself balked at a renewal of the plan which has maintained peace in the building trades of Fresno.

WESTERN PAINTERS TO CONVENE AT PORTLAND

The first annual convention of the Western Painting and Decorating Association is to be held at Portland, Ore., November 4, 5, and 6, it is announced yesterday by W. F. Blaesing, vice president of the Coast organization and a committee of 13 members has been appointed to arrange the program of events.

Tentative plans for the convention include a general meeting of the craft from California, Oregon, Washington and Montana, which will be presided over by Horace Mann, of Los Angeles, president. Men prominent in the paint industry as well as paint, varnish and wall paper manufacturers will give talks of interest. Exhibits will be arranged, to which the public will be invited.

Displays of the skill and ability of the Portland craftsman will be shown and an effort is to be made to inform the public of the adaptability of different finishes, designs and color schemes.

COLLEGE CHIEF DISCUSSES COURSE IN CONSTRUCTION

Abstract of Paper Prepared at Seventh Annual Convention of A. G. C. of America, by C. Edward Magnuson, Dean, College of Engineering, University of Washington

While I have little information as to what problems confront this convention, I venture to assume that the reason for placing the topic "College Courses on Construction" on the program indicates that contractors experience difficulty in securing a sufficient number of well qualified men to officer their organizations and that you believe a closer co-operation with engineering colleges and technical schools would improve the situation.

This dearth of trained men may be due to either

(a) Lack of suitable training for construction work in engineering colleges and technical schools, or,

(b) Inadequate machinery within contracting organizations for finding men who would prove useful in the construction field.

It may be well to note that the term "courses" as used in college catalogues has two distinct meanings. It may either mean a quarter's or a semester's work in some field, as calculus or physics, or a definite group of studies covering a 4-year period and leading to a degree. In most universities the word course is given the first meaning, that is, definite work for a semester or quarter in a specified subject, while the grouping of courses so as to cover several years, as may be required for a degree, is termed a curriculum. It is in this sense the words course and curriculum will be used in this paper.

In the catalogues of our leading universities, colleges and technical schools a large number of curricula are printed, offering students systematic training in preparation for future work in many fields, but I do not know of any institution having a four-year curriculum designed especially for young men who plan to enter the construction field. Probably the nearest approach would be curricula in structural engineering, but these deal with one phase or corner of your extensive field of operations. On the other hand all engineering colleges and technical schools offer courses in a variety of subjects desirable for students planning to do construction work.

Necessarily such fundamental work as drawing, mathematics, physics, chemistry, etc., is available in practically all institutions of higher education and a large number of more specialized courses related to construction are offered by most engineering colleges of recognized standing. Thus the University of Washington offers several courses in building construction and structural engineering. Also courses in architectural materials, materials of construction, engineering materials, cost analysis, management, engineering relations, business law, contracts and specifications, accounting, auditing, business organization, business correspondence and report writing, employment management, etc. Also a large number of courses on subjects more or less related to contracting, as for example, labor problems, industrial insurance, credits, etc.

In fact it appears that fairly satisfactory 4-year curricula in construction could be arranged in many of our leading engineering colleges by merely grouping courses at present offered and available to students. No doubt some course or courses dealing more specifically with construction would be desirable but it is not advisable for students to spend a large share of their four precious years in college acquiring detail information on any line of industrial activity. For let it be clearly kept in mind that a boy goes to college for the purpose of learning how to use his head not merely to fill it with a lot of more or less useful information.

The main object of engineering students while in college should be to gain insight into, and understanding of, fundamental principles, that is basic physical laws, by and under which engineers work, live and have their being; and to acquire a fair working ability to correctly apply these laws to quantitative practical problems. The engineering student should also become proficient in the handling of professional tools, the most important of which are mathematics, and English, both oral and written. The present trend in engineering education is strongly in the direction of more emphasis on fundamental laws, better working knowledge of elementary mathematics, more effective command of English, with corresponding less attention to current engineering practice.

Fifteen or twenty years ago the pressure was in the opposite direction and leading engineering colleges were vieing with each other in offering many pretentious courses covering in detail the latest practice in a number of industrial fields.

Frequently employers have little appreciation, of not only, what kind of training the student should have had while in college, but also, how much can reasonably be accomplished during four short years.

Undoubtedly most students waste much time in college by cramming their heads with more or less useful concrete facts relating to current practice, instead of focusing their attention on the **quantitative study of fundamental principles.** For in essence all college education should primarily be a training to think straight and for students who plan to enter the construction field the ability to think should be developed by the **study of fundamental physical laws and by their application to quantitative industrial problems.**

It is not necessary, nor even desirable that the young engineering graduate should be well versed in the details of current practice in any field, let alone in several lines. If he has gained a clear and comprehensive understanding of fundamental physical laws with the ability to apply hem directly to the solution of practical quantative problems, his four years in college have been spent to good advantage. It is far more important that he should have a thorough knowledge of elementary algebra and trigonometry than to have hazy recollections of differential equations or more complex mathematical operation.

College courses and curricula for students planning to follow industrial pursuits deal primarily with fundamental physical laws and their application to practical problems. Students should gain a firm foundation for future growth, learn how to think straight, and acquire sufficient mastery of English to express their views and ideas clearly and effectively.

If more and better technical graduates are needed in the construction demand for graduates and if possible field, establish a direct and consistent make selections from the senior class months before graduation. The lack of curricula in construction in college catalogues is prime facie evidence that the demand for graduates in this field is not felt in the colleges and hence the students do not know of the opportunities available in construction work.

Provide adequate personnel machinery for bringing the stronger and more promising students into your organization directly after graduation. It is of much greater importance to secure men with inherent ability than to specify what courses or curriculum should be taken in college.

The details of current practice in any line can to best advantage be acquired after graduation from college, in actual practice and under the direction of men on the job.

TRADE NOTES

D. J. Calkins, for the last three years treasurer of The American System of Reinforcing, has retired to devote his time to various private interests. Mr. Calkins organized the American System of Reinforcing of California, Inc., in 1917, and was at one time president of that company. When the present corporation was formed in 1923 Mr. Calkins became treasurer.

In a transaction in which the consideration is understood to have been approximately $100,000, the business of the Midstate Pipe & Supply Company, 434 P St., Fresno, was absorbed by the Fresno branch of the Walworth-Lally Company, which has been located at 735 H street, Fresno. The announcement is made by E. A. Neuport, vice president of the purchasing company. With completion of the consolidation the business will be continued at the P street address under direction of R. F. Carter, who has been manager for the Midstate Company. The consolidation is the second to be affected by the purchasing concern in recent months, the first being the absorption of the Mark Lally Company, Pacific Coast pipe, fitting and supply concern, by the Walworth Company, a nationally known manufacturer of valves, pipe and fittings, under the name of Walworth-Lally Company. The Midstate Company was a subsidiary of the Shinn-Holtz-Lyon Company of Los Angeles. Headquarters are maintained by the Walworth Lally Company in San Francisco, while the main office of the Walworth Company is in Boston.

Three Thousand Attend Builders Three-Day Outing At Santa Cruz

MEMBERS OF BUILDING FRATERNITY FROM EVERY SECTION OF NORTHERN AND CENTRAL CALIFORNIA ATTEND THREE-DAY OUTING AT SANTA CRUZ. EVERY BRANCH OF CONSTRUCTION INDUSTRY IS REPRESENTED. GAMES AND EVERY SORT OF AMUSEMENT PROVIDED IN LENGTHY PROGRAM. VALUABLE PRIZES ARE AWARDED. GOLF AND HORSE SHOE THROWING CONTESTS ARE BIG FEATURES

More than three thousand people—men, women and children—the building fraternity of Northern California and their friends—attended the three-day annual "Builders' Day" outing held under the auspices of the San Francisco Builders' Exchange at Santa Cruz, September 4th, 5th, and 6th.

Three days of continuous pleasure—golfing, dancing, bathing, boating, games of all sorts and fishing were enjoyed, occupying every minute of the three-day session.

A Paradise on earth for the kiddies and a practical vacation for the older folks, whose business it is to juggle figures and peruse plans and specifications for the twelve months in the year.

Everybody Was There

The Contractor and his superintendents—the Architects and his office force—the Materialman and his salesforce from the office boy to the president of the company—all these were there accompanied by their families and their friends.

Lengthy Program

A lengthy program comprising golf and athletic events was carried out on a minute schedule. Feature contests were the Golf and Tennis Tournaments and Horse Shoe Throwing. Valuable prizes, ranging from a ton of plaster to a ton of garden fertilizer were awarded. With the exception of the latter, practically every prize was a product manufactured for the construction interests.

Nunnn Gets First Prize

The feature gate prize, a set of silverware valued at $150, was carried off by Jerry Nunan of the Golden Gate-Atlas Materials Company. The prize was the donation of Wm. H. George, president of the San Francisco Builders' Exchange and secretary-manager of the Henry Cowell Lime & Cement Company.

State Delegates Welcomed

Saturday afternoon the outing officially opened with the reception of delegates to the State Convention of Builders' Exchanges and the opening of the Golf Tournament, followed by the usual opening banquet in the Hotel Casa Del Rey. Dancing and entertainment was then enjoyed until midnight.

Builders Catch Fish

Sunday morning opening with a fishing trip on Monterey Bay, continuance of the Golf Tournament and athletic events.

Horse Shoe Contest

W. S. Howe and F. O. Farris of the San Jose Builders' Exchange carried off highest honors in the Horse Shoe Throwing Contest. Twenty-four entries were made in this event and due to the interest shown it is proposed to enlarge upon the program for a similar event next year. The following is a complete tally of the scores for this contest:

Round 1—Frank Lansing and Dan Wagner, 22 vs. W. E. Shaw and V. Devight, 16; W. S. Howe and F. O. Farris, 21 vs. A. Dean and F Roach, 13; J. Donnelly and J. Turner, 21 vs. Capt. Thomas and Bill Stanley, 11; J. S. Guerin and Frank Smith, 17 vs. E. Moore and H. R. Kingsley, 21; Arthur Olden and W. Browell, 19 vs. H. Coffman and J. A. Triscuit, 22; P. F. Reilly and M. J. Mealey, 21 vs. Albert Fabre and Hildebrand, 7.

Round 2—Frank Lansing and Dan Wagner, 21 vs. H. Coffman and J. A. Triscuit, 9; W. S. Howe and F. O. Farris, 21 vs. E. Moore and H. R. Kingsley, 16; P. F. Reilly and M. J. Mealey, 5 vs. J. Donnelly and J. Turner, 23.

Round 3—Frank Lansing and Dan Wagner, 21 vs. J. Donnelly and J. Turner, 18; W. S. Howe and F. O. Farris xs. By ——.

Final—W. S. Howe and F. O. Farris, 21 vs. Frank Lansing and Dan Wagner, 16.

Tennis Tournament

E. J. Cardinal, publisher and general manager of the Daily Pacific Builder, in one of the hottest tournaments staged on the Casa Del Rey courts, won over Chas. W. Gompertz, president of the California State Builders' Exchange, in the tennis tournament. Gompertz played a fast game and kept Cardinal on the go from start to finish. However, in the words of that esteemable gent Daniel Webster, who defines the word "Youth" as "the part of life that succeeds to childhood," Cardinal carried off the winning honors. Charlie is often referred to as a "retired contractor," to this title he may now add the title "defeated tennis champion" of the Builders' Exchange.

Kiddies' Banquet

Sunday evening the Kiddies' Banquet was held under the auspices of the Mothers' Committee. The banquet was complete in every particular. Special music and entertainment was provided for this event and prizes of considerable value in the kiddies' world were distributed. Tables were appropriately decorated and complete insofar as real chinaware and silverware were concerned. Eighty-five children were seated. Entertainment was furnished by Miss Barbara Odgers (daughter of Joe Odgers), Mrs. E. Gallagher, Mrs. Vera McKenna and Elmer Gallagher. The Kiddies' Banquet was held under the auspices of the Mothers' Committee, comprising: Mrs. Wm. J. Feary, Mrs. M. H. Gnecco, Mrs. Steve Guerin, Mrs. W. H. George and Mrs. Wm. Simpson.

Ladies' Brick Contest

This contest was the supreme event for the ladies. With the shout of the announcer, Geo. Dixon, the air was filled with cheers and several brick walls started to pile up on the platform. The speed with which the contestants worked prompted one to recall the famous ride of Paul Revere. The contest established three facts if women are to enter the brick laying business: (1) that gloves should be provided to eliminate the possibility of blisters; (2) that bricks should be made smaller to permit easier handling; (3) that brick work should start at least three feet above ground to eliminate the development of a sore back.

Nail Driving Contest

The Ladies' Nail Driving Contest was a knock-out, both for the nails, the contestants and the spectators. This event brought out the fact that the fair damsels could not work on finished lumber without killing the job. Contestants complained the nails lacked heads of sufficient size—that the hammers were too heavy and that some hammers have crooked handles which caused them to make many a miss. The first prize in this contest, an ice box donated by Hart & Burmeister, was awarded to Mrs. F. C. Sommers of Santa Cruz.

Treasure Hunt

Captain Kidd's Treasure Hunt proved a rare treat for the youngsters. Elmer Gallagher, playing the part of Captain Kidd, the notorious pirate, assisted by eight other pirates made the home run play with the thousands of children gathered on the beach. With swords waving and with wild shouts the Captain and his crew greeted the youngsters. He announced he was in search of a treasure which he knew was buried on the beach. After staking out the treasure ground the Captain announced the rules of the hunt and with the signal to start the search, thousands of kiddies were turning over the beach. Twenty bags were burled in the sand. Each youngster finding a bag was given a cash award.

King Neptune Arrives

King Neptune, the Czar of the Sea, made a second home play with the kiddies. Wth his court of mermaids and able men of the deep he entertained with stunts that kept the children considerably amused. Due to the courtesy of Chris Berg, the King (Rex Thomas) had sufficient all day suckers and other candies to keep the youngsters supplied for the day.

Main Prize Awards

Main gate prize awards, made from the Contest Platform on the beach, were made as follows:

Steel filing cabinet, valued at $40, donated by Berger Manufacturing Co., awarded to Mr. E. J. Cardinal, publisher and general manager of Daily Pacific Builder.

Gas furnace, valued at $40, donated by Atlas Heating & Ventilating Company, awarded to Mr. W. E. Roberts of Stockton.

One carload of sand, valued at $30, donated by Pratt Building Material Co., awarded to Chris Berg of the Port Costa Brick Works and United Materials Company.

One ton hydrated lime, valued at $25, donated by Holmes Lime & Cement Company, awarded to Mrs. J. I. Stark, (wife of publisher of Daily Pacific Builder).

One ton Empire Finish Plaster, valued at $20, donated by Pacific Portland Cement Company, awarded to Mrs. D. Moore of San Francisco.

Six rolls of Malthoid roofing paper, valued at $15, donated by Alta Roofing Company, awarded to Miss Mary Pappas of Santa Cruz.

Twenty-five joist hangers, valued at $12.50, donated by Capitol Art Metal Works, awarded to Mrs. F. Lansing of San Francisco.

One ton of garden fertilizer, valued at $10, donated by B. Rosenberg, awarded to W. Baker of San Francisco.

Credit to Committee

Credit for the success of the 1926 Outing is due to the untiring efforts and never ceasing labors of the Committee on Arrangements comprising: Sam F. Cohn, Wm. F. Feary, Clarence F. Pratt, L. J. Neal, A. H. Bergstrom, Steve I. Guerin, Fred H. Green, Jas. E. Fennell, Nathaniel A. Dickey, Wm. Simpson, J. E. Odgers, Al. White, M. H. Gnecco and S. A. D. Schenck.

Following are the results of the 1926 "Builders' Day" Outing Golf Tournament, as reported by Fred H. Green, chairman of the Golf Committee:

Saturday Sept. 4th

Blind Rogey. Won by Rod Guyett; **Runner Up,** Won by J. P. Dwan; **Consolation,** Won by B. J. Joseph; **Low Gross Men,** won by H. W. Cookson;

Low Gross Ladies, won by Mrs. F. H. Green.

Sunday, Sept. 5th

Low Net Members, won by G. Gale; **Runner up**, won by E. H. Peterson; **Low Net Guests**, won by W. Schimperfman; **Runner up**, won by N. D. Cook; **Low Net Ladies**, won by Mrs. J. B. Woolfrey; **Runner up**, won by Mrs. F. H. Green.

Monday, Sept. 6th

Low Gross men, 54 holes, won by F. Blodgett of National Surety Co.; **Runner up**, won by H. W. Cookson; 3rd E. Price; **Low Gross**, ladies, won by Mrs. F. H. Green; **Runner up**, 54 holes, won by Mrs. J. B. Woolfrey.

Ladies Putting Contest

1st Prize, 1 doz. galf balls, won by Mrs. F. L. Levie; 2nd prize, Auto Policy, won by Mrs. T. W. McClenahan.

Low Net, 36 holes, men members, won by F. H. Green Jr.; **Runner up**, H. W. Evans.

Ladies Low Net, 36 holes, won by Mrs. F. H. Green; **Runner up**, Mrs. J. B. Woolfrey.

Committee Handicap won by A. J. Falvey; **Runner up**, F. H. Green.

PACIFIC TANK & PIPE IS PURCHASED BY TILDEN CO.

It is understood that Tilden Lumber Company has completed negotiations for the purchase of the Pacific Tank & Pipe Company, which the Tilden Company has been operating for two years under an option lease contract.

The consideration of purchase is reported to run near a million dollars.

The Pacific Tank & Pipe Company is one of Oakland's substantial industries. It owns 41 acres of waterfront property on Oakland's inner harbor above Brooklyn basin, and operates a modern factory devoted to production of redwood pipe, wood tanks and containers, cross arms, ironing boards, cabinets, wall board, and other wood products.

It has a substantial hold in the southern California market and operates a branch factory at Vernon.

The Tilden Lumber Company is one of the largest distributors of lumber on the Pacific Coast. It was founded at Richmond 25 years ago by E. M. Tilden, who is still the guiding genius of the firm.

From the modest beginning at Richmond Tilden has expanded his operations until he now operates yards in 25 cities and towns in central California, and in addition operates finished wood products mills at several points including large mills at Oakland, Berkeley, and San Jose.

The company's far-flung activities are indicated by the fact that offices are maintained in New York, Denver and Honolulu.

The company's last big expansion move was in 1924 when it acquired all the assets of the Hogan Lumber Company, control of which was purchased in 1917.

Total assets after the new merger will be around $4,000,000.—Oakland Post-Enquirer.

Bulletin On State Control Of Wage Payments Available

How far legislatures can go in fixing the conditions of labor contracts is an unsettled question. That rates of wages can not be determined in private employments seems fairly established under existing constitutional provisions and construction. However, many factors of the relationship between employers and employees are controlled, or control is attempted, by law. Contract based on custom, embodying the experience of many years, still requires judicial enforcement, in view of the proverbially conflicting interests of buyer and seller; and when the commodity at stake is labor, the sole dependence of the vendor and his family, the disadvantage of the necessitious man is commonly regarded as a matter of public concern, as to which the State may properly act on the basis of public welfare.

Among the various fields of legislative action in this connection is that of regulating the payment of wages, involving questions of frequency, payment at termination of employment, medium, status of wage debts in relation to other obligations of the employer, security from attachment or other form of seizure, etc. In theory two parties, free agents in the matter of bargaining, might be left to settle all these questions by the contract freely made between them; but inequality of economic conditions opens the door for oppressive terms and diverse responsibilities. For the most part the laws of the class in question are for the protection of the working man whose need for prompt and sure remuneration for his services is usually urgent; and while all legislation of the sort is clearly an interference with the freedom of contract, it has been recognized, after some adverse judgments, that it is for the public welfare that the weaker party to the wage contract should receive protection by law.

The various ways in which such protective legislation has found expression, and different classes of evils sought to be remedied are set forth in Bulletin No. 408 of the United States Bureau of Labor Statistics, in which the texts of laws are reproduced, together with summaries of decisions of the courts construing such legislation, and an enumeration of certain standardized requirements found in the various States of the Union. It is procurable on application to the Superintendent of Documents, Government Printing Office, Washington, D. C., at 25 cents a copy.

Safety In Building Construction

For several years a sectional committee has been at work under the auspices of the American Engineering Standards Committee, and under the official leadership of the National Safety Council, on a national safety code for construction work. Successive drafts had been prepared, and it was hoped that the code was nearing completion when important differences of opinion developed within the sectional committee. As the result of an informal conference, the sectional committee has now agreed upon certain changes in objective and in administrative arrangements through which it is hoped to complete its first report at an early date.

That part of the code dealing with construction of buildings will be completed first, leaving general engineering construction work, such as dams, tunnels, bridges, etc., for later consideration. When completed, the first report of the sectional committee will be submitted to the American Engineering Standards Committee for approval as "Recommended Safe Practice".

The sectional committee will be enlarged so as to make it more thoroughly representative of the industry as the latter is at present organized. For example, the number of representatives of the Associated General Contractors, whose relation to this work is very important, will be increased to four. In all, fourteen national organizations, and the industrial commissions of California, Illinois, New Jersey, New York, Ohio and Wisconsin will be officially represented. All of the cooperating bodies are being requested to review their representation and make such changes as they may desire.

A principal consideration in making these modifications in the work was the large number of serious accidents which are occurring in the industry, and the rapid increase in the number of accidents in some jurisdictions. For example, in Pennsylvania in the first three months of 1926 there were 25% more construction accidents than in the corresponding period of 1925, in which the number was 19% greater than in 1924; and casualty insurance rates have mounted very high, the rate in New York State for iron and steel erection being over $27 per hundred dollars of pay roll.

RELATION OF LABOR COSTS AND MATERIAL PRICES

The upward tendency of wage rates in many of the larger cities of the country this year has had the effect of still further increasing the wide difference between labor costs and material costs in the construction industry. The general trend of material costs has been downward since the middle of 1920 when for the last time graphs representing material and labor costs met. Except for a slight recession beginning in 1921 and continuing into 1922 the general trend of labor costs has been upward. Taking January 1923, as 100 for the starting point, the cost of labor stood at 119 in July of last year. During July of this year it reached 124.8 showing an increase of about 6 per cent in twelve months. Building material costs declined to 82.5 in June of last year and in June of this year stood at about 81. The upward movement of wages this year was contrary to many expectations. Well informed opinion on the situation considers the building wake out of proportion with that of the industry and reaction will come sooner or later.—(Bulletin, Nat'l. Assn. Bldg. Trades Employers).

"TWIN PEAKERS" AT GROVE JINKS

Part of Realty Row and the building fraternity of San Francisco, as well as a majority representation of the West of Twin Peaks real estate men, cast aside all thought of sales and construction worries last week, and hied themselves to the Redwood Shrine of Islam Temple, La Honda, for the three-day annual outing.

But just to keep their hands in and not forget all about the business of liens and leases and contracts, they stuck together and set up headquarters in a mammoth tent. Each realtor and business man carried his sign with him, and when the tent was finally decorated, it looked like the directory of a thirty-story building such as the realtors are some day going to build for themselves.

Clarence Sandy Pratt, President of the Pratt Building Material Company, and **"Mayor" of beautiful Westwood Park**, dislikes publicity so he had but one sign and told reporters to leave his name out of the story, so he will be mentioned only once. Even the threat of punishment, however, could not keep Hans Nelson, builder of Westwood Highlands and Monterey Heights, from frequent mention of the Ocean Avenue Improvement Club. Since he holds office in it, he was forgiven. Chief among the nobility of the realty tent were Charlie Holt and George Leonard, developers of Ingleside Terrace and the Highlands of Emerald Lake. Others who upheld the glory of West of the Peaks were Harry H. Kahn of Ingleside Terrace, Dr. A. H. White, the first resident of Ingleside Terrace; St. George Holden, well-known real estate operator; Geo. W. Boxton, prominent builder; W. F. Schimferman, Westwood Parker; George L. Edmondson of West Portal; Otto B. Dreusck, large manufacturer of metal products; E. E. Hutchinson, Westwood Highlands resident and engineer; Geo. Y. Morton, well-known plumber; Thomas Quinn, purchasing agent, George H. Tay Co.; Clem T. Reese, historian of Islam Temple; F. D. Bartlett of Forest Hill; C. M. Farrow, prominent Builders' Exchange member.—By Claude A. La Belle, Real Estate Editor, The San Francisco Examiner, September 4th, 1926.

HE WOULD still.

BE PEDDLING ice.

IN AN Illinois town.

CHARLEY CHAPLIN wouldn't have.

SO MUCH money now.

IF HIS name.

HAD NOT been in print.

SANDY'S FRIEND, Claude Le Belle.

WRITES ABOUT real estate.

BUT SANDY wonders.

IF THE newspaper "Bell."

REALIZES THAT Sandy, too.

SELLS REAL estate.

BUT SANDY washes all.

HIS REAL estate (sand, rock, etc.)

MOST REAL estate dealers.

SELL YOU "dirt."

SANDY WASHES all "dirt."

FROM HIS sand and rock.

PRODUCED AT Prattrock (near Folsom).

SACRAMENTO, MARYSVILLE.

AND PRATTCO (Monterey County).

BUT SANDY had fun.

WITH THE real estate men.

AND THE builders.

AT THE Islam Redwood Grove.

AND WHILE Sandy Pratt.

CLOSED NO sales or orders.

OF SAND, rock or gravel.

MRS. SANDY says.

NO PROSPECTIVE customer.

COULD LIVE even.

IN AN 1800 acre grove.

OF REDWOOD trees.

FOR THREE days.

WITH SANDY.

WITHOUT HEARING.

ABOUT SANDY'S rock and sand.

"I THANK you."

Claude A. La Belle, Real Estate Editor of the San Francisco Examiner, who writes about real estate (and Sandy Pratt—see story above) but who never mentions Sandy's real estate—clean, sharp sand and clean, hard rock. Perhaps it is because the "dirt" (real estate) has been removed.

Official Proposals

NOTICE TO CONTRACTORS

(San Mateo Union High School District)

Notice is hereby given that the undersigned trustees of the San Mateo Union High School District, San Mateo County, Calif., will receive sealed bids up to the hour of **seven-thirty (7:30) o'clock p. m., on Thursday, the 30th day of September, 1926,** at the office of the San Mateo Union High School, San Mateo at which said time and place said bids will be publicly opened for the following:

1. Industrial and Applied Arts Building, two story brick and concrete.
2. Academic Building, two story and basement brick and concrete.
3. Plumbing for the above two buildings separate contract.
4. Heating for the above two buildings separate contract.
5. Electric wiring for the above two buildings separate contract.
6. Painting for the Academic Building separate contract.

All bids will be addressed to the Clerk of the said Board of Trustees and must be accompanied by a certified check made payable to the order of aforesaid Clerk in amount equal to at least ten (10) per cent of the largest bid so submitted, and no proposal will be considered by said Board unless accompanied by such check.

The said check to be forefeited to said School District, as ascertained and liquidated damages in case the successful bidder fails or refuses to enter into a contract to perform the work, and give satisfactory bonds required, within ten days after the date of the award.

The plans and specifications for said work may be obtained from E. L. and J. E. Norberg, architects, 407 Occidental Avenue, Burlingame.

The said Board of Trustees expressly reserves the right to reject any and all bids. A deposit of $25 required on plans.

Done by order of the Board of Trustees of the San Mateo Union High School District, San Mateo County, California.

N. D. MORRISON, President.
J. R. MURPHY, Clerk.

NOTICE TO CONTRACTORS

(Connecting Wharf — State Board of Harbor Commissioners)

Office of the Board of State Harbor Commissioners, Union Depot and Ferry House, San Francisco, California, August 28, 1926.

Sealed proposals or bids will be received at this office at or prior to **2 o'clock p. m., Thursday, September 23, 1926,** for furnishing necessary materials, labor and equipment and constructing a connecting wharf between Pier 23 and Pier 25, on the waterfront of the City and County of San Francisco, in accordance with plans and specifications approved by the Board August 26, 1926, and on file in this office, to which special reference is hereby made.

The work to be done under these specifications consists in removing such portions of abandoned existing structures as are within the lines and which will interfere with the construction of the new work, furnishing all necessary materials, labor, tools, machinery and equipment for constructing a connecting wharf between Piers 23 and 25.

The materials to be used in this work shall consist of the requisite quantities of creosoted piles, green pile butts, Douglas fir lumber, castings, structural steel, rods, bolts, spikes, etc. Creosoted piles will be furnished to the contractor by the Board. All other materials shown on the plans or called for in these specifications shall be furnished by the contractor.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal, to be made payable to the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail or neglect to execute a contract and give the bond required within six (6) days after the award is made, in that case the said sum mentioned in said check shall be deemed liquidated damages for such failure and neglect, and shall be paid into the San Francisco Harbor Improvement Fund.

Bids will not be considered by the Board unless delivered to the Secretary or to the Assistant Secretary, at the office of the Secretary, Room No. 17, Union Depot and Ferry House at or prior to 2 o'clock p. m., on Thursday, September 23, 1926, at which time and place the bids will be publicly opened.

The Board reserves the right to reject any or all bids if deemed for the best interests of the State.

Plans and specifications for this work to be had at Room 18, Union Depot and Ferry House, upon depositing $10.00 for same, which will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid: "Bid for constructing a connecting wharf between Piers 23 and 25."

WM. A. SHERMAN,
M. F. COCHRANE,
JOHN B. SANFORD,
Board of State Harbor Commissioners.
FRANK G. WMITE,
Chief Engineer.
J. L. PHELPS, Secretary.

NOTICE TO CONTRACTORS

(Paving—Sacramento County)

Notice is hereby given that the Board of Supervisors of Sacramento County, California, will receive sealed bids at the office of the clerk of said Board, Room 201, Court House Building, Sacramento, California, for the construction of a Portland Cement Concrete Pavement on the back road of Reclamation District No. 551. This pavement is to begin at the Pump House Road and continue northerly to the top of the levee.

Said bids to be received up to **ten o'clock a. m., September 13th, 1926.**

Each bidder must submit a proposal to the Clerk of the Board of Supervisors on standard forms which may be obtained from the office of the County Engineer, said proposal to be accompanied by a certified check of ten per cent of the amount of the bid submitted, check to be made payable to the Chairman of the Sacramento County Board of Supervisors.

Plans and specifications are on file in the office of the County Engineer, to which all prospective bidders are hereto referred.

The Board of Supervisors reserves the right to reject any and all bids received as the public good may require.

By order of the Board of Supervisors, Sacramento County. Dated August 27th, 1926.

HARRY W. HALL,
Clerk and Ex-Officio Clerk of the Board of Supervisors.
By William Hickey, Deputy Clerk.

4 12-inch x 4-inch Condensed Cast Iron Reducers.

Pipe to be not less than 12 foot lengths, free from cracks and breaks. Broken pipe to be replaced by successful bidder.

Pipe and fittings to be delivered f. o. b. Santa Cruz. Delivery to be made within 75 days after award of contract. Said proposals or bids will be received at the office of the City Clerk in the City Hall, Church Street, in the City of Santa Cruz, on or before 9 o'clock in the forenoon of Thursday, the 16th day of September, 1926. Bids will be opened at 9:30 o'clock in the forenoon of said day.

All proposals or bids must be in writing, give the total amount of bid submitted and must be accompanied by a certified check or bond for ten per cent of the amount bid, payable to the City of Santa Cruz. The Coun the City of Santa Cruz.

The Council of said City reserves the right to reject any and all bids.

Dated September 7, 1926.

S. A. EVANS, City Clerk.

PROPOSALS

Sealed proposals will be received by the Board of Public Works, San Francisco, California, on WEDNESDAY, SEPTEMBER 15, 1926 between the hours of 2:00 and 3:00 o'clock P. M. for the following public work, to wit:

For the Construction of Aqueduct Tunnels in the Foothill Division of the Hetch Hetchy Aqueduct. Contract No. 113, Hetch Hetchy Water Supply.

Proposal forms, specifications and further information may be had on application to the City Engineer, City Hall.

A deposit of $10.00 is required for the specifications.

(tf)

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

Separate sealed proposals will be received at the office of the California Highway Commission, Redding, California, until **2 o'clock P. M. on Monday September 13, 1926,** at which time they will be publicly opened and read by the Division Engineer, for the construction in accordance with the plans and specifications therefor, to which special reference is made, of two groups of buildings at two separate maintenance yards, as follows:

PROPOSAL NO. 1. The erection and completion of all items as called for in the plans and specifications, including all materials and all incidental work, for Foreman's cottage, bunkhouse, blacksmith shop and septic tank, at the Highway Maintenance Yard at Boulder Creek, in Shasta County, near Gibson.

PROPOSAL NO. 2. The erection and completion of all items as called for in the plans and specifications, including all materials and all incidental work, for Foreman's cottage, truckshed, blacksmith shop and septic tank, at the Highway Maintenance Yard at Douglas City, in Trinity County.

Separate contracts will be awarded for each proposal. A contractor may submit bids for either one or both, but where bidding on both proposals, separate bids must be made on each.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the office of the California Highway Commission, Redding, California, or plans and specifications will be furnished to interested parties at a cost of $2.00 for each proposal.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Special Requirements" annexed to the blank form of proposal, for full directions as to bidding, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

NOTICE TO CONTRACTORS

Bids Wnnted for Highway Improvement

Sealed proposals will be received by the undersigned **at 1:30 P. M. on September 22, 1926,** for constructing a portion of the state highway system in Churchill County, between Sand Springs and 1½ miles west of Frenchmens, length 6.54 miles, work consisting of grading, construction of structures and placing of gravel surface.

Plans may be examined and form of proposal, contract and specifications secured in the office of the undersigned; also may be examined in the county clerk's office at Fallon; the division offices at Elko, Reno, Ely and Las Vegas; and the district office of the Bureau of Public Roads, 461 Market Street, San Francisco. For copy of each set of plans, undersigned requires a deposit of Fifteen Dollars ($15.00), Ten Dollars ($10.00) of which will be refunded upon return of plans in good condition within thirty (30) days after opening of bids. Bids must be on proposal from Highway Department and must be accompanied by a certified check in the amount of five per cent (5%) of bid.

Each bidder must accompany his bid with certificate from a surety company duly authorized to do business in Nevada stating that such surety company will provide said bidder with bond in such sum as is required in and in accordance with the provisions of said specifications, conditioned for faithful performance of the contract and specifications.

Right is reserved to reject any or all bids.

GEO. W. BORDEN,
State Highway Engineer, Carson City, Nevada.

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until **2 o'clock p. m. on October 4, 1926,** at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Los Angeles County, two reinforced concrete slab bridges across La Placerita Creek about ½ mile north of Newhall (VII-LA-4-E), one consisting of one 18-foot span and the other consisting of six 18-foot spans.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

NOTICE TO CONTRACTORS

(Connecting Wharf — State Board of Harbor Commissioners)

Office of the Board of State Harbor Commissioners, Union Depot and Ferry House, San Francisco, California, August 28, 1926.

Sealed proposals or bids will be received at this office at or prior to **2 o'clock p. m., Thursday, September 23, 1926,** for furnishing necessary materials, labor and equipment and constructing a connecting wharf between Pier 23 and Pier 25, on the waterfront of the City and County of San Francisco, in accordance with plans and specifications approved by the Board August 26, 1926, and on file in this office, to which special reference is hereby made.

The work to be done under these specifications consists in removing such portions of abandoned existing structures as are within the lines and which will interfere with the construction of the new work, furnishing all necessary materials, labor, tools, machinery and equipment for constructing a connecting wharf between Piers 23 and 25.

The materials to be used in this work shall consist of the requisite quantities of creosoted piles, green pile butts, Douglas fir lumber, castings, structural steel, rods, bolts, spikes, etc. Creosoted piles will be furnished to the contractor by the Board. All other materials shown on the plans or called for in these specifications shall be furnished by the contractor.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal, to be made payable to the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail or neglect to execute a contract and give the bond required within six (6) days after the award is made, in that case the said sum mentioned in said check shall be deemed liquidated damages for such failure and neglect, and shall be paid into the San Francisco Harbor Improvement Fund.

Bids will not be considered by the Board unless delivered to the Secretary or to the Assistant Secretary, at the office of the Secretary, Room No. 17, Union Depot and Ferry House at or prior to 2 o'clock p. m., on Thursday, September 23, 1926, at which time and place the bids will be publicly opened.

The Board reserves the right to reject any or all bids if deemed for the best interests of the State.

Plans and specifications for this work to be had at Room 18, Union Depot and Ferry House, upon depositing $10.00 for same, which will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid: "Bid for constructing a connecting wharf between Piers 23 and 25."

THE CONTRACTORS' ROOM

BUILDING AND ENGINEERING NEWS maintains a Contractors' Room where plans and specifications may be filed by Architects, Engineers and Owners for the convenience of bidders in San Francisco and the Bay Counties.

Architects, Engineers and Owners are invited to forward plans of their projects to BUILDING AND ENGINEERING NEWS. No charge for this service. The plans will be returned in good condition when contract for work is let.

Permanent Walls

with Quick Construction

THERE'S more to Schumacher Plaster Wall Board than speed in construction. It's designed to build permanent walls.

That's the big advantage to this plaster wall board. You can use it for the finest interiors, yet you can build them in record time.

You'll save on labor. You'll save time. And you'll win the appreciation of the owner, for he can move in as soon as the last nail is driven in place.

U. S. CONSTRUCTION IS KEEPING ABREAST OF 1925

Construction operations are keeping abreast of the records set in 1925, the greatest building year in the history of the country. The total volume of operations carried on during the first eight months of 1926 is three per cent larger than the corresponding volume registered last year, according to statistics compiled by the Associated General Contractors of America.

The margin over last year's figures was somewhat reduced during August when the total for the month dropped six per cent below the figure set in July. This loss was compensated largely by the mass of work handled during July, when the previous "single month record" was broken.

The volume of operations recorded for August has been exceeded in only five months; July, August and September, 1925, and June and July, 1926.

The peak of operations last year was not reached until September, though figures set in each month following May and before December were above the previous high mark established in August, 1924. Construction activities this year have shown more of an inclination to spurt. This is shown by the fact that although only three months in 1926 have produced levels above that reached in August, 1924, the total for the first eight months stands higher than that achieved by the comparatively consistent trend of 1925.

The index number for August of this year, based on the average volume of construction in 1913 as 100, was 215. The July index number was 228.

PROGRESS IN TECHNOLOGY OF SLATE

Rapid progress has been made recently in developing new and improved processes for the mining and manufacture of slate, states the Bureau of Mines, Department of Commerce, following a survey of the industry. Such changes in technology are indicative of the present tendency to place the industry on a better basis both as regards processes and products. Roofing slate which was formerly manufactured in small independent "shanties" is now produced in many places in large mills provided with power saws, travelling cranes and other labor saving devices. A pneumatic splitter has also been introduced to take the place of the ordinary chisel and mallet. A slate with lacquered surface in various colors and patterns has lately been placed on the market for sanitary uses, and heavy "architectural" roofing slates have come into greater prominence. Great progress has been made in studies of the physical and chemical properties of slates, the accumulated knowledge thus gained enabling the producers to direct each type of slate to its particular field, and thus constantly to provide more serviceable and dependable products.

Slate has been called "The sheltering stone" because one of its principal uses is for roofing, states Oliver Bowles, superintendent of the Non-Metallic Minerals Experiment Station of the Bureau of Mines, New Brunswick, N. J., in a report just published. Structures as humble in character as sheds and barns, those of imposing dimensions such as colleges, hospitals and churches, as well as all intermediate types of buildings, have found ample and enduring protection from the elements when properly roofed with this natural rock material, slate, which is peculiarly adapted for splitting into thin slabs. Other improvement uses are for electrical switchboards, and structural uses such as stair treads, floor tile and base boards.

STEEL MERGER WILL AFFECT UNITED STATES TRADE

The combination entered into by the French, Belgian, Luxemberg and German steel manufacturers is of importance to the export and domestic iron and steel trade of the United States. This proposed combination is designed to regulate prices for domestic consumption and put an end to disastrous competition in the respective home markets of countries with depreciated currencies.

Of special interest to American steel manufacturers is the combined participation of the group of plans for further extending their export steel for sale in their home markets, thus enabling them to obtain high prices on domestic consumption which will compensate for lower prices abroad. In other words, domestic restrictions will be resorted to for the purpose of artifically lifting prices, and domestic customers will be in a position of paying more for their requirements to enable foreign producers to sell their products in export markets at prices which will be well under the quotations of American markets. Exchange.

PROTECTING THE PUBLIC DURING BUILDING OPERATIONS

Temporary structures on and around construction jobs and especially those to be used by the general public should be designed and erected with a maximum of care, says Engineering News-Record. Too many of them are fall-down. When a trestle-sidewalk structure without warning falls into a foundation excavation injuring several passers-by, when a half block of street decking over a subway operation completely collapses, even though commendable policing prevented injury to anyone, or when a temporary detour bridge is crushed beneath a truck it is not enough to say that some such failures are inevitable and must be charged to a so-called natural construction hazard. Nor can any satisfaction or redress be gained by blaming the public for sometimes taking unnecessary chances. To the average man any assembly of lumber around a construction job open to the public is permanent. Should this assembly be a bridge, a trestle-sidewalk or a decked street his thinking reactions toward any danger of collapse are probably nil. Likewise he will stand directly beneath a bundle of steel members as they are being hoisted 10 to 20 stories above the street while under the same conditions contractors' workmen will be found at a safe distance and with heads up. This contrasted attitude illustrates the crux of the whole matter of providing protection for the public—temporary structures entirely adequate for use by workmen on the job are dangerous when accessible to the layman. Most workmen have a construction sense while the man of the street has none. It is therefore incumbent upon the contractor to minimize the injury hazards around his job by providing safer temporary structures for the public's use.

U. S. INVESTIGATION OF SHINGLE INDUSTRY UNDER WAY

To investigate the needs of the shingle industry in the matter of tariff protection against the free entry of shingles into the United States from British Columbia, President Coolidge has caused Franklin H. Smith, chief of the lumber division, and O. B. Ryder, chief economist of the United States tariff commission, to visit Pacific coast points, and discuss the problem with manufacturers.

Smith and Ryder attended a meeting of shingle manufacturers at Portland, Ore., recently and also attended a similar meeting at Raymond, Wash. The Raymond meeting was the last of a series held along the west coast.

The tariff commission has eight accountants visiting Pacific coast mills to determine the comparative costs of operation between the American mills and those of British Columbia, the latter mills, it was pointed out being operated principally with Oriental labor. A report of this investigation will be made to President Coolidge not later than November 15, with the view of having the matter presented to congress during its session in December.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Santa Cruz city council is considering adoption of an electrical ordinance providing for the appointment of an electrical inspector and raises in licenses from $25 to $100 a year.

Wm. Elsworthy, 58, manager of the Gustine Lumber Company at Gustine, died in that city Sept. 12 following an attack of apoplexy. A widow survives.

Provision will be made on the November ballot in Berkeley for the voting of bonds of $3,475,000 to finance the erection of new schools and additions to standing structures.

A resolution asking that redwood be used in the construction of the new county hospital buildings has been presented to the Humboldt County Supervisors by the Eureka Chamber of Commerce. "Redwood is fire resistant, is more quake proof than other materials and is cheaper than other materials," the chamber claims.

A proposed charter amendment intended "to correct a bad condition" in city building by the creation of a City Bureau of Architecture which would have charge of preparing plans and specifications for all public buildings, has been presented to the San Francisco Board of Supervisors by Jas. McSheehy, chairman of the finance committee of that body.

State Railroad Commission has directed the Southern Pacific to file within 120 days, plans and specifications for a grade separation at the Los Feliz and Glendale-Brand highway crossing in Los Angeles county, considered the most important crossing in Southern California. Company engineers estimate the cost at $1,000,000. The commission's action is the forerunner of a movement to elliminate sixteen dangerous crossings on the Southern Pacific lines between here and Los Angeles, at an estimated total expense of $5,000,000.

A suit to recover $5,081.60, alleged to be due for labor and materials used in the construction of the Melones Railway and wagon road in Tuolumne County has been filed at Sacramento by the Sierra Railway Company of California against the Oakdale and South San Joaquin Irrigation Districts, Mathews Construction Company, contractors, and Virgilio & Bican, sub-contractors. The action was transferred to Sacramento from the San Francisco superior court.

After several weeks of investigation, the Stockton City Council has adopted a resolution accepting the new $650,000 city hall from Howard S. Williams, San Francisco general contractor. Investigation followed the charges of councilmen that the specifications had not been adhered to. It was later brought out that the architect authorized the changes and that Williams has actually expended $6542 out of his own funds for additions to the building. Negotiating with Williams a special committee secured a receipt for this amount and agreement whereby Williams will make certain changes in the roof gutters to make them conform to the specifications.

San Rafael city council has adopted an ordinance regulating plumbing installations. The ordinance will be enforced by Victor Becker, city building, electrical and plumbing inspector.

Sixty building permits were issued in Palo Alto during the month of August for improvements estimated to cost $154,615. During the month sixteen homes were erected at a cost of $125,856.

Fresno City Board of Education has voted to proceed with the erection of new school buildings under a recent bond issue, abandoning its proposal to defer all construction until settlement of labor difficulties with the Fresno union interests and the Fresno Builders' Exchange. Construction of two new schools costing $320,000 will be rushed at once.

American patents to a new process for lining steel pipe, rendering it impervious to moisture and enabling it to compete with iron pipe, have been acquired by the United States Steel Corporation from British interests. Manufacture of the new pipe will be started immediately upon the completion of a small plant, for which the corporation's finance committee has appropriated funds.

Comanche Mining & Reduction Company of Los Angeles has filed application with the State Division of Water Rights to appropriate 10 second feet of water from Montgomery Creek, Mono county, for the generation of 940 theoretical horsepower at an estimated cost of $140,000 and 7 second feet from Marble Creek, Mono County, for generation of 587 theoretical horsepower, at an estimated cost of $125,000.

Secretary Herbert Hoover in Minneapolis expressed optimism on the business outlook, saying in part. "The best test is that there is practically no unemployment in the United States today. Every man has a job aside from the inevitable gaps due to shifts in casual employment. In every other great country today, there is a serious condition of unemployment, leading in some cases to a dole system. "My criterion of prosperity is whether the people have plenty to eat and means to keep warm, with clothing and fuel. This is the only country where there is not today some condition of starvation for the essentials of food, clothing and fuel."

Members of the Pacific Hydraulic Engineering Association met at the State Fair grounds at Sacramento recently to discuss a standard form of agreement and contract to do away with the unsatisfactory methods now in use between pump manufacturers and farmers. Robert S. Schurman of Berkeley, general manager of the Byron Jackson Pump Manufacturing Company, presided.

Building activities in San Mateo were greater in August than in any other month in the city's history, according to the report of City Building Inspector Maurice J. Powers. The permits for August totaled $625,360 and netted the city $913.95 in fees.

TRADE NOTES

C. L. Verdin of the Western Granite & Marble Co. of San Jose is in Hollister to open a branch yard and office for that concern. The yard will be served by the Southern Pacific Railroad.

A. J. Bin and P. J. Ratto will operate in the San Francisco section under the firm name of San Bruno Avenue Grading and Cement Contractors.

Western Drop Forge Company of Los Angeles has purchased a five-acre site in Oakland and will erect a plant for the manufacture of light and heavy forgings.

Rheem Manufacturing Company of Oakland, manufacturing sheet steel products, is preparing to commence operations in a new plant being completed at Forty-fifth and Horton Sts., Emeryville. Machinery for the plant is enroute from the East.

Construction has been started on a $30,000 plant for the Richmond Pottery Company adjoining the Bay Shore Railroad in San Bruno, San Mateo county.

Harry Botzbach has opened warehouse and office quarters at 9 Black Diamond St., Pittsburg, Calif., and will engage in the hardwood flooring business.

A. B. Rilovich, street paving contractor, has opened offices at 627 Call Building, San Francisco.

American Copper Paint Co., capitalized at $250,000 has been incorporated in San Francisco. Directors are C. H. Dickey, A. J. Bruce and M K. Miller Jr.

Documents covering an increase in the authorized stock issue of the Yosemite Portland Cement Company, a Fresno controlled corporation of which A. Emory Wishon is president and Murray Bourne secretary, have been filed at Fresno. The authorized stock issue of the corporation is increased from 250,000 to 350,000 shares, divided into 200,000 shares of Class A common stock and 150,000 shares of Class B common stock, each having a par value of $10.

Construction will be started at once on an addition to the steel sash manufacturing plant of the U. S. Metal Products Company in Tenth street near Folsom, San Francisco.

U. A. Kammerer, King Road, San Jose, will operate under the firm name of Coast Electric Service.

Half a million acres of timber, range and grain lands in California outside the national forests were devastated by fire during the first seven months of 1926, the State Board of Forestry reports. There were 650 fires during the seven months, with damage estimated at $1,000,000. Destruction of 13,000,000 feet of merchantable timber was the chief item of loss. There was also a heavy loss from grain fires and the destruction of farm buildings and other property in the paths of the fires.

Robt. W. Dalton, 63, Sacramento lumberman, committed suicide by taking gas in his home in Sacramento, Sept. 8.

ALONG THE LINE

Forty members of the Stockton Chapter, American Association of Engineers, recently inspected the plant of the Calaveras Cement Company at San Andreas.

California State Association of Highway Patrolmen will hold its annual convention in Sacramento, Nov. 9, 10 and 11.

Offices of the building inspector, plumbing inspector and electrical inspector will be combined into one position of Building Inspector, it was voted at the last meeting of the South San Francisco city trustees.

Harry Goodridge has been named an assistant city engineer of Berkeley. The appointment has the approval of City Manager John N. Edy.

San Francisco Board of Supervisors has endorsed constitutional amendment No. 4 on the November ballot, which will raise the gasoline tax 1 cent a gallon, proceeds of the tax to finance state highway construction.

Members of the Sacramento City Planning Commission will invite several city planning experts to appear before that body to take part in informal discussions of various phases of city planning.

The J. D. and A. B. Spreckels Security Company of San Diego will file application with the San Diego county supervisors seeking a franchise to construct a bridge over the bay between San Diego and Coronado. The structure will be of steel construction, lift type, 2700 feet in length. The cost would be in excess of $1,000,000.

Harry N. Jenks, superintendent of the Sacramento Municipal Filtration Plant since its opening, has submitted his resignation to City Manager H. C. Bottorff. Mr. Jenks' resignation is for the purpose of accepting a position as assistant professor of sanitary engineering at the Iowa State College, Ames, Ia. The resignation is to become effective September 21st. No action has been taken toward the appointment of his successor.

Bids will be considered by the Portland, Oregon, city council October 13 to construct 5000 lineal feet of concrete harbor wall on timber crib along the Willamette River. The project will involve 1,000,000 cubic yards of dredged fill; 15,000,000 feet of lumber; 56,000 cubic yards of concrete; 5000 lineal feet of sewer from 30-inch diameter to section 78 by 84 inches and a pumping plant with five units and a capacity of 110,000 gallons per minute. The time to complete the contract is set at 500 days. The estimated cost of construction is placed at $2,000,000. (Bids previously advertised for this work provided for opening September 30, 1925, but were not opened on account of pending litigation).

ORGANIZATION NEWS

BERKELEY BUILDERS' EXCHANGE ELECTS OFFICERS

Final count of over one hundred official ballots disclosed seven leading men in the building industry in Berkeley elected Directors for the coming year of the Berkeley Builders' Exchange.

Charles W. Knights, a prominent business man and organizer of the Exchange Club of Berkeley. Mr. Knights served as its first President and is an extremely capable man and is a member of the City Commons Club.

C. W. Connor, general contractor who has been in the building industry for many years and is now completing the Odd Fellows Building in Berkeley, was also elected to a directorship.

Fred L. Holbrook, sheet metal and heating contractor and member of the Berkeley Lions Club.

M. J. Ralston, of the firm of Ralston and Anderson, general contractor of high standing in Berkeley was also named.

Carl Fox of Fox Brothers, prominent in the building industry and builder of many business and residential structures was named.

C. P. Anderson of the firm of Anderson & Anderson was elected. His high standing in Berkeley in the building industry carried him to election.

E. A. Mitchell who is now president was automatically appointed to serve as a Director ex-officio.

The growth and prominence of the Berkeley Builders' Exchange is clearly shown by the type of men who are members and officers. Immediately upon the return of one of the new directors, C. W. Conner, who is in the East on business, the new board will choose its new President and officers and set forth the policy for the coming year.

National concerns are focusing their attention upon the progress of the Berkeley Builders' Exchange because of its growth along sound constructive lines and gives a personal service to each member of the organization.

MUNICIPAL ENGINEERS OF STATE WILL ORGANIZE

Following a series of conferences between representatives from the Bay district and Southern California, technical employes of California municipalities have organized a state council, to be known as the Federated Municipal Engineers of California.

The organization, including in its membership architects, engineers and inspectors, has as its aims elevation of professional standards, increasing efficiency of members and solving of engineering problems through wider technical education.

Alfred W. Alley, president of the Los Angeles Municipal Engineers Association, has been elected president. Ivan Flamm, secretary of San Francisco local, International Federation of Technical Engineers and Architects, will direct organization work in Northern California.

A builders' clearing house which would discount all bids of sub-contractors for a flat rate of 2 per cent and which would stand as protection to the owner and the sub-contractors in seeing that all bills are promptly paid, was suggested by W. Herbert Graham of Oakland, vice president of the Cosmopolitan Mutual Building & Loan Association and one of the principal speakers before the annual meeting of the Pacific Coast Conference of Building & Loan Associations held in Salt Lake recently.

AMERICAN PLAN SUBJECT OF DISCUSSION AT STATE MEET

The annual meeting of the California State Builders' Exchange was held in Santa Cruz, Monday, September 6th, 1926.

The meeting was called to order by President Gompertz and Delegate O'Keefe was appointed Secretary. Twenty-nine representatives from various exchanges were present and matters pertaining to the general welfare of the building industry of California were discussed.

Delegate Wagner from Santa Barbara spoke at length, urging that the organization take up the question of a uniform building code, as under the present condition contractors who figure statewide are compelled to study local codes before they can figure work intelligently.

Delegate W. H. George of the San Francisco Builders' Exchange spoke at length upon the subject and urged the writing in of an American Plan Clause in the Constitution.

After a lengthy discussion a resolution prevailed that the whole matter be laid over until the next meeting which will be in Stockton within 30 days.

Mr. Smith (representing Strauss & Co.) then made an address stating that in financing large building operations it was imperative that the bonding companies must know the cost of the building in computing the loan and that the owner must, also, know the cost in order to determine the income, neither of which was possible prior to 1921, but that when the American Plan went into effect the Contractor, Owner and Bonding House were reasonably sure of the cost before operations were started.

The best evidence of this statement is the tremendous building program that has been projected subsequent to the American Plan going into effect and particularly in the financial district of San Francisco where some $15,000,000 is being spent on four large buildings, not including the tremendous activity in the hotel and apartment house contractors, or to the hundreds of houses being built in the residential sections.

After a short address by the president the meeting adjourned to meet in Stockton within 30 days.

A. G. C. FALL MEET SET

The fall meeting of the Executive Board, the Advisory Board, the President's Council, and Secretary's Council of the Associated General Contractors of America is to be held at Kansas City, Oct. 4-8, 1926. The first and third days will be devoted to general sessions and the fourth day to the Secretary's Council. On the second day sessions will be held for the consideration of problems particularly connected with state highway construction.

It is planned that members attending these sessions will be formed into groups and will travel to the sessions following definite itineraries, visiting centers where there is considerable construction activity.

Lodi has taken an official membership in the Pacific Coast Building Officials' Conference League of California Municipalities. The intent of the organization is to draft a uniform building code for all cities on the Pacific Coast.

BILLION DOLLAR BUSINESS FOR COLUMBIA PORT

Shipping business from the port of Portland, Ore., will total a billion dollare before the close of this year, it is indicated by the volume of business handled for the first two-thirds of the year.

Figures on imports are not yet available, but on a basis of export figures it is not unreasonable to assume that the record mark of a billion dollars will be reached, declared a statement issued by the Merchants' association.

Thus far the deep sea commerce of the port this year, exclusive of imports, amounts to 2,051,083 tons, valued at $169,966,535. During the first two-thirds of last year deep sea trade amounted to 2,239,198 tons, valued at $140,382,283.

Domestic deep sea commerce during the first eight months of the year totalled 2,065,642 tons, to the value of $135,070,095, as compared with 1,960,872 tons valued at $125,137,844, during the same period a year ago. There was a 6 per cent gain in value and 5 per cent gain in tonnage.

It is significant to note that exports from Portland to September 1 were $3,000,000 larger than for the entire year of 1925.

TALL BUILDING MAY REPEL FOG, SAY ENGINEERS

Do tall buildings repel fogs? Meteorological experts are inclined to scoff at the possibility but since the question was raised in San Francisco a group of engineers have taken the affirmative side and apparently have been substantiated during the past two months.

Government meteorological records for July and August revealed decrease in the ever-faithful fog banks which roll in over the city daily, in the past particularly so in those two months. July and August this year were freer of fogs than for years previous, the records showed.

The engineers say that the tall towers of concrete and steel affect the air currents and that these currents in turn materially change the weather. They say that since the Telephone, Standard Oil, Matson, Pacific Gas & Electric and Mark Hopkins Hotel structures shot skyward the fogs have been deflected from their course.

WORLD'S LARGEST STEAM-ELECTRIC GENERATORS FOR CALIFORNIA

Two steam-electric generators with a nominal rating of 90,000 kw. at 90 per cent power factor are being built for the Southern California Edison Company at the Schenectady plant of the General Electric Company. These generators are stated to be the world's largest in both capacity and physical dimensions, being larger than either the single 60,000 kw. unit being installed in the 14th St. plant of the New York Edison Co. or the 80,000 kw. compound unit in operation in the plant of the Brooklyn Edison Co. The turbines which will drive the generators are to be of the tandem-compound type with a rating of 94,000 kw. at 90 per cent power factor. The largest pieces which will have to be shipped from Schenectady to the Pacific Coast, the revolving fields of the main generators, will weigh 230,000 pounds. The armatures, each weighing 330,000 lbs., will be assembled at Los Angeles on account of the limitation on bridge loads and tunnel clearances on the railroads.

$39,397,682 Is Pacific Coast Construction Total For August

A grand total of 14,049 building permits issued during August in 95 cities of the Pacific Coast area call for an aggregate of $39,397,682 in construction costs, according to the reports compiled in the National Monthly Building Survey of S. W. Straus & Co.

This total is 16% below the aggregate total for these cities in July of this year and is 13% below the comparable figures for last year. The greatest reduction is shown in the California figures, 20% below the total for last August, and in Oregon's report of an 11% reduction from last August.

Los Angeles issued 2906 building permits aggregating $8,826,108 in construction costs during August, 37% less than in July and 13% less than the August total of last year. The Los Angeles metropolitan area, 14 municipalities, reports reductions of 32% from July and 6% from the August total of last year.

San Francisco reports an increase of 17% over the July figures and one of 8% over those of last August, with an August total of 862 permits for buildings to cost $4,163,510. In the San Francisco Bay area, 12 municipalities show a 3% reduction from the August figures of last year, but an 18% increase over the July totals of this year.

Portland, issuing 1325 building permits during August for $3,169,865 in construction costs, shows a 2% reduction from July's record and a 10% reduction from that of last August. Klamath Falls, Salem and La Grande show gains, but Oregon, as a whole, reports a decrease in building program.

Seattle reports an August gain of 33% over last August and a 14% gain over July of this year, with a total of 1026 permits for buildings to cost $2,784,660. Of the 13 Washington cities comprised in the Straus survey, 8 show substantial gains over last year's comparable figures.

Oakland issued 985 permits during August for $2,665,900 in buildings, 12% more than in July, but 14% less than during August of last year. The East Bay Cities, six contiguous municipalities, as a group, issued $3,597,775 in building permits during August.

Following are the official August, 1926, construction cost figures, reported by building department executives from the 95 cities comprised in the Pacific Coast Section:

City	August, 1926 No.	August, 1926 Cost	August, 1925	July, 1926

Builders At Fresno To Leave Exchange Fate To Membership

Declining to reach a decision regarding the fate of the Fresno Builders' Exchange after more than a month of deliberation, the board of directors of the exchange has voted to call a meeting of the entire membership of the organization for the purpose of deciding whether the organization shall disband or be reorganized. The meeting will be held at 8 P. M., September 20th, in exchange headquarters.

Action of the members of the exchange is regarded as an important factor in the unsettled condition in the building industry of Fresno caused by the failure of the exchange and Fresno Building Trades Council to renew the Fresno plan agreement, and the subsequent entrance of the Valley Industrial Association, American Plan body, in the labor situation.

According to a communication sent to members of the exchange, three proposals will be presented at the meeting, as follows:

First—To determine whether this organization shall disband or whether it shall be reorganized.

Second—If the membership votes for reorganization, eleven directors are to be elected at the meeting to serve for the ensuing year.

Third—In the event of reorganization, to decide whether or not the new builders' exchange will negotiate with the building trades for a new agreement.

From an authentic source it was learned that the directors have decided to place the matter of reorganization or dissolution as it affects the agreement squarely up to the members for settlement.

Some time ago the members empowered the directorate to take action it deemed fit in respect to the fate of the exchange, but the directors feel, it was announced by an official, that the matter should be settled by all members and not by the board.

The decision to place the proposal in the hands of all members was reached by unanimous vote, it was learned.

Notified of the action of the exchange directors, J. W. Hunt, manager of the industrial association, said he was not in a position to make a statement, other than that the policy of his organization has not been changed by any recent developments.

The Industrial Association officials are now conducting a membership campaign. When the association will start actual operations of the plan can not be learned, although the members declared for its introduction some time ago.

Back of the reorganization proposal facing the exchange members stands the offer of the Fresno Building Trades Council to negotiate with the exchange for an agreement similar to that which expired June 16th, causing the unsettled condition.

The council has gone so far as to appoint a committee to carry on the negotiations and to notify the board of education that there will be no demands pressed during the coming year for higher wages by any of the union crafts in the building industry.

"Lake McClure" will be the name of the reservoir formed by waters of the Merced river impounded by Exchequer Dam of the Merced Irrigation District. Directors of the district, acting on the recommendation of the American Society of Civil Engineers, selected this name in honor of the last Wilbur F. McClure, state engineer, for his "unselfish and untiring assistance to the district during the construction of its works."

"FOOLISH PUBLICITY METHODS" ARE FLAYED

Publicity methods will probably always be varied and mysterious, and subject to many differences of opinion. But there can hardly be much difference of opinion about the bad taste and unwisdom of some publicity efforts in which the steel and the lumber interests respectively have recently indulged. The steel fabricators' organization sent out a news item on steel house construction not long ago, which asserted that "steel houses" (whatever these may be) are much cheaper than ordinary houses and in some cases have cost only half as much. The lumber manufacturers' organization now fights back in the steel-versus-lumber war by sending out a press notice saying that the first steel house built in the United States has proved to be hard and costly to heat—in detail, a one-story five-room building took 10½ tons of coal last winter to heat it, and the occupants were uncomfortably cold at that. Of these two publicity attempts, the first one is obviously misleading, presumably through ignorance or misinformation, while the second one is absurd in every possible respect, and incidentally suppresses the fact that the house in question has its walls composed not of steel but of stucco and plaster, applied to steel members framed very much like the wood studding in ordinary frame houses, many of which have similar stucco and plaster wall sheathing. The engineer, a friend of both steel and lumber, is little likely to be edified by either kind of publicity information; the effect on the citizen in general will be almost as unfavorable; and the net result is that the two publicity items fail to spread information and fail to inspire a liking for steel or lumber.—Engineering News-Record.

PRATT ROCK OFFICIALS VISIT PRATTROCK PLANT

Many officials of the Pratt Rock & Gravel Company, who operate the large rock and gravel plant at Prattrock, near Folsom, made a tour of inspection of their plant recently, considering anticipated improvements and making a general survey of the plant with Harry Bell, the plant superintendent.

After the survey of the plant, a visit was made to Folsom Prison, and a call on Warden and Mrs. Smith. Among those in the party were Mr. and Mrs. Clarence F. Pratt. Mr. Pratt is President of the Company. Mr. and Mrs. H. B. Brown, Mr. Brown being vice-president of the Company, and Mr. and Mrs. Fred Loewenberg, all of San Francisco.

TOWN LIABLE FOR DAMAGES DUE TO SEWAGE POLLUTION

The North Carolina Supreme Court on Jan. 27, 1926, handed down a decision holding that the town of Mebane was liable for damages caused by sewage pollution of a stream. One of the grounds of complaint in this case was that the town of Mebane by the discharge of sewage had polluted the stream which flowed through the land of plaintiffs to the damage of their land and mill site. The jury found for the plaintiffs and the judgment of the lower court thereon was affirmed by the Supreme court.

Due to the fact that the city of Redding, Calif., municipal light plant is clearing about $3000 a month, the city trustees have voted to give the light consumers a reduction of 20 per cent in their bills, effective Nov. 1.

BUSINESS OPPORTUNITIES

SAN FRANCISCO—Further information regarding these opportunities may be obtained from the office of Larsen Advance Construction Reports, 818 Mission Street, San Francisco, either by phone, letter or personal call. Requests for additional information should be made to the Business Opportunities Department. Such requests must be accompanied by the Index Number of each opportunity.

10699—Prince Rupert, B. C. Firm of importers and manufacturers' agents wish to get in direct touch with manufacturers of plumibng goods and plumbing supplies, as they are in a position to sell these goods to the trade in Northern British Columbia.

10700—Vancouver, B. C. Firm wishes to get in touch with San Francisco manufacturers desiring an agent or representative in British Columbia. They have excellent connections with

the drug trade of that Province.

10701—Temiskaming, Que., Canada. Party taking out a patent on a machine which is built somewhat in the form of a gantry crane and is used for loading logs, timbers, railway ties, etc., either into stake cars or onto decks of ships, wishes to get in touch with San Francisco logging or shipping industries which might be interested in such a loading machine, which will greatly speed up their loading operations and cut down expenses.

10703—Bombay, India. Dealers in Indian product wish to get in touch with San Francisco importers interested in timber and general products.

10708—Hamburg, Germany. Large exporters of iron and steel products are very desirous of getting in touch with San Francisco shippers and importers.

10176 — Havana, Cuba. Manufacturers' agents desire to get in touch with manufacturers and exporters of the following lines wishing representation in Cuba. Hardware, glassware, electrical goods and miscellaneous articles. Excellent references given.

D-2194—Aurora, Illinois. Manufacturers of a complete line of high quality centrifugal pumps, deep well turbines and power heads wish to become associated with a San Francisco machinery house interested in handling their equipment on a strictly exclusive basis. Descriptive pamphlet on file with Foreign and Domestic Trade Department.

D-2195—Brooklyn, N. Y. A nationally known radio manufacturing corporation, having established an industrial products division, are merchandising a portable electric clothes washer that can be fitted into any laundry tub. They desire to establish business connections with a San Francisco canvassing organization. They will grant exclusive rights to the proper concern.

D-2198 — Seattle, Washington. Experienced sales representative, now in San Francisco, wishes to get in touch with San Francisco manufacturers or distributors who desire to expand their business in the Northwest area. Local references.

D-2199—Cleveland, Ohio. Manufacturers' representatives, having display rooms and storage rooms, offer their services to San Francisco manufacturers wishing representation in Cleveland and Northern Ohio.

WOODLESS BARN IS COMPLETED AT AMES

A masonry barn without any lumber whatever has been designed and built by the Agricultural Engineering Department of the Iowa State College at Ames, Iowa. The roof of hollow tile and concrete ribs has been quite an item of interest to the many visitors at the department this summer.

The first construction was one fourth size, but plans are now completed for the erection of a full sized barn of this type on the agricultural experiment station farm.

The specifications call for metal doors and window frames, thereby removing all inflamable material.

The cost is about 25% over the same sized barn of lumber, but due to the elimination of all painting, the two forms of construction will be on a practically even price basis over a period of years. (Hollow Building Tile Association).

R. A. HISCOX, LUMBERMAN, SUES LOS ANGELES BANK

Charging false arrest, R. A. Hiscox, San Francisco lumberman, has brought suit against the Merchants' National Bank of Los Angeles and Thomas Morrissey, an official of the bank, for $100,000 damages.

Hiscox, president of the Hart-Wood Lumber Company, alleges that his reputation was injured to that extent when the bank caused his arrest on July 29, on charges of obtaining money under false pretenses.

Hiscox recites that the arrest was the result of an altercation concerning whether he was responsible for the authenticity of notes which had been placed in the Los Angeles bank by his lumber firm.

He declares he was taken to Los Angeles, held under $1000 bail, and that the charges were then dismissed.

Figures for the six months ending June 30, 1926, taking in 51 lumber mills, show that 28 of them made a profit and 23 lost money. The average net operating gain of all of them, from all sources of revenue, lath, sawduat, log overrun, etc., was 84c per thousand on 1,381,664,000 feet.

Marysville, Calif., August 27, 1926.

Clarence Pratt,
Hearst Building,
San Francisco, Cal.

Dear Sandy:—

Everyone seems to get quite a bit of fun out of our "Newlywed" joke, and as I am the bride, I might as well join in the general laugh.

I see the funny side of it now, but I assure you it didn't seem funny at the time.

I had such wonderful visions of canning peaches and pears and I could just see my Hubby eating them and saying, "These taste just like Mother makes."

I haven't been married very long, and it gives me such a big thrill when he praises things I do. (I guess I'll get over that as most girls seem to think I will). I doubt it tho' as most people like to be flattered although they won't admit it.

By the way—did you ever take a taste of your nice clean sand? If you haven't **dont,** as you won't think much of it if you do. It is lovely for children to play in, but I'm here to tell you that the taste of it does not, by the longest stretch of imagination, slightly resemble that of sugar. I know —experience is the best teacher.

The little boy we gave the sand to seems to enjoy it much more than I did. At least he doesn't seem to mind the taste of it.

After working in the California & Hawaiian (C. & H.) Sugar Refinery last winter, we newlyweds couldn't bear to see that lovely sack of sugar go to waste there on the roadside, so we picked it up—and then got **fooled.**

"Sandily" yours,
MRS. JACK SANFORD, JR.

PERHAPS YOU remember the story.

FIRST PUBLISHED.

IN THE Marysville Democrat.

THEN IN this column.

CALLED "PRATT'S Concrete Mix."

ABOUT THE above bride.

AND HER wonderful husband.

PICKING UP a sack.

OF C. & H. "sugar."

ON THE highway.

BUT WHICH turned out.

TO BE Sandy Pratt's sand.

AND OF course the joke.

WAS ON the newlyweds.

BUT SANDY Pratt, producer.

OF CLEAN, sharp sand.

AND HARD, clean rock.

SECURED A 100-lb. sack.

OF SUGAR.

FROM THE C. & H. Sugar Co.

FOR THE bride and groom.

AND SANDY thinks the joke.

IS ON the ones.

THAT "PLANTED" the sack.

OF PRATT'S clean sand.

ON THE Sutter County highway.

WHEN SANDY was married.

IF ANYONE had given him.

A 100-LB. sack of sugar.

SANDY WOULD have felt.

LIKE A millionaire.

SANDY DID receive a sack.

OF BROKEN beans.

FROM A farmer.

AND SANDY served beans.

FOR FIFTEEN years.

AFTER HE was married.

ONE OF Sandy's wedding gifts.

FROM A farmer friend.

WAS TWELVE Plymouth Rock hens.

(NO RELATION to Sandy's rock).

AND AS predicted.

EVERY BODY made fun.

OF THIS wedding present.

BUT IT was not long.

'TILL THESE chickens.

PRODUCED EGGS and friers.

FOR SANDY'S table.

THEN THOSE that laughed.

HAD TO cry.

BECAUSE THEY were not invited.

TO EAT fried chicken.

AND NICE fresh eggs.

IN SANDY'S home.

"I THANK you."

(The mayor, aldermen, chief of police and chamber of commerce of Marysville were at the railroad station to receive the 100-lb. sack of C. & H. sugar).

Official Proposals

NOTICE TO CONTRACTORS

(Joint City Hall and Branch County Jail—Vallejo, Calif.)

Sealed proposals will be received at the office of the City Clerk of the City of Vallejo, California, and concurrently at the office of the County Clerk (who is ex-officio Clerk of the Board of Supervisors of Solano County) at Fairfield, California, **until 11 o'clock A. M. October 4, 1926,** for:

a. The general construction of a joint Vallejo City Hall and branch County jail building, at Marin and Capitol Streets, City of Vallejo, County of Solano, State of California.

b. The electrical work of said joint Vallejo City Hall and branch County jail building.

c. The heating work of said joint Vallejo City Hall and branch County jail building.

Items a, b and c above are to be constructed and installed jointly by the said City of Vallejo and said County of Solano. Bidders will therefore make their proposals in duplicate and file one of such duplicates with the said City Clerk of Vallejo, California, and one of said duplicates with the County Clerk of Solano County, California, at the time and at the respective places hereinabove set forth.

The said City Hall and branch County jail shall be constructed on Lots 8 to 9 in Block 303 as said Lots and Block are shown on the official map of the City of Vallejo.

All proposals or bids offered shall be accompanied by a certified check payable respectively to the City of Vallejo and the County of Solano. Such checks shall be for equal amounts in each case and shall aggregate an amount not less than ten per cent of the total amount of the proposal, provided however, that the check accompanying the proposal to the City of Vallejo shall be for the sum not less than 5 per cent of the amount of said proposal and the check accompanying the proposal to the County of Solano shall likewise be for a sum not less than 5 per cent of the amount of said proposal or such proposals may be accompanied by a surety bond of a responsible surety company, such bond to be in like amounts as said checks and filed in the same manner as herein provided of the filing of said checks, and it is further provided that said checks or bonds shall be forfeited for failure to refuse or enter into the contract if such contract be awarded.

The work for which said proposals are to be received as hereinabove set forth shall be in conformity with and according to the revised plans and specifications heretofore adopted by the City Council of Vallejo and the Board of Supervisors of the County of Solano, and such plans and specifications may be secured from the City Clerk of the said City of Vallejo or from the County Clerk of the County of Solano or from C. E. Perry, Architect, 460 Montgomery Street, San Francisco, California.

A deposit of ten ($10.00) dollars will be required for plans and specifications, which amount will be refunded on return of same. The right is reserved to reject any and all bids.

ALF. E. EDGECUMBE,
City Clerk.

NOTICE TO CONTRACTORS

(Berkeley— Cragmont School)

Sealed bids will be received by the Board of Education of the City of Berkeley and of Berkeley School District of Alameda County at its office located at 2133 Allston Way, Berkeley, California, **until Monday, the 27th day of September, 1926, at the hour of eight o'clock P. M.,** at which time said bids will be opened for the furnishing of all labor, materials and mechanical workmanship to be used in the erection and completion of electric clocks, program bell and fire system and shades for the new school building for said school district to be known as the Cragmont School Building, located at Regal Road and Marin Avenue in the City of Berkeley, California.

A call for bids published in this section indicates that bids are desired from other than local bidders Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section

Separate bids will be received for:

1. Electric clocks, program bell, and fire system.
2. Shades.

Plans and specifications for said work are on file at the office of W. H. Ratcliff Jr., architect of said Board of Education, Mercantile Trust Company Building, corner of Shattuck Avenue and Center Street, Berkeley, Calif.

On deposit of ten ($10.00) dollars said plans and specifications may be had by any prospective bidder for either of the branches of work above listed. The plans and specifications may be retained for a period of five days.

If the plans and specifications are not returned to the architect within the time above specified, or are returned in mutilated or damaged condition the deposit will be forfeited and will be immediately used for the purchase of a new set of blue prints and specifications.

Bids must be made on proposals obtained at the office of the Architect, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker and made payable to the Berkeley School District of Alameda County, to be retained by the said school district as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall be for at least ten (10%) per cent of the total amount of the bid.

Bids will be opened by the Board of said district on the 27th day of September, 1926, at eight o'clock P. M., in the office of the secretary of said Board of Education, 2133 Allston Way, Berkeley, California.

The Board reserves the right to reject any and all bids or any or all items of such bids.

GEORGE S. MOUSER,
Secretary of the Board of Education of the City of Berkeley and of Berkeley School District of Alameda County, State of California.

NOTICE TO CONTRACTORS

(Harmony Grove School District)

Notice is hereby given that sealed proposals will be received by the Board of Trustees of the Harmony Grove School District, San Joaquin County, California, at the office of the herein mentioned architect, **until 2 o'clock P. M., Wednesday, September 22, 1926,** for the erection of a brick veneered school building and accessory buildings, and furniture for same, in accordance with plans and specifications prepared by Victor Galbraith, the authorized architect, 208 Elks Building, Stockton, California.

Plans may be obtained at the office of the architect, upon deposit of $15, returnable at time plans are returned in good condition. A certified check of 10 per cent of amount of bid will be required, same to be made payable to Mrs. Mary E. Jory, clerk of the board, check to be forfeited as liquidated damages upon failure of the successful bidder to enter into a proper contract and to furnish bonds as required by law.

The board of trustees expressly reserves the right to reject any and all bids and to waive any informality in any bid received.

By order of the Board of Trustees of Harmony Grove School District, San Joaquin County, California.

MRS. MARY E. JORY,
Clerk.

NOTICE TO CONTRACTORS

(County Hospital, Monterey County)

Office of the Clerk of the Board of Supervisors of Monterey County, September 8th, 1926.

Sealed bids will be received by the Clerk of the Board of Supervisors of Monterey County, at his office, **until two o'clock P. M., October 4th, 1926,** at which time said bids will be opened for building of a new County Hospital, in Monterey County.

Profiles, cross sections, plans and specifications for this work are on file in the office of the said Board, to which bidders are hereby referred.

T. P. JOY,
Clerk of the Board of Supervisors of the County of Monterey.

INVITATION FOR PROPOSALS

(Repairs—U. S. Appraisers Building)

SEALED PROPOSALS will be received at this office until 12 o'clock M., September 24, 1926, and then opened for miscellaneous exterior and interior repairs and painting at the U. S. APPRAISERS BUILDING, SAN FRANCISCO, CALIFORNIA, in accordance with the specification; copies of which may be had at this office in the discretion of the District Engineer.

WM. ARTHUR NEWMAN,

NOTICE TO CONTRACTORS

(County Courthouse — Santa Barbara)

Pursuant to an order of the Board of Supervisors of the County of Santa Barbara, State of California, made on the Seventh day of September, 1926, Notice is hereby given that sealed bids will be received until **10 a. m. on the fourth day of October, 1926,** by the Board of Supervisors of the County of Santa Barbara, State of California, at their rooms in the County Court House, in the City of Santa Barbara, County of Santa Barbara, State of California; said bids then and there will be publicly opened and read for furnishing all plant material and labor and doing the work required for the construction and erection of the Court House, Hall of Records and Jail building on the Court House site in the City of Santa Barbara, County of Santa Barbara, State of California, and all in accordance with the plans and specifications therefore, made by William Mooser Company, Architects, copies of which may be obtained on application from the County Clerk, at Court House in the City of Santa Barbara.

Such bids will be received for the work as follows: Separately:

One General Bid, together with Unit Price, covering Bid One and Bid Two.

One General Bid, together with Unit Price, covering Bid Three and Bid Four.

Bid One: For excavating and grading and reinforced concrete work.

Bid Two. For additional excavating and grading and reinforced concrete works per cubic yard.

Bid Three: For furnishing and erecting structural steel works.

Bid Four: For furnishing and erecting additional structural steel work per ton.

All proposals must be submitted on forms similar to the one here attached as prepared by the Architects, William Mooser Company, Nevada Bank Building, San Francisco, California.

Cash, a Bidder's Bond, or a Certified Check in the sum of at least Ten percentum (10%) of the amount of the bid must accompany each bid, and be payable to the Chairman of the Board of Supervisors of the County of Santa Barbara, as a guarantee that the bidder whose proposal is accepted will enter into a contract with the County of Santa Barbara, for the work bid upon. Otherwise said Cash or Bidder's Bond, or Certified Check, will be forfeited to the County of Santa Barbara.

A deposit of Fifty Dollars will be required for plans and specifications, the deposit to be returned immediately on the return of plans and specifications in good condition to the Clerk of the Board of Supervisors, County Court House in the City of Santa Barbara, or to the Architects, William Mooser Company, Nevada Bank Building, San Francisco, State of California.

Rights Reserved

The County of Santa Barbara reserves the following rights: (a) To reject any or all proposals; (b) to waive any informalities in any proposal; (c) to award this contract to some other than the lowest bidder as this clause expressly puts the bidder on notice that his financial and business standing and ability properly and expeditiously to carry out work hereunder, or the consideration of desired alternates, makes his proposal more advantageous to the County of Santa Barbara; (d) to accept any alternate or any independent part of any proposal submitted by the successful bidder at the price stated in such proposal for such alternate or separate parts of the work, under this provision; (e) to deduct any separate item mentioned in any proposal at the price therein stated therefor; (f) to make any additions to omissions from, changes in, or substitution for the work or materials or articles called for by the Contract, subject to the requirements of the Paragraph thereof headed under that particular item and without notice to the sureties on the bond, if any, guaranteeing the performance of the contract.

All bids must be addressed to the County Clerk of the County of Santa Barbara in the City of Santa Barbara, State of California, and have endorsed thereon:

Proposal for Court House, Hall of Records and Jail Building for the County of Santa Barbara, California, and the particular part of the work bid upon.

C. L. PREISKER,
Chairman of the Board of Supervisors of the County of Santa Barbara.

C. A. HUNT,
County Clerk and Clerk of the Board of Supervisors of the County of Barbara.

NOTICE TO CONTRACTORS

South Fork Union High School District

Notice is hereby given that sealed bids will be received and opened by the Board of Trustees of the South Fork Union High School District, Humboldt County, State of California, in the present high school building, at Miranda, California, **at 3:00 o'clock P. M., October 4th, 1926,** for the erection and completion of a frame high school and shops buildings, for the School District in accordance with plans and specifications made for the same by W. H. Weeks, Architect, 369 Pine St., San Francisco, and 1924 Broadway, Oakland, California, with their several propositions.

General Contract.
Electric Plant.
Steam Heating Plant.
Electric Work.
Electric Clocks.
Metal Lockers.

Gas Plant.

Plans and specifications may be seen at the offices of the Architect before mentioned, at the office of the Clerk of the Board of Trustees, Chas. W. Burris, Redway, Humboldt County, California.

Each bid, must be accompanied by a certified check on some responsible California bank in a sum not less than five per cent (5%) of the amount of the bid, and made payable to Chas. W. Burris, Clerk of the Board of Trustees of the South Fork Union High School District; said check to be forfeited to the School District if the successful bidder fails to sign the contract and give a good and sufficient bond, as required by law, within 10 days after the awarding of the contract. A deposit of $25 will be required for all plans and specifications loaned out.

Each bid, must be made out on Bid Forms obtained from the Architect, enclosed in a sealed envelope which is endorsed "Proposal for Clocks," "Lockers," "Heating," "Linoleum," "Gas Tank," "General Contract" or "Electric Work and Plant," and must be delivered to Chas. W. Burris, Clerk of the Board of Trustees in his office at Redway, Humboldt County, California, one hour prior to the date and time set for the opening of bids.

The Board reserves the right to reject any or all bids.

CHAS. W. BURRIS,
Clerk of the Board of Trustees of the South Fork Union High School District, Miranda, Calif.

OFFICIAL PROPOSALS

NOTICE TO CONTRACTORS

(Blackboards—Oakland)

OFFICE OF THE SECRETARY OF THE BOARD OF EDUCATION OF THE CITY OF OAKLAND.

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, **until Tuesday, the 28th day of September, 1926, at 9:45 A. M.,** at which time said bids will be opened for the furnishing and installing of Slate Blackboards for the Sequoia School to be erected on the northeast corner of Lincoln Avenue and Scenic Avenue, the McChesney School Annex to be erected on the northwest corner of Hampel Street and LaCresta Avenue and the Prescott Domestic Science Building to be erected on the southwest corner of Tenth and Peralta Streets for the Oakland School District. These bids shall be presented in accordance with the plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, 337 17th Street, Oakland, California.

On a deposit of Twenty-five ($25.00) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office hereinbefore mentioned, and plans shall be returned within five (5) days after securing same ,to the Superintendent of Buildings. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland and of Oakland School District, to be retained by said School District, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall not be less than ten (10%) per cent of the amount bid, provided, however, that in no case shall said check be required to be in excess of Five Thousand ($5,000.00) Dollars. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 28th day of September, 1926, at 9:45 A. M., in the Board Room, 211 second floor, of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDGEMOND,
Secretary of the Board of Education of Oakland California.

NOTICE TO CONTRACTORS

Standard All-Steel Buildings Now Manufactured on the Pacific Coast

(PART TWO)

In the preceding article on COASTEEL Buildings, the outline of types was given, along with some few general specifications of integral parts. This article deals with the standard sash arrangements in these buildings, a feature that is highly important to the man who occupies the building after it is completed. Other data of a more strictly design nature is also included.

WINDOWS AND VENTILATION.

Standard "California Steel Windows" are furnished for all windows and skylights. This permits the desirable arrangement of having the sash and glass a continuous wall of light. *The California Steel Windows, which are of copper bearing steel, are hot dip galvanized,* as well, for complete assurance of long life.

Water-tightness is a vital factor in warehouse construction. California Steel windows are so designed that complete protection against rain and snow is afforded. Where ventilation is required, pivot or bottom hinge ventilators are used. All ventilators are fitted with a continuous double-contact weathering (two baffles against leakage) to insure weather protection.

Sash arrangements in *COASTEEL* Buildings are standardized to provide an ample range of lighting units for all requirements. Vertically, "California" windows are furnished in units 2, 3, 4 or 5—lights high. Units 6—lights high or higher can also be obtained by joining two units with a horizontal center mullion.

The location of the sash in *COASTEEL* Buildings, in relation to floor level, is as shown on the following page. These vertical arrangements may be combined with any lateral arrangement, from single windows to continuous sash in any length or width of building. The standard ventilator positions depend on what vertical and horizontal sash arrangement is chosen.

Lateral arrangement of "California" Steel Windows in *COASTEEL* Buildings varies from single windows of three lights to continuous sash. Any of the standard lateral unit arrangements can be combined with any of the vertical units for any length or width of building.

Where ample ventilation and proper fly protection are necessary, as in Canneries, Creameries, and Packing Houses, the flat facia side of California sash bars permits the installation of an inexpensive, durable fly screen.

FRAMEWORK.

By paying particular attention to design and materials, it has been possible to develop a series of superior standard buildings, in which substantial savings in the weight of trusses and columns have been made, without in any way sacrificing strength. This means lower freight and haulage and less cost for foundations.

Columns are built up of structural angles, truss members are angle sections and purlins and girts are channels. In design and construction, these members follow strictly the standard approved practice on structures. *All of the steel is hot dip galvanized.*

COASTEEL Buildings are economically extended, as the end finish is removable, without disturbing the frame work in any way. Standard additions of the desired size are made at the absolute minimum of cost and trouble. The enlarged buildings have the appearance of being single structures, because of the standardization of units, and they are in no sense patch jobs.

SIDEWALLS AND ROOF.

The Standard sidewall and roof covering is galvanized corrugated sheet steel and it is erected according to approved mill building practice. Where special conditions require, a different wall and roof covering may be used, such as processed sheets or protected metal, and stucco finish or masonry curtain walls. Furthermore, the use of a brick or stucco front on city lots makes it possible to utilize the economy of standard steel buildings while getting the ornamental effect of more expensive construction.

100% SALVAGE.

COASTEEL Buildings are sold on a basis of long time service and complete usableness. They are strong, trim in appearance, resistant to fire and proof against hard knocks. Further than that, *COASTEEL* Buildings are good for years, on any location on which it might be desired to use them. Being assembled of standardized units, with connections bolted, they are easily dismantled, moved and reerected without loss of any material.

Standard Sash Heights in COASTEEL *Buildings*

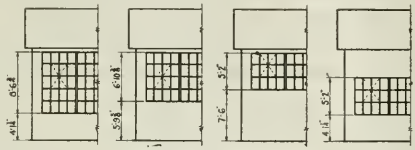
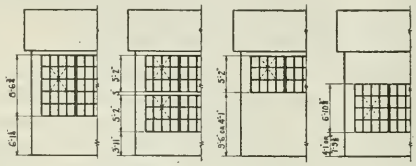
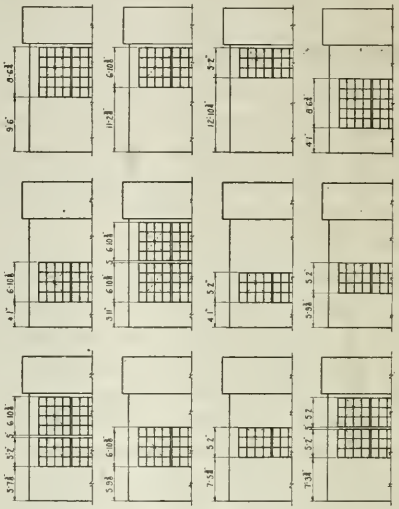
13′-0″ High Building



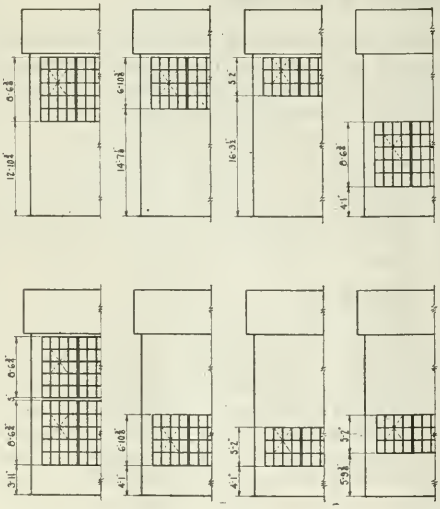
15′-0″ High Building

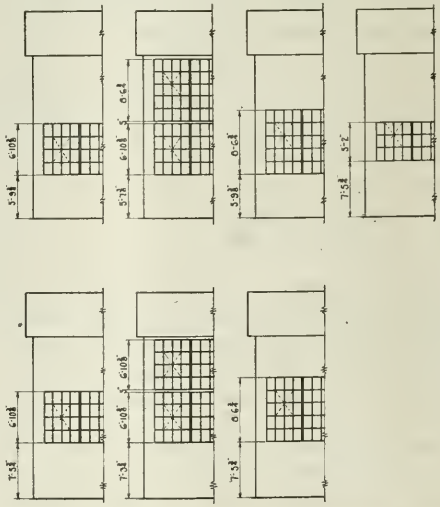


18′-4¾″ High Building



21′-9½″ High Building





Ventilators and Operators

VENTILATORS

Considerable latitude in the arrangement of ventilators in *COASTEEL* Buildings is provided in the standard layouts. Vents are always two lights high but may be either two or three lights wide, according to the type of window used. In a run of windows where the total height of sash is five lights or more, two ventilators, one above the other may be installed. Monitor and saw tooth lighting follows the same general arrangement, but there is, of course, no double run of sash.

OPERATORS

Callahan Direct Action Sash Operators have been adopted for *COASTEEL* Buildings, and are standard for each building. These operators were adopted because of their superiority of construction and operation. They are simple, easy to operate and give better ventilation at lower cost.

CONTROLS

Several types of control are available and these make it possible to fit any local conditions which the particular job may develop. The standard driving mechanism of Callahan Operators is a worm and gear assembly, to be operated by a hand chain or a vertical shaft. When the shaft is used an additional set of gears and a hand wheel are installed.

Callahan Concave Arm in use with center pivoted sash.

Simple attachments permit quite a variation in the location of the control mechanism, the hand wheel or hand chain. They also provide for a wide variation in ventilator arrangement, such as short runs or long runs.

MOTOR DRIVE

When long runs of ventilators are installed in buildings or the ventilators are well above the floor, it is often desirable to operate or control all of the vents from a central point. In such cases the Callahan motor drive is employed. This is push button operated and opens or closes the vents to the desired position.

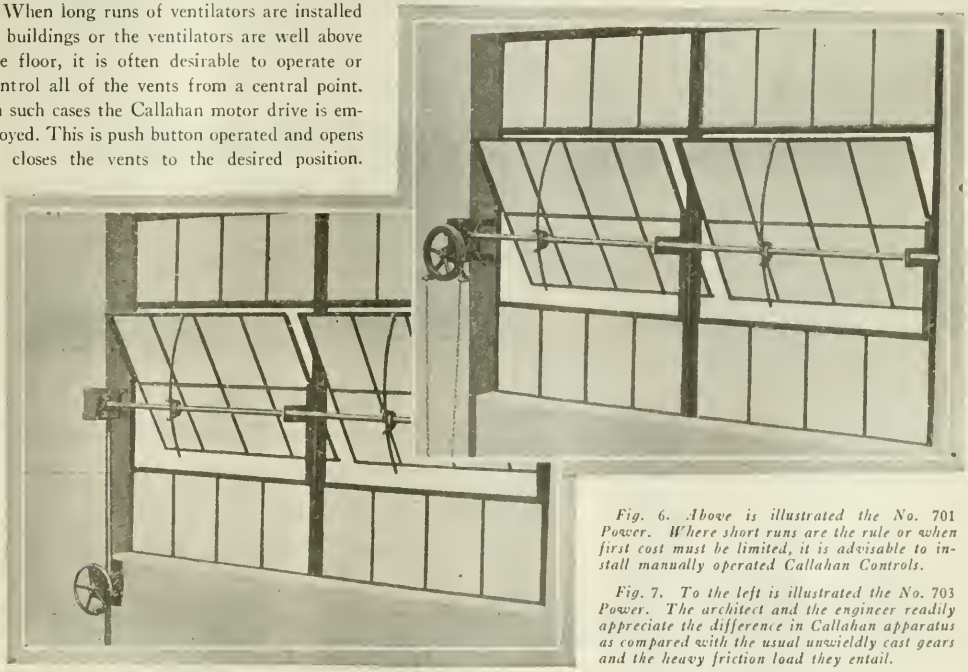


Fig. 6. Above is illustrated the No. 701 Power. Where short runs are the rule or when first cost must be limited, it is advisable to install manually operated Callahan Controls.

Fig. 7. To the left is illustrated the No. 703 Power. The architect and the engineer readily appreciate the difference in Callahan apparatus as compared with the usual unwieldly cast gears and the heavy friction load they entail.

BRIDGES

OAKLAND, Cal.—Municipal Const. Co., 4323 East 14th St., Oakland, at $51,425.50 awarded cont. by county to const. rein. conc. bridge over Alameda Creek and to imp. portions of county rd. known as Smith St., Alvarado. Project involves 410 cu. yds. excavation below bridge elevation; 1600 cu. yds. above bridge elevation; 3800 yd. rdwy. excavation; 1830 cu. yds. conc. (bridge etc55,400 sq. ft. cem. conc. pavement; 26,500 sq. ft. gravel rdwy.; 120,000 lbs. reinf. steel; 550 ft. steel guard rail; 70 ft. 10-in., 380 ft. 12-in., 120 ft. 18-in., 50 ft. 30-in. and 50 ft. 36-in. corr. culvert; 1 c. i. catchbasin.

SAN GABRIEL, Cal. — R. Westcott Co., 710 S. Garfield, Alhambra, sub. low bid to city at $13,700 for reinf. conc. arch bridge across Longden Ave. 30-ft. arch with 40-ft. rdwy. Est. quantities are: 254.7 cu. yds. class A conc., 600 cu. yds. class B conc., 33.6 cu. yds. class C conc., 21,035 lbs. reinf steel, 960 cu. yds. excav., wreck present bridge. Bids were: R. Westcott Co., $13,700, extra conc. $15 cu. yd. and extra steel 5c lb; Robt. Sankey, $13,998, $20, 5c; L. J. Bristow, $15,110, $20, 5.8c; Bartlett & Mathews, $15,500, $15, 6c; Franklin B. Gridley, $16,800, $18, 8c; Frank H. Whyte, $16,844, $17, 6c; J. C. Butler, $16,908, $20, 5c; Oliver G. Bowen, $17,390, $30, 6c; I. T. Lipp, $18,020, $22, 7c; Wm. Hess, $18,258, $21, 6c; Paul H. Ehlers, $18,500, $15, 6c; A. A. Tennyson, $19,500, $15 and 5.5c.

SALINAS, Monterey Co., Cal.—Bids will be asked at once by M. R. Keef, city clerk, to const. conc. culvert over Reclamation Dist. canal in North Main St; 120 ft. long. Howard Cozzens, city eng. Plans on file in office of clerk.

WOODLAND, Yolo Co., Cal.—Until Sept. 28, 2 P. M., bids will be rec. by H. R. Saunders, county clerk, to const. creosoted pile trestles along Woodland-Elkhorn road within boundary of Yolo By-Pass. Cert. check 10% payable to county req. Plans on file in office of clerk.

LOS ANGELES, Cal.—Until 2 p. m., Oct. 4, bids will be rec. by county for wooden truss bridge in Beverly Blvd. over Rio Hondo. Plans obtainable from road dept., 11th fl., Hall of Records. Cert. or cash. chk. or bond 10%; will have 7 60-ft. Howe truss spans, 27-ft. rdwy., pile piers and timber bulkheads.

MERCED, Merced Co., Cal. — Until Sept. 27, bids will be rec. by P. J. Thornton, county clerk, to const. 3 culverts and bridge in Sup. Dist. No. 1 and one bridge in Sup. Dist. No. 2. All conc. construction. Plans obtainable from W. E. Bedesen, county surveyor, Shaffer Bldg., Merced.

SALINAS, Monterey Co., Cal.—As previously reported, bids will be rec. by M. R. Keef, city clerk, until Sept. 20, 7:30 P. M., to const. conc. culvert over North Main St. Will be 8x8 ft. and 120 ft. in length. Plans on file in office of clerk. Howard Cozzens, city engineer.

MARIPOSA COUNTY, Cal.—Noble Bros., 553 S-10th St., San Jose, at $9887 sub. low bid to Division Engineer, State Highway Comm., Fresno, to remove portions of existing conc. bridge and const. conc. bridge, two 40-ft. 10-in. spans, approx. 3 mi. south of Briceburg, over Bear Creek. J. P. Williams, Fresno, next low at $10,518 and Smith Bros., Eureka, $14,655. Take under advisement.

SAN RAFAEL, Marin Co., Cal.—D. W. Phillips, Novato, at $1170 awarded cont. by county to const. rein. concrete cattle pass on Pt. Reyes rd.

MADERA, Madera Co., Cal.—Until Oct. 5, 10 A. M., bids will be rec. by L. W. Cooper, county clerk, to const. timber bridge over Ash Slough, 2nd Rd. Dist. Cert. check 10% req. with bid. Plans on file in office of clerk.

SANTA MONICA, Cal.—Santa Monica and Los Angeles city and Los Angeles county engineers will meet soon to formulate plans for bridging Santa Monica Canyon at Lincoln Blvd. or 8th St.

VENTURA, Cal.—Until Oct. 19 bids will be rec. by county for 3 mi. cem. concr. pave. on Bardsdale end of new Grimes Canyon rd; 18 ft. in width and 5-in. thick; est. cost $60,000. Chas. W. Petit, county surveyor.

HUMBOLDT COUNTY, Cal.—Smith Bros. Co., Eureka, at $15,892.50 sub. low bid to Dist. Eng., State Highway Commission to reconst. suspension bridge over Klamath river at Orleans in Humboldt county consisting of removal of portions of old bridge and const. of new central span 374 ft. long and new anchors at east end, also certain repairs and alterations to existing towers and anchor at west end. Other bids Fred J. Maurer & Sons, Inc., Eureka, $17,014.35; J. H. Tillman, Oakland, $22,745. Engineer's estimate, $13,136.50.

LOS ANGELES COUNTY, Cal. — As previously reported, bids will be rec. by State Highway Comm., Oct. 4, to const. two rein. conc. slab bridges over La Placerita Creek, ½ mi. north of Newhall, one consisting of one 18 ft. span and the other of six 18 ft. spans. Project involves. 1060 lin. ft. rein. conc. piles; 7 creosoted Doug. fir piles; 325 cu. yds. "A" cem. conc.; 13 cu. yds. "B" cem. conc.; 41,000 lbs. reinforcing steel in place; 0.9 M ft. b. m. ft. W. timber, Extra Merchantable.

STOCKTON, San Joaquin Co., Cal — Frederickson Bros., First Natl. Bank Bldg., Stockton, at $13,719 awarded cont. by county to const. conc. bridge on Murphy Ferry rd, and at $3832 for conc. bridge over Bear Creek; also for 2 conc. bridges at Woodside for $6968.

LOS ANGELES, Cal.—State highway comm. will call for bids soon for new bridge across Eaton canyon wash on Foothill Blvd., e of Pasadena; reinf. conc., two 54-ft. spans, 40-ft. rdwy; cost $36,000 to $40,000.

TEHAMA County, Calif.—D E Burgess, Stockton, at $5,680 sub low bid to State Highway Commission to clean paint and repair bridge over Sacramento river at Red Bluff, Raphael Co., San Francisco, only other bidder at $8,838.50. Engineer's estimate $7,520.

DREDGING, HARBOR WORKS AND EXCAVATIONS

MARTINEZ, Contra Costa Co., Cal.—Sept. 28 is date set by city to vote bonds of $75,000 to finance harbor development and waterfront reclamation.

LOS ANGELES, Cal.—Until 9 a. m., Sept. 22, bids will be rec. by general manager of harbor dept. to dredge approx. 215,000 cu. yds. in yacht anchorage in East Basin. Spec. No. 731. Plans obtainable from harbor engr., berth 90, L. A. Harbor, rm. 208. Cert. chk. or bond 10%. Chas. H. Spear, genl. mngr. Dredge spoil will be deposited on seaward side of Terminal Island, and consists of sand, silt, clay and shells.

PORTLAND, Ore.—Until Oct. 13, bids will be rec. by city for harbor wall along w. side of Willamette River, involving 5000 lin. ft. conc. wall on timber crib, 1,000,000 cu. yds. dredged fill, 15,000,000 ft. B. M. lbr., 56,000 cu. yds. conc., 5000 lin. ft. sewer from 30-in. diam. to section 78x84-in. and pumping plant with 5 units and capacity of 110,000 gal. per minute. Time limit 500 days. Est. cost, $2,000,000. Bids were adv. to be rec. Sept. 30, 1925, for this work, but were not opened account pending litigation.

IRRIGATION PROJECTS

LINCOLN, Placer Co., Cal.—Lincoln Farm Bureau backs proposal to incorporate Lincoln District with Nevada Irrigation District. Construction work contemplated under the incorporation would involve an expenditure of approximately $3,000,000.

SACRAMENTO VALLEY, Calif.—Engineer W. R. Young, U. S. Bureau of Reclamation, has submitted report covering plans for a $56,000,000 irrigation project, embracing 277,000 acres in the Sacramento Valley. Construction includes the Iron Canyon Storage Dam, 150-ft. high, near Red Bluff and a main canal, approx. 120 miles in length extending from diversion dam below Red Bluff to approx. 16-mi. south of Colusa.

LA MESA, Cal.—Until 10 a. m., Oct. 1, bids will be rec. by La Mesa, Lemon Grove and Spring Valley irrigation dist., La Mesa, for following: trench and backfill, 15,200 lin. ft. 30x40-in., 15,056 lin. ft. 28x46-in., 6850 lin. ft. 26 by 44-in., 6250 lin. ft. 24x42-in., 5610 lin. ft. 22x40-in. and 10,230 lin. ft. 30 by 28-in. ; riveted steel pipe, De Lavaud or equal, 15,200 ft. 10-gauge, 18-in., 15,056 ft. 10-gauge, 16-in., 6850 ft. 10-gauge, 14-in., 6300 ft. 10-gauge, 12-in., 5610 ft. 12-gauge, 10-in. and 10,230 ft. 12-gauge, 8-in.; centrifugally cast c. i. pipe with Leadite joints, 13,337 lin. ft. class 50, 18in., 5900 ft. class 150, 18-in., 10,618 ft. class 50, 16-in., 4438 ft. class 150, 16-in., 6850 ft. class 50, 14-in., 6300 ft. class 50, 12-in.; 5610 ft. class 50, 10-in., 8700 ft. class 50, 8-in. and 1530 ft. class 150, 8-in.; Matheson pipe, light steel welded, or equal, 15,200 lin. ft. 18-in., 15,056 ft. 16-in., 6850 ft. 14-in., 6300 ft. 12-in., 5610 ft. 10-in. and 10,230 ft. 8-in.; gate valves and other appurtenances. All bids must include hauling and distribution of pipe at trench side and laying of pipe. Plans obtainable from office of dist. at La Mesa on payment of $20, no refund. T. H. King, engr.; John C. Scott, secretary.

LIGHTING SYSTEMS

BEVERLY HILLS, Cal.—City plans to install ornam. lights on Wilshire Blvd., from city boundary to city boundary, involv. 58,400 ft. cable and 239 iron posts. Conduit is already in place. Protests Oct. 4; 1911 act and 1915 bond act.

BERKELEY, Alameda Co., Cal.—H. C. Reid Co., 115 Mission St., San Francisco, at $6300 awarded cont. by city to install electrolier system, 30 standards in all, with conduits, etc., in Solano Ave., bet. The Alameda and Tulare Ave.

CULVER CITY, Cal.—Newbery Elec. Corp., 726 S Olive St., Los Angeles, awarded contract by city at $43,766 for ornam. lights in Washington Blvd., bet. Centinella Blvd. and W. city limits.

LOS ANGELES, Cal.—Geo. W. Kemper, P. O. Box 126, Alhambra, awarded cont. by Bd. Pub. Wks. at $16,144 for ornam. lights in San Vicente Blvd., bet. Frederal Ave. and Montana Ave.

MONROVIA, Cal.—City plans ornam. lights in Maple Ave.; concr. posts.

LOS ANGELES, Cal. — John R. Davies, 2131 Santee St., sub. low bid to county at $20,437 for ornam. lights in C. I. No. 562, Ashcroft Ave., 82 Union Met. posts.

BEVERLY HILLS, Cal.—Until 8 P. M., Sept. 20, bids will be rec. by city to fur. and install approx. 75 lanterns on portion of Santa Monica Blvd. Lantern similar in design to type No. 351,-646 in catalogue on file with city engr. B. J. Firminger, city clerk.

VENTURA, Cal.—Until 7:30 P. M., Sept. 20, bids will be rec. by city for ornam. lights in Ventura Ave., Spruce St., Santa Clara St. and Chrisman Ave.; pressed steel posts; 1915 bond act.

SAN DIEGO, Cal.—City plans ornam. lights in Garnet St., bet. Cass St. and Ocean Blvd., involv. Marbelite standards, canopies, refractors, found., conduits, etc.; Newport Ave., involv. stand., found., globes, refractors, etc.

LOS ANGELES, Cal.—Osborn Elec. Co., 450 California Terrace, Pasadena awarded cont. by Bd. Pub. Wks. at $16,756, for ornam. lights in 9th St., bet. Pacific Ave. and Meyler St.

Arcadia Constr. Co., Durate, award., cont. at $8611 for ornam. lights in Exposition Blvd., bet. Figueroa St. and Vermont Ave.

LOS ANGELES, Cal. — Underground Constr. Co., 2210 Hyperion St., sub. low bid to bd. pub. wks. at $30,888 for ornam. light sys. in 7th St., bet. Broadway and Figueroa.

LOS ANGELES, Cal.—Until 2 p. m., Oct. 4, bids will be rec. by county for ornam. lights in Rose Villa and other sts., C. I. 540.

LOS ANGELES, Cal.—John R. Davies, 2131 Santee St., award. cont. by county at $20,437 for ornam. lights in Ashcroft Ave., C. I. No. 562.

1926 Edition

San Francisco Building Laws

Ready For Distribution

With the issuance of this 1926 edition, the Building Ordinance Books heretofore published will be obsolete, inasmuch as many sections of the law have been amended and additional sections added.

This 1926 edition contains all revisions and additions to the code up to and including June 1926.

In addition to the Building Laws of San Francisco, the 1926 edition contains the FIRE ORDINANCES as regards the construction industry, the ELECTRICAL ORDINANCES, the SIGN ORDINANCE, the BILLBOARD ORDINANCE and other laws covering regulations concerning the construction interests.

Price $1.00 per copy.

TIMPIE
HYDRATED LIME

for Brick Mortar, White Coat and Sand Float Finish, and for inducing plasticity in and water proofing Portland Cement Concrete.

Used in approximately $70,000,000 High Class Pacific Coast construction in last 3 years.

EXAMPLES:—

New Standard Oil Building, San Francisco
Federal Reserve Bank
Pacific Telephone and Telegraph Building
Central Bank, Oakland
Oakland Savings Bank
New Subway Terminal Building, Los Angeles

Sold by most progressive dealers throughout Pacific Coast.

CONSTRUCTION COSTS IN AUGUST SHOW REDUCTIONS

Construction costs dropped during August, directly reflecting reductions in prices of several building materials. The decline placed these costs on a low plane touched in only one other month since March, 1923, according to statistics compiled by the Associated General Contractors of America.

Virtually a single level previously had been held for many months. Last month's reductions in prices of sand, gravel, crushed stone, cement, hollow building tile, brick and lumber brought about the first marked change witnessed since last August.

In only one month during the past five years have the average prices for building materials paid by general contractors been lower than they were last month.

Wages in the building trades held fast to the level which they assumed in June after dropping slightly from the May figure, which was the highest recorded for any month during the past five years.

The August index number for construction costs in general, based on the 1913 average, was 196. The corresponding index number for average prices of materials was 176, while the figure for wages was 226. Thus the total costs are shown to be following a line virtually midway between the trend of wages and the trend of material prices. This has been the tendency since early in 1923.

SAW TIMBER VALUE OF FORESTS PLACED AT $7,387,650,000

The Federal Trade Commission's report on "National Wealth and Income," just issued, estimates the value of the standing saw timber of the country at $7,387,650,000. The response of the timber owning companies to inquiries was so limited—only 330 companies reporting volume of timber and 215 giving valuations—that the resulting sample is not representative, but using it as a base, the foregoing total is obtained. This compares with a estimate of $6,000,000,000 made by the Bureau of Corporations in 1910, when the standing saw timber was calculated to be 2,800,000,000,000 feet, as against 2,200,000,000,000 feet in 1922, according to the Forest Service.

"Companies owning about 5 per cent of the timber stand replied as to the value of their stands," says the National Lumber Bulletin; "the valuation reported by companies in the western states averaging $2.34 per thousand feet, as compared with an average of $7.24 for the Lake States; $5.27 in the south; and $3.19 for all other states."

The report uses the 1922 Forest Service estimate of annual timber consumption in the United States of 22.5 billion feet or about two-fifths of the world consumption.

Since the 330 timber companies which reported as to volume of their holdings owned only about 7.5 per cent of the estimated standing timber of the country, the Commission concludes that this sample is not large enough to be truly representative. It, therefore, makes only a brief, partial analysis in connection with more extended quotation from government reports of 1910, 1913 and 1920.

The Commission's estimate of all national wealth as of December 31, 1922, is $353,035,862,000.

Rates of return on investment for all manufacturing in 1922 is given as 8.5 per cent; lumber and wood products showing 7.1 per cent; paper, pulp and products, 5.7 per cent; printing and publishing with rate of return of 21.6 per cent and chemicals and allied substances with 13.4 per cent heading the list of manufacturing classes.

OREGON PORTLAND AND SUN PORTLAND CEMENT WILL MERGE

Plans are reported to be under way for consolidation of the Oregon Portland Cement Company at Oswego and the Sun Portland Cement Company on the Snake River in Eastern Oregon. Shares of the two organizations are said to be largely controlled by the same group. R. P. Butchart of Victoria, B. C., is president of both companies.

Notices have been sent shareholders from the offices of both companies, outlining the proposed consolidation and asking consent of those holding voting privileges. A considerable increase in capital investment is contemplated in the merger, which is to take the form of sale of both properties to a new corporation now being formed by the group which holds majority control.

Consolidation at this time probably was precipitated by a similar move in July, whereby the Ross Island Sand & Gravel Company, controlled by a group of Portland capitalists, was merged with the Beaver Portland Cement Company which operates at Gold Hill, the largest cement plant in the state. The combination of the Ross Island Company, controlling approximately 25,000,000 cubic yards of sand and gravel, with the leading cement plant of the state presents serious competition to other cement manufacturers of the district.

Observers predict strenuous rivalry between the two groups, with a possible enlargement of mergers among Pacific Coast plants.

The Ross Island Company, of which D. L. Carpenter is president, through the control of the vast sand and gravel deposits on islands in the Willamette river, is said to control a major portion of this district's visible supply of building materials. Evidence of the struggle now beginning has been presented at recent hearings before the Portland Chamber of Commerce at which vigorous protests were made against importation of cement and other building materials for use in construction.

A. W. HEAVENRICH, LUMBER CHIEF, DIES AT FRESNO

Arthur W. Heavenrich, general sales manager of the Madera Sugar Pine Lumber Company of San Francisco, died in a Fresno hospital, Sept. 19, following an illness of several years. He was 44 years old.

Twenty-six years ago, Heavenrich, then a 19-year-old youth, arrived in Madera, Cal., from Saginaw, Mich., and got a job in the yards of the Madera Sugar Pine Lumber Company, bunking green lumber.

Step by step, fighting his way upward by sheer hard work and close application, the youth proceeded until 1910, when he was only 29 years old, he was made manager of the big plant of the company. This position he held until 1923, when a breakdown in health occurred and he was given the less-strenuous position of sales manager, the position he held at the time of his death.

He was president of the California White and Sugar Pine Manufacturers' Association and a member of the University Club of Los Angeles.

GRADE CROSSING ACCIDENTS

During the 7-year period 1917-1923. As a result of accidents at highway railroad crossings, there was a yearly average of 1882 deaths and 5100 injuries. During 1924 there were 2149 persons killed and 6525 injured.

TO TEST FROZEN CONCRETE

Pennsylvania State College is planning to conduct an experiment this fall and winter on the effect of frost on concrete, the coarse aggregate used to be a good quality local sand stone.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Bethlehem Shipbuilding Corp., bidding $1,050,000, has contract to construct two all steel, electrically driven auto ferry boats. Each boat will have a capacity of 95 autos. These are the first of a new fleet of six boats for transbay service.

Alvin Burton of Fresno is the first non-union carpenter to receive an award for injuries received at the hands of strike sympathizers in San Francisco in connection with the strike of union carpenters on non-union jobs. Compensation of $29.75 was awarded by the industrial accident commission for injuries received when Burton was attacked by a group of men.

Street improvement jobs in Santa Barbara during the coming year will be grouped into large contracts wherever possible as a means of securing better prices from contractors and to cut down the cost of incidental plans, according to an announcement by City Manager Rolison, who has been working on the plan with City Engineer Moore.

Sale of the south grove of the Calaveras big trees by Robert Whiteside to the Pickering Lumber Company is confirmed by J. C. Rassenfoss, manager of the Pickering Lumber Company in Sonora. The sale involves between 11,000 and 12,000 acres of the finest virgin stand of sequoia gigantea in America. The property was held for over twenty-five years by Whiteside and on numerous occasions was sought by the Government and by groups of Californians for public park purposes.

"Carpenters of the bay cities will win their strike against the American plan no matter how many millions of dollars it costs us." With this statement as the keynote of his speech, Archibald Mooney, representative of the United Brotherhood of Carpenters and Joiners of America, addressed the California Federation of Labor in Oakland, Sept. 21st. Mooney asserted that the bay unions involved have lost only three percent of their membership during the strike.

Financing of $35,000,000 will shortly be required to handle the huge cement combine announced from New York. The companies in the merger are Pennsylvania Cement company, Dexter Portland Cement company, Dixie Portland Cement company and Clinchfield Portland Cement corporation. The new company, a Delaware corporation, will be known as the Pennsylvania-Dixie Portland Cement corporation, one of the largest in the country, with a capacity of 10,000,000 barrels per year.

John F. Miller in charge of the Bureau of Entomology at Stanford University, is in Susanville arranging for a series of tests in an endeavor to completely exterminate worms which are doing considerable damage to lumber and trees in the Lassen County section. Preliminary investigations showed that the worm picks boards with a barky edge. After a short time it bores through the entire width of the board as if a bit and brace had been used. It then goes to another board and does similar damage.

A statement in the Weekly News Service of the American Federation of Labor under date of August 21, 1926, to the effect that "organized labor insists that industry is largely seasonal and that losses during strike time are mythical" is entirely disproved by recent statistics published by the United States Bureau of Labor Statistics. Out of 16,172 strikes during the ten year period from 1916 to 1925 for which settlement figures are available, 4727 or 29.2 per cent are reported as being settled in favor of employes.

Sounding a warning of the danger of overbuilding of homes, R. Holtby Myers, Los Angeles, president of the Pacific States Savings & Loan Conference, told the delegates representing ten western states at the Pacific States Savings & Loan Conference in Salt Lake City that a decline in property values and rentals in many sections of the country was already noticeable. This will be followed, he said, by a decline in capital value, and in the fierce competition for a livelihood, there will be a decline in construction costs and profits, all of which we should be prepared for by a conservative policy in making loans, a rather difficult spirit to generate when money is plenty and the borrowers reckless regarding their promise to pay.

The State Railroad Commission has granted a certificate to Sierra & San Francisco Power Company and Pacific Gas & Electric Company, lessee, authorizing enlargement of the Spring Gap power plant of the former company on the south fork of the Stanislaus river at a cost of $1,950,000. It is proposed to build a new rock filled dam on the south fork of the Stanislaus river four miles above Strawberry reservoirs, creating what will be known as the Big Dam reservoir, increasing the output of the plant to 55,000,000 kilowatt hours per year.

A recent survey of the National Industrial Conference Board shows that the average hourly earnings of all wage earners showed a small increase, rising from 56.1 cents in April to 56.2 cents in May. Average weekly earnings declined from $27.27 in April to $27.13 in May. In both hourly and weekly earnings increases and decreases were very evenly divided as to number of industries affected, and as a rule were small in amount. No change in the level of "real" earnings occurred between April and May since the decline in money earnings and in the cost of living was too small to have appreciable effect.

Steel consumers are beginning to take fourth quarter requirements in such volume as to indicate no let-down in production during the remainder of the year, according to an interview by Eugene Grace, president of Bethlehem Steel Corporation, in Wall Street Journal. "Important railroad buying abroad, and heavy demands for construction are hopeful features of the market now," said Grace. Grace anticipates no let-down in motor car output, but said even a 10 per cent reduction would only reduce steel output by 1 per cent.

A recent development in the field of co-operation is the building and ownership of homes which is being carried out by various co-operative societies in the United States, mainly in apartment houses in New York City and Brooklyn. An article in the current issue of the Monthly Labor Review shows that there are at least 40 societies which are building houses for their members on a nonprofit basis. The cost of the property controlled by 32 societies included in the present study amounted to more than $4,000,000 while several large-scale projects are now under way in New York City. One of the principal savings in this type of co-operation is cost of financing as frequently the building society has been able to borrow funds, at favorable interest rates, and without commissions, from other co-operative societies.

The steady increase in the cost of the small home is shown in a bulletin of "Housing" just issued by the United States Department of Labor. Following an analysis of various costs that enter into the construction of a small home, the bulletin says "the aggregate value of all buildings constructed, after a sharp decline in 1917 and 1918, reached a peak of 475 in 1925; that is, for every dollar spent in building construction in 1914 there was spent $4.75 in 1925. On the other hand, the cost of construction climbed steadily until a peak of 235 was reached in 1920; it declined to 183 in 1922, after which it rose each year, but in 1925 was still behind the level in 1920. In other words, a house which cost $5,000 in 1914 would have cost $11,750 in 1920, $10,350 in 1924 and $10,000 in 1925."

According to the Service Bulletin of the Iowa Highway Commission salesmen, who are paid for the use of their cars on a mileage basis and who travel all classes of roads, find that the saving on paved roads over that on ordinary earth averages 2½ cents per mile. Few people keep an accurate account of the cost of their automobile transportation. Traveling salesmen who use cars constantly and particularly those who are paid upon the mileage basis usually keep a somewhat accurate account. A tabulation or summarization of hundreds of these accounts, bears out the expressed opinion that the saving on paved roads is at the approximate rate of 2½ cents per mile.

The sum of $6,000,000 for new buildings for the University of California and $2,500,000 for new State administrative buildings, to be allotted equally between the northern and southern sections of the State, is asked in constitutional amendment No. 10, which will be voted upon at the November election. From the university fund, half of the amount will be spent at Berkeley in replacing forty-one temporary buildings which have been pronounced unfit for use. The other half will be spent for buildings on the new Westwood campus of the university's southern branch at Los Angeles. Out of the fund for State building purposes it is planned to use half of the amount in completing the Capitol extension building at Sacramento. The other half will be spent for a new State building in Los Angeles, similar to the one in San Francisco.

ALONG THE LINE

Portland, Ore., city council contemplates $1,000,000 bond issue to finance purchase and improvement of public park lands.

Pacific Grove, Monterey County, will vote on the proposal to adopt the city manager form of government. Election will be held Oct. 21.

Frank C. Townes has been granted a franchise by the San Mateo county supervisors to construct a bridge over San Francisco Bay at Coyote Point. The cost of construction is estimated at $12,000,000.

John T. Mabey, contractor and pioneer resident of Berkeley, died in that city Sept. 18, following an illness of eight weeks. He was a native of Kingcoombe, Dorset, England.

Resolutions calling upon the Utah delegation in Congress to seek "development of the Colorado river by means of public control rather than corporate ownership, patterned after the Roosevelt power and water project in Arizona," were passed at the annual convention of the Utah State Federation of Labor. Another resolution requested federal legislation forcing the labeling of prison-made goods in interstate transit "convict-made."

A bond issue of $12,000,000 for flood control in San Fernando Valley, Los Angeles river and other sections of Los Angeles county will be submitted at the November election, according to announcement at a special meeting of the board of supervisors. Height of the Big Tujunga dam is to be reduced from 400 to 240 ft., cutting reservoir capacity to 30,000 acre feet.

A special committee of property owners is investigating prices of street pavement in Bakersfield. The claim is made that they are now paying from 12 to 22 per cent higher for paving than is paid in other cities in the San Joaquin Valley. The investigation has the endorsement of the Bakersfield Civic Commercial Association.

The city of San Jose on November 2 will decide on the issuance of bonds totaling $1,275,000 to finance various improvements. The issue is segregated as follows: $80,000 for acquisition and construction of dams, securing of water rights, and installation of a water supply system in Alum Rock park; $75,000 for the construction of roads and bridges in Alum Rock park; $20,000 for the construction of comfort station and the installation of a sewage system and sewage disposal system in Alum Rock park; $275,000 for the construction of bridges in San Jose; $75,000 for the system and sewage disposal system in San Jose; $750,000 for the acquisition of property and the construction of a municipal auditorium.

Desmond Fitzgerald, $0, former president of the American Society of Civil Engineers, died in Brookline, Mass., Sept. 22. He was prominently identified with hydraulic engineering enterprises on both the Atlantic and Pacific coasts.

The American Engineering Standards Committee working with the National Safety Council is preparing to issue a national safety code for construction work which is expected to be out at an early date. On the sectional committee there are representatives of fourteen national organizations. In addition the industrial commissions of California, Illinois, New Jersey, New York, Ohio and Wisconsin are represented on the committee.

Rudolph A. Herold, late Sacramento architect, left an estate valued at $284,897.74, it was disclosed when an appraisal was filed in superior court. The estate comprises real property, cash, notes, stocks, furniture and miscellaneous personal effects. The largest parcel of real property consists of lot 1, Ninth and Tenth, K and L Streets, Sacramento, valued at $200,000.

U. S. Civil Service Commission announces applications will be considered until October 19 for competitive examinations to be held in the immediate future for the following positions: Architectural draftsman, paying $225 a month; electrical engineering draftsman, $200 a month; structural engineering draftsman, $225 a month, topographic draftsman, $200 a month. Full information and application blanks may be obtained from the United States Civil Service Commission, Washington, D. C., or the secretary of the board of U. S. civil-service examiners at the Post Office or Customhouse in any city.

TRADE NOTES

George Smith, 835 Fifty-first St., Oakland, will operate in the East Bay District under the trade name of Emeryville Planing Mill.

Felton Sand & Gravel Company is constructing a plant on the Mount Hermon road near Felton, Santa Cruz county. Two electric elevator loaders are in course of construction, one at Felton and another on the Blackburn Estate near Mt. Hermon.

Baker Oil Burner Co. of Carson City, Nevada, has filed articles of incorporation in Oakland. The company is capitalized for $100,000 and has the following directors: Geo. E. Kitzmeyer, A. S. Kirkpatrick both of San Francisco and H. De Kitt Trenem Jr. of Oakland.

Agra Waterproofing Stucco Products Company of Oakland has been incorporated with a capital stock of $150,000. Directors are: John R. F. Detter, A. J. Hillan, Velva Anderson, E. J. Dollard and James H. Boyer, all of Oakland.

Sierra Machine Co., formerly of the San Joaquin Valley, has leased 3600 square feet of floor space at Dennison and King Streets, Oakland, and will engage in the manufacture and sale of deep well pumps and cylinders.

Huntington Planing Mill has commenced operations in a new plant at 616 Wilson street, Santa Rosa. The mill is operated by Harry Huntington.

Jos. J. Allen of Red Bluff has purchased the stock of Allen & Allen, plumbing and heating contractors of Redding, and will move the business from Redding to Red Bluff.

Patent Scaffolding Co. of California, capitalized for $5000, has been incorporated with the principal place of business in San Francisco. Directors are R. C. Barsch, G. Gronemeyer and J. W. Marshall.

McGeary Electric Company has moved to new and larger quarters in the Arlington Block, Santa Barbara. Projects recently completed by the company include the Bates Medical Building, the Victoria Hotel, the Neal Hotel, Crane Plumbing Building, and the residence of C. C. Witmer on Hope Ranch.

Berkeley Building Supply Co. of Berkeley, capitalized for $50,000 has been incorporated. Directors are: E. A. Mitchell, G. E. Knapp, M. H. Stanley, C. P. Earl and Fred L. Holbrook.

Issuance of a franchise to the Builders and Material Dealers' Guarantee Corporation, a $600,000 Oakland company, is announced by the secretary of state's office. The company, headquarters of which will be in Oakland, will engage in the building material and finance business. Directors are: Arthur T. Riggs, Oakland; W. S. Faulkner, Alameda, and James P. Sweeney, San Francisco.

The California & Oregon Lumber Co., which operated near Brookings, Ore., and in Del Norte county, Calif., is dismantling its plant. Andy Mahoney has bought some 50,000,000 ft. of the firm's redwood and Hobbs, Wall & Co. have bought the steel and equipment of seven miles of logging track. The Brookings family, largely interested, formerly operated in the vicinity of San Bernardino.

Kalman Floor Co. of Wilmington, Del., capitalized for $100,000, has filed articles of incorporation in Oakland. Directors are: T. L. Croteau, M. A. Bruce and A. M. Hoover all of Wilmington.

Edwards Ice Machine Company of Portland, Ore., and Seattle, Wash., has taken a 10-year lease on a two-story structure at Landregan and Powell Streets, Emeryville, and will engage in the manufacture of heavy refrigerating equipment.

W. R. Young, engineer with the U. S. Bureau of Reclamation, in a report just submitted discloses plans for a $56,000,000 irrigation project, embracing 277,000 acres in the Sacramento Valley. Included in the proposed project was construction of the Iron Canyon storage dam, 150 feet high, near Red Bluff, Calif., and a main canal some 120 miles in length extending from a diversion dam below Red Bluff to about sixteen miles south of Colusa.

Quinault Lumber Mill at Raymond, Wash., valued at $135,000, was destroyed by fire Sept. 11. Fire is believed to be of incendiary origin. The Hart Wood ship and mill interests, Carl Gylling and Eugene France of Aberdeen, Wash., were the principal owners of the mill.

C. A. Low director of sales for the Monolith Portland Cement Company, who recently made an extended motor tour of the northwest, reports business conditions, while not showing any spectacular spurt, are encouraging throughout the state.

The Atlas Portland Cement Company, 25 Broadway, New York City, has recently put out the following publications of interest to architects, engineers and contractors: Swimming Pools, Ornamental Cast Work, Mortar, Remodeling With Stucco, Terrazzo, Houses of Stucco. Any of these publications may be had on application.

Location of warehouses in San Francisco and Oakland as part of a chain on the Pacific Coast has just been completed by the United States Gypsum Company. This chain warehousing system is being tried out simultaneously by the Gypsum company on the Atlantic and Pacific coasts. Such distributing methods represent the tendency of modern manufacturers to make their materials easier of access to dealers and consumers. The San Francisco warehouse is at 559 Tenth Street, and will be devoted exclusively to the warehousing of incombustible gypsum wallboard and shelving. The Oakland warehouse is located at 1025 Fruitvale Avenue, and will stock gypsum wallboard and finishing materials. Others of the company's products—plaster, stucco, sheathing, lath, etc.—will be distributed through the original channels.

Organization of the Osgood Panel & Veneer Company of Tacoma, Wash., to manufacture all types of panels and veneer ply-wood in a new plant to be erected on the Hylebos waterway, near the old Todd shipyards, is announced byy Geo. H. Osgood, for five years past in charge of the veneer and ply-wood department of the Wheeler-Osgood Company of Tacoma. The new company will be capitalized at $200,000. It is proposed to have the plant ready for operation Jan. 1, 1927. Others interested in the company are George J. Osgood, vice-president; Frank Townsend, treasurer, and Frank D. Oakley, secretary.

The largest timber deal closed in the Marshfield, Ore., section in many years was recently completed between the Western White Cedar Company and the Stout Lumber Company, involving delivery of 40,000,000 feet of white cedar logs to the Western White Cedar Company within the next two years. The timber will come from South slough, where the Stout Lumber Company has a camp cutting into the midst of the finest white cedar stand in the world. No price was named in the deal, but it is figured between $1,500,000 and $2,000,000.

Coast Rock & Gravel Company, a corporation, having filed a complaint with the Railroad Commission against Southern Pacific Company and the Atchison, Topeka and Santa Fe Railway Company alleging that charges assessed on carloads of crushed rock, sand and gravel moving from Eliot on the Southern Pacific line to Track 29, Pier 50, on the Atchison, Topeka and Santa Fe Railway in the China Basin District in San Francisco, were excessive, plus two switching charges, amounting to $6.20 per car, the Railroad Commission has ordered defendants to refrain from collecting such switching charges in the future and to refund as reparation the amount of $6.20 per car on all shipments involved.

AUTO CAMP PAYS

In 1925, 79,433 campers in 23,558 automobiles visited the Denver municipal auto camp from whom the city collected $14,700 in fees.

ORGANIZATION NEWS

Painting, heretofore a part of the general contract in all building operations undertaken by the City and County of San Francisco, is to be segregated hereafter, according to a decision of the Board of Public Works. The action was taken following a protest by the Master Painters' Association that independent painting contractors received little opportunity to bid on the work.

The Artistic Lighting Equipment Association, formerly the National Council of Lighting Fixture Manufacturers, is completing plans for the largest and most elaborate display of lighting equipment ever undertaken by the industry. This display will be a part of the National Exhibition to be held at the Hollenden Hotel, Cleveland, Ohio, Jan. 31st to Feb. 5th, next, inclusive.

Letters of protests have been received by the San Jose city council opposing Ordinance No. 2075, providing for weighing of sand and gravel sold within the city limits. Letters were received from individual teamsters, the building trades council of Santa Clara County, and from the teamsters' union.

WAGE INCREASES REDUCE RATE OF PRODUCTION

Speaking before the New York Industrial Survey Commission, C. G. Norman, Chairman of the Board of Governors of the Building Trades Employers Association of New York said, "Every raise of wage in the building trades during the last twenty years has reduced the rate of production. Labor is restricting industry by means of closed books. There are very few unions in the building trades of New York that do not have restrictions to keep workers out by refusing to let competent workers and apprentices join their ranks. By keeping down the amount of available labor there is created an artificial shortage which enables the unions to keep wages artificially high, make higher wage demands, and limit the amount of work done for the increased rates."

SEEK STRIKE SETTLEMENT

A public protest to Mayor Rolph against the continuation of violence in the San Francisco carpenters' and molders' strikes has been made by a committee of more than 100 San Francisco business and professional men, headed by Attorney T. T. C. Gregory as spokesman. The entire committee, which gathered first at the Chamber of Commerce headquarters, assembled at the City Hall and was given a hearing by the Mayor, together with Theodore J. Roche, president of the Police Commission, and Chief of Police O'Brien.

As a result of the protest and open discussion at the meeting a special committee of five citizens, to be named by Gregory, will be formed, which will confer with Mayor Rolph, Roche and Chief O'Brien next week for the purpose of formulating some plan to quell the rioting which has attended the two strikes here.

Charges of inefficiency in the administration of justice in San Francisco were made by Gregory in his opening statement to the Mayor, in which he pointed to 272 cases of assault since April, out of which only fifteen convictions have resulted.

HIGHWAY RESEARCH MEET

Preliminary plans are well advanced for the 6th annual meeting of the Highway Research Board, National Research Council, which will be held in the National Academy of Sciences-National Research Council Bldg. at Washington, D. C., on December 2 and 3, 1926.

MATERIAL DEALERS INSPECT CALAVERAS PLANT

A luncheon of the Building Material Dealers of Northern California was held in Sacramento, Saturday, Sept. 18. Leonard Rosenberg of Hayward acted as chairman and Frank L. Hatch of San Francisco secretary, reported the minutes.

The purpose of the luncheon was to acquaint the Sacramento building material dealers with the work and aims of the association. Twelve dealers from Sacramento attended the luncheon.

Arrangements were made at the meeting for the co-operation of the material dealers association with the State Lumber Dealers' Association for the purpose of improving conditions throughout the industry.

Several of the material dealers spoke on the business conditions prevalent in their respective territories. Cities represented at the meet luncheon included San Francisco, Oakland, Berkeley, Stockton, San Rafael, Hayward, Santa Rosa, Auburn, San Jose, Burlingame, Modesto and Eureka.

Following adjournment, an invitation extended by Alfred Durbrow of the Calaveras Cement Company, was accepted to visit the company's new cement plant at San Andreas. The trip was made by automobile. After inspection of the plant the guests were dined and entertained. The inspection trip was conducted by P. S. Taylor, who explained the manufacture of cement from the quarry to the product in the sack.

Alfred Durbow of the Calaveras sales staff and Wm. J. Feary of the Holmes Lime & Cement Company of San Francisco, featured in story telling during the plant luncheon.

U. S. SUPREME COURT DEFINES PEACEFUL PICKETING

Once more the Supreme Court attempts to define the right of "peaceful picketing." Chief Justice Taft has written the opinion, and in notably plain phrase seeks to inform organized labor as to the line which is drawn between its rights and the abuse of the rights of other people.

Based on the assumption of the present legality of the strike, the accosting of any person in an inoffensive way, and the offer to communicate information and discuss matters, even with a view to influencing action, is not regarded as agression or a violation of another's right. This is persuasion.

But, the court says, "If the offer is declined, as it may rightfully be, then persistance, importunity, following and dogging become unjustifiable annoyance and obstruction, which is likely soon to saver of intimidation. From all this the person sought to be influenced has a right to be free, and his employers have right to have him free."

FIVE HUNDRED EXHIBITORS AT ROAD SHOW

Five hundred exhibitors will contribute road-building machinery fer display during the All Western Road Show to be held on the San Francisco Marina from October 7 to October 15, according to a report made by Tracy W. Harron, president.

Representing millions of dollars in highway machinery and accesseries, this year's All Western Road Show will occupy more than one million square feet of territery to house the mammoth exhibit. Eleven western states are sponsering the show, and those in charge report that more than 10,000 persons will come to San Francisco during the week of the show. Simultaneously with the period of the show there will be in San Francisco ten conventions in sessions, composed of units affiliated with road building and highway improvements of the west. National regional, state and civic officials, engineers and other representatives will be in attendance to discuss mutual problems and further the work ef better transpertation systems.

SCHUMACHER CORPORATION OUT FOR FOREIGN BUSINESS

Manufacturing facilities of the Schumacher Wall Board Corperation at both Seattle and Los Angeles will be enlarged considerably as a result of the recent transactien in which some of the stock of the concern was acquired by interests outside of the Schumacher family, according to A. R. Meylan, vice-president and general manager. That expansion will be undertaken owing to the fact that the trausaction makes new capital available, he said, adding that no change in the policies or management of the corporation is contemplated.

"It is our plan to devote considerable effert to the intensive development of the foreign markets," the executive continued. "We already have an excellent start so far as that end of the business is concerned. We consider that our sales organization and distribution facilities in the Pacific Northwest and along the remainder of the coast can hardly be improved upen."

C. V. Harrington, Seattle sales manager for the Schumacher corporation, continues in charge of the Pacific Northwest territory, and the remainder of the personnel remains unchanged. Earl Schmidt, who has been in charge of general sales for the last eight years, will be retained in that position.

California cities and counties spent $44,438,566 last year to keep state reads in the van of progress, according to figures contained in the annual report on the financial expenditures. Conservation of health cost $2,839,782, while the protection of health and property necessitated an expenditure of $35,313,900, $26,100,733 of which was paid by the city folks. Property owned by the cities and counties is valued in the report at $878,346,919, a large portion of which consists of school buildings and property. City halls are valued at $21,305,736 and courthouses $24,371,169.

Fresno Builders Vote To Strengthen Rather Than Dissolve Organization

Decision not to dissolve the Fresno Builders' Exchange, coupled with determination to carry on an educational campaign favoring the Fresno plan, marked the meeting of the exchange held in Fresno Sept. 20.

An active membership campaign, with a view to making the organization stronger and able to put over successfully its plans, was also decided upon, while election of a new board of directors was set for a later date, after re-organization.

No action was taken at the meeting looking ferward to negotiating.

For more than two hours and a half, 44 men, representatives of material dealers and contractors of Fresno, discussed the situation. Abandonment of the Builders' Exchange was held unwise. There are many ways, it was pointed out, in which an exchange composed of contractors and dealers in building supplies can be useful to members, aside from representing the body in dealing with organized labor.

Adopt Resolution

Free discussion marked the meeting, many of those present taking part.

Provisions of the official resolution adopted by the exchange follow:

1. That the Fresno Builders' Exchange take no action at this meeting to negotiate an agreement with organized laber.

2. To carry on an active membership campaign looking toward the strengthening of the membership of the exchange.

3. All members to carry on an educational campaign favoring the Fresno plan.

4. The election of a new board of directers to be after reorganization.

Essential points in the Fresno plan, as outlined by those present, are, first, constitutien of a joint conference board; second, signing of an agreement which sets not only wages but working conditions.

It is possible for closed shop conditions to prevail here without an agreement, such being the case at present. The agreement, which expired June 16, has never been renewed, refusal of union delegates to sign at the old wage scale being the cause. The action led to the re-entrance of the Valley Industrial Association on the scene, which adopted an American plan declaration. At the present time the industrial association is proceeding with its plan for introducing the American Plan here.

The Builders' Exchange and the Industrial Association are not necessarily conflicting organizations, it was stated. Members of one organization may and do belong to the other. One chief differenee, it is said, is that the exchange is limited to men actually engaged in the building trades or furnishing material for it.

To Strengthen Exchange

Thorough strengthening of the Exchange is expected to be the first step now. The question of signing an agreement with the Fresno Building Trades Council will afterward be considered.

Advocacy of a long term agreement, formerly opposed, is now being more frequently heard. In labor union circles it is apparently generally agreed that the long term agreement, which would reduce the danger of splits between the twe organizations, would be advisable. It is also thought desirable by members of the exchange though the general sentiment of its members is undetermined.

Such a long term agreement would have to contain prevision for change in wage scales in case of unforseen events, it was pointed out.

President J. G. Martin presided over the meeting.

Lumber Freight Bill In 1924

The gross freight bill on lumber in 1924 amounted to approximately $408,500,000, or about $12 for every thousand feet of lumber consumed in the United States, according to the National Lumber Bulletin which quotes these and other figures in its September issue from a recent preliminary compilation of the United States Forest Service.

The study covers softwoods and hardwoods shipped by rail and water for domestic and foreign consumption, and includes lumber, timbers, sawed ties and a small proportion of other items.

The rail-shipped lumber was hauled on an average of over 7000 miles; the average water haul was 2500 miles. The average charge for rail haul, including reshipments, was approximately $13.83 per thousand feet; for primary rail haul from producer to distributer, $10; for water haul, $8.

The freight bill omitting redistribution totaled $309,700,000, of which $17,000,000 is due to imports of foreign lumber. To this should be added $98,800,000 for distribution to consumer, the total bill thus aggregating $408,500,000.

Detailed analysis is made of the primary haul. Of the $310,000,000 paid to carry lumber to primary destination it is estimated that $273,000,000 was paid the railroads in 1921 and nearly $37,000,000 the steamers, compared with $230,000,000 in 1920 for the rail bill and $20,000,00 for the water bill.

Of this primary haul figure of approximately $310,000,000, the cost of transporting the product of the Southern pine region is given as $92,000,000 or nearly one-third of the total; that fer lumber from the Pacific Northwest as $80,000,000. Intra-state shipping cost nearly $54,000,000.

New York paid about 12 per cent of this total freight bill, New York, Illinois, Pennsylvania, California, Michigan, Ohio, Minnesota, and Texas together paid 54 per cent of the total, the size of their contributions being in the order named. These eight states, with Indiana, Massachusetts, Iowa, and Wisconsin, paid 66.6 per cent on two-thirds of the entire primary transportation charge of the country.

Florida paid the lowest aggregate rate er $5.26 per M feet; Iowa, the highest or $15.12; Illinois, $11.19 and New York, $12.56. The average fer the country as a whole, including imports, was $9.09 in primary distribution. The charge for redistribution appears to have been about $2.90 per thousand feet, counting both rail and water.

Apprentice The Youth Of The Country—Plea of Federal Chief

According to J. M. Hall, chief of the Trades and Industrial Division of the Federal Board for Vocational Education, unless the youth of the country is apprenticed in adequate numbers to the skilled trade the American people will soon be confronted by a lack of available mechanical skill. Unless, in Secretary Hoover's opinion, interest can be stimulated amoung the rising generation in apprenticeship to the trade, the skilled work will fall into the hands of alien immigrants. Irregularity of employment is given as one of the causes for this situation, and to meet and overcome it Mr. Hall advocates adjustment of the demand for construction work by spreading it over the whole year, instead of crowding it into one or two seasons. He also urges a more organized apprenticeship to make labor more efficient and speed operation. He suggests a program of the following characteristics:

1. A central apprenticeship committee or commission should be organized to plan and direct the work.
2. Sub-committees should be organized for each craft represented to carry out the plans of the central committee for the training of apprentices in their respective trades.
3. Apprentices should attend school during their working day.
4. Contractors should pay apprentices full wages for the time they are in school.
5. The school training should emphasize technical instruction.
6. Instructors should receive special training in methods of teaching their trade.
7. Instructors should be masters of their trades.
8. Attendance should be compulsory
9. Classes should be restricted to employed apprentices.
10. Classes should be limited to fifteen or twenty apprentices to one instructor.
11. Attendance certificates should be issued to every apprentice.

Hoover Committee Contemplates Huge Economies In Housebuilding

"Millions of dollars will be saved the housebuilder and millions of feet of lumber now often wasted will be diverted to useful purposes, if the recommendations of the Construction Sub-committee of the National Committee on Wood Utilization, Department of Commerce, are followed by the consuming public," says a statement issued today by the Committee.

Secretary Hoover is the chairman of the Committee and Colonel W. B. Greeley, United States Forester, is vice-chairman. The sub-committee is composed of leading architects and builders from all sections of the country.

"This sub-committee," continues the statement, "has assembled a mass of material on house construction, including farm dwellings. The study is by far the most complete of its kind ever undertaken, and has developed methods whereby the prospective home owners can specify such sizes as, in many cases, would save one-third of the lumber bill. When it is realized that about thirty-five per cent of the cost of the average house covers lumber, and that we have just passed through a six billion dollar building activity, it may readily be seen that the sub-committee's work will save a very substantial sum to the American home owner.

"Another feature, perhaps even more important, is the maintenance of reasonable lumber prices for all time to come. This, the Committee believes, can best be done by educating the public to purchase its requirements cut as nearly as possible to exact sizes needed, instead of buying long lengths which can be obtained only with difficulty and at an extra cost, cutting these lengths into shorter stock on the job. This is considered one of the most important questions on the program of the National Committee which has, for its object, to find a use for every inch of the tree.

"The sub-committee on construction will hold a meeting on October 1 in the Department of Commerce for the purpose of considering the report which is now ready, and to decide on the method of acquainting the public with its findings.

Foreign Cement Shipments Menace To Trade Home Policy

to remain a national policy, the time has arrived to increase the tariff on portland cement, for during the first quarter of this year nearly $2,000,000 of cement was imported. This is about double the importation during the first quarter of 1925. The rapid increase clearly indicates the seriousness of the situation.

Foreign cement sells at Atlantic coast points at 40 to 60 cents, a barrel below the price of domestic cement. About 75 per cent of the cement comes from Belgium, and 20 per cent from Denmark and Faroe Islands. Curiously enough, much of it is brought in U. S. Shipping Board vessels. Thus a "merchant marine" built to extend American commerce abroad, is being used, in this instance, to cripple American industries at home.

The present producing capacity of American cement mills is about 200,000,000 barrels annually, and it will be only a few months before this is increased to about 210,000,000 barrels. Last year (1925) was the greatest year for cement consumption. About 158,000,000 barrels were marketed, or less than 80 per cent of the then capacity of the mills.

The investment in the American cement industry is conservatively estimated at half a billion dollars. This vast industry has been built up largely as a result of the educational work carried on for many years by the cement manufacturers who are associated in an educational research enterprise known as the Portland Cement Association. If foreign producers are allowed the benefit from this educational work, it will be at the expense of American cement manufacturers and their employees.

Although a score of cement mills are operating within a few miles of Philadelphia, in the celebrated Lehigh District, we understand that not a single barrel of domestic cement is being used on the several million dollars' worth of street work now in progress in Philadelphia. Such instances make it clear that the importation of cement has already reached serious proportions.

It might be inferred that only American cement manufacturers will suffer much from this foreign competition, but it should be remembered that their employees will be the greatest sufferers. Moreover, there is an ever widening wave of distress caused by any serious disturbance in any large industry. For example, the employees of textile mills that make cement bags will be seriously affected. Railway employees engaged in transporting cement will be hit. Coal miners who produce coal for cement manufacturers, for textile manufacture, and for rail transportation will be affected. And all this is only near the origin of the wave of disturbance, and only a part of the disturbance near the origin.

We need not dwell on the irresponsibility of foreign cement manufacturers as to their product. Nor on the risks that exist in cement structures, where the cement lacks the proper strength. These are minor matters compared with the very grave matter of injury to a great American industry, with its consequent injury not only to the employees in that industry but to all who are co-operative units in producing and transporting the raw materials from which cement is made, as well as the finished product.—(Roads and Streets).

PROTEST PROPOSED TAX

A proposed ordinance for adoption at a meeting of the city trustees of Redwood City, which would reqhire building tradesmen to pay a yearly tax of $50 for a license, drew the fire of a committee from the painters and carpenters unions in that section.

Mayor Henry Beeger explained that the ordinance had been framed to protect home builders of the city from fly-by-night contractors, and that it had been requested by a number of men representing several building trades. In fact, he declared, some had recommended a tax of $100.

Spokesmen for the unions declared that there were many who could not afford to pay the tax; that it would not affect the big contractor, but would increase the burden of the little one, and that is would increase building costs.

The matter was continued to October 4, when all sides will be given an opportunity for expression.

TO REVIEW LABOR CONDITIONS IN EAST BAY DISTRICT

A mass meeting of the Builders' Exchange of Alameda County will be held in the Builder's Exchange Building, 354 Hobart Street, Oakland, next Tuesday to present to the membership of that organization a review of labor conditions in the construction industry in the East Bay section for the first nine months of 1926, according to an announcement of E. M. Tilden, president of the exchange.

APARTMENTS

Structural Steel Contract Awarded.
APARTMENTS $1,000,000 or more
SAN FRANCISCO, S. W. Jones and California Sts.
Fifteen-story class A apartment house 100 2 to 5-room apartments.
Owner—Jones-California Inc.
Architect—Weeks & Day, 315 Montgomery St., S F.
Contractor—Cahill Bros., 55 New Montgomery St., S F.
Structural Steel—Central Iron Works, 2050 Bryant St.
As previously reported—Excavating to Granfield, Farrar & Carlin, 67 Hoff Ave., S. F., $7,480.

Mill Work Contract Awarded.
APARTMENTS Cost, $——
SAN FRANCISCO, N Fulton Street near Gough St.
Four-story and basement reinforced concrete apartment house.
Owner—M. Vukicevich and E. V. Lacey, Hearst Bldg., S. F.
Architect—C. O. Clausen, Hearst Bldg. San Francisco.
Mill work—Reinhardt Mill and Lumber Co., Jerrold and Barneveld Sts., San Francisco.
As previously reported Concrete to L. Vannucci, 1875 San Bruno Ave., S. F. Reinforcing steel to Badt-Falk & Co., 74 New Montgomery St., S. F.
Sub-bids being taken on other portions of the work.

To be Done by Day's Work.
APARTMENTS Cost, $50,000
SAN FRANCISCO. S Page 82-6 E Octavia St.
Four-story and basement reinforced concrete (20) apartments.
Owner—E. V. Lacey, 708 Hearst Bldg., San Francisco.
Architect—C. O. Clausen, Hearst Bldg., San Francisco.

Contract Awarded.
AUARTMENTS Cost, $25,000
SAN FRANCISCO. W Clayton St. 150 N Hayes St.
Three-story and basement frame (12) apartments.
Owner—Anker, 1523 California St., San Francisco.
Architect—J. C. Hladik, Monadnock Bldg., San Francisco.
Contractor—D. Schifski, 22 Arleta St., San Francisco.

To be Done by Day's Work.
APARTMENTS Cost, $20,000
SAN FRANCISCO. E Sanchez St. 75 S Fourteenth St.
Three-story and basement frame apartment building (12 apts.)
Owner—Emil Staude, 50½ Sanchez St., San Francisco.
Architect—Theo. W. Lenzen, 785 Market St., San Francisco.

To Be Done By Day's Work.
APARTMENTS Cost, $25,000
BERKELEY, Alameda Co., Cal. 2500 Hillegass.
Three-story 51 room frame and stucco apartment building.
Owner — F. M. Sparks, 2547 Dwight Way, Berkeley.
Architect—None.

Preliminary Plans Approved.
APARTMENTS Cost, $600,000
SAN FRANCISCO, NE Pacific Ave and Buchanan St.
Fourteen-story and basement steel frame community apartments; 29 apartments of from 5 to 12 rooms each; 25 servants' rooms.
Owner—Chas. Heyer, Jr., et al.
Architect—Henry C. Smith, Humboldt Bank Bldg., S. F.

Contract Awarded.
APARTMENTS Cost, $20,000
SAN FRANCISCO, S Brosnan 160 W Valencia.
Three-story and basement frame (12) apartments.
Owner — M. Merovingo, 3322-A Fillmore St., S. F.
Architect—None.
Contractor — Thos. R. Sharman, 1514 Irving St., S. F.

Contract Awarded.
APARTMENTS Cost, $25,000
SAN FRANCISCO. NE Bay and Divisadero Sts.
Three-story and basement frame apartment building (18 apts.)
Owner—Bessie Cooley, 80 Sotelo Ave., San Francisco.
Architect—J. C. Hladik, Monadnock Bldg., San Francisco.
Contractor—H. C. Cooley, 80 Sotelo Ave., San Francisco.

Plans to be Prepared.
APARTMENTS Cost, $9500
SAN FRANCISCO. Thirty-ninth Ave., Bet. Fulton and Cabrillo Sts.
One-story frame and stucco studio apartment building (2 3-room apts.)
Owner — John H. Ahnden, 460 Montgomery St., San Francisco.
Architect—John H. Ahnden, 460 Montgomery St., San Francisco.
Work is to be done by day's labor.

ElevatorContract Awarded.
APARTMENTS Cost, $97,000
BERKELEY, Alameda Co., Cal. No. 2711 Durant Avenue.
Three-story 65-room frame and cement plaster apartment building (29 apts.)
Owner—Annie M. Willis, Premises.
Architect and Builder — Harry C. Knight, 1428 Franklin St., Okd.
Elevators — Pacific Elevator Co., 1129 Howard St., San Francisco.
As previously reported, concrete and cement work awarded to N. Lena, 2397 Encinal Ave., Alameda; plumbing to Carl T. Doell, 467 21st St., Oakland; excavating, Ariss-Knapp Co., 961 41st St., Oakland.
Other sub-contracts will be awarded shortly.

LOS ANGELES, Cal.—Callahan & Sons, 718 Edwards & Wildey Bldg., are completing working plans and will build a six-story and part basement class B apartment building on Mariposa Ave. near Beverly Blvd.; owner's name withheld; 30 single and double apartments, lobby, etc.; stucco exterior, steel frame, concrete fireproofing, wood floor joists, tile and composition roofing, 100x50 feet, plate glass, ornamental iron work, gas radiators, tiled baths and drainboards, water heaters, pine trim, pine and hardwood floors, wall beds, incinerator.

LOS ANGELES, Cal.—Archts. Postle & Postle, 631 Van Nuys Bldg., are completing wkg. plans for 3-sto. class C brick apt. bldg., on El Centro St., for Watson & Fisher; 81x36 ft., press. br. and stucco exter., tile and comp. rfg., gas steam rads., water htr., wr. iron wk., pine and hdwd. flrs., pine trim, tiled baths, lobby, part basement. Owners will build.

JOOST BROTHERS
Builders' Hardware
Tools, Etc.
(Members Builders' Exchange)
1071 MARKET ST.
Phone Market 891 San Francisco

LOS ANGELES, Cal.—Archts. Postle & Postle, 631 Van Nuys Bldg., are completing wkg. plans for 2-story and part 5-story frame and stucco apt. bldg., at cor. Hoover, Adrian Sts. and Hyperion Ave., for W. D. Mannen; 30 single and double apts; tile and comp. rfg., 60 by 178 ft., gas htg., tiled baths and drainboards, water htrs., pine trim, pine and hdwd. flrs., refrig. sys., wr. iron wk., 2 incinerators, fire escapes, roller screens. Owner will erect by day work and subcontr.

LOS ANGELES, Cal.—Samuel F. Bard & Co., Cham. of Comm. Bldg., have the contr. to erect a 5-story class B apt. house at 1842 N Cherokee Ave. for Rosey Holding Co; plans by L. A. Smith, Film Exchange Bldg; 140 rms., steel frame, brick filler walls, cast stone front, marble and tile work, wr. iron, gum and pine trim, oak and pine flrs., wall beds, steam htg., elevator, electric refrig; $350,000.

LOS ANGELES, Cal.—Archt. J. Thomas Payne and Geo. A. Blssell, associated, 426 Western Mutual Life Bldg., are preparing wkg. plans for 4-sto. and basement, 118-rm. class C apt. bldg. at Hollywood; owner's name withheld; 60x200 ft., face brick, stone trim, comp. rf., struc. steel, tiled baths and showers, storage water htr., gas steam rads., hdwd. and tile flrs., hdwd. and pine trim, wallbeds, builtin refrig.

BONDS

APPLEGATE, Placer Co., Cal.—Election will be called shortly in Applegate School District to vote bonds to finance erection of new school, replacing structure recently destroyed by fire.

SALINAS, Monterey Co., Cal.—Oct. 14 is date set to vote bonds of $72,000 to finance classroom additions to Lincoln and Roosevelt schools. Arthur Walter is City School Supt.

SACRAMENTO, Cal.—Until Sept. 27 bids will be received by county supervisors for purchase of $12,500 bond issue of Del Paso Heights School District; proceeds of sale to finance school improvements.

SANTA BARBARA, Cal.—Until 10 a. m., Oct. 4, bids will be rec. by county for purchase of bonds of Agricola school dist. in sum of $24,000.

CHURCHES

LOS ALTOS, Santa Clara Co., Cal.—J. A. and George Gutschow, Palo Alto, at approx. $8000 awarded contract for assembly hall addition, 27 by 50 ft., to Christ Church. Coxhead and Coxhead, architects, Hearst Bldg., San Francisco.

EAST WHITTIER, L. A. Co., Cal. — W. P. Sheppard, 15 S El Molino Street, Pasadena, is preparing wkg. plans for a 1-story and full basement fr. and stucco church bldg. at East Whittier for East Whittier Friends Church; seat 200, kitchen and dining rm., 90x61 ft., stained glass, shake rf., flr. furnaces, toilets, ornam. iron, storage water htr; $25,000.

LOS ANGELES, Cal. — Archts. Marston, Van Pelt & Maybury, 25 S Euclid Ave., have prepared prelim. plans for a main auditorium bldg. to be erected at Lake Ave. and Atchison St. for the Westminster Presbyterian Church; bldg. will be of reinf. conc. constr., with tile rfg., stone trim, tile floors, tower 150 ft. high; $300,000. The church will endeavor to finance the project so that it may be completed by 1928.

TORRANCE, Los Angeles Co., Cal.—Architects Quintin & Kerr, 310 Weber Bldg., Alhambra, have prepared plans for a Masonic temple at Torrance, for Torrance Masonic Lodge.

LOS ANGELES, Cal.—Steed Bros., 305 N. Garfield St., Alhambra, has contract for additions and alterations to church building at 2801 W. 54th St., for Angeles Mesa Congregational Church; plans by Architect Harry M. Pierce, 701 Wright-Callender Bldg. The addition will be 69x84 feet, frame and stucco, shingle roof, pine floors and trim, probably gas steam radiators, art glass $21,000.

IN APPRECIATION TO GEORGE W. PELTIER

TODAY—ground breaking ceremonies recorded the start of construction of the Alhambra Theater at 31st and K Streets, a $750,000 investment by George W. Peltier and associates.

The members of the Sacramento Real Estate Board extend their sincere wishes to George W. Peltier for this fine new enterprise.

In complimenting him upon the initiative which has in this and many other developments been a big factor in the growth of Sacramento, we also wish to express our appreciation of the many excellent articles prepared by him setting forth Sacramento's advantages, and of his active support of all things for the benefit of this community. It is this spirit that builds great cities.

GEORGE W. PELTIER, WE WISH YOU SUCCESS.

GEORGE W. Peltier of Sacramento.
* * *
IS A live wire banker.
* * *
WE ALL know.
* * *
THAT ALL bankers.
* * *
ARE NOT advertisers.
* * *
GEORGE PELTIER advertises.
* * *
ANOTHER LIVE wire bunch.
* * *
ARE THE real estators.
* * *
OF SACRAMENTO.
* * *
SEE THEIR names.
* * *
ABOVE THIS KCB-like stuff.
* * *
OF SANDY Pratt, President.
* * *
OF THE Pratt Building Material Co.
* * *
PRODUCER OF clean, sharp sand.
* * *
AND HARD, clean rock.
* * *
YOU KNOW,
* * *
IT HAS been said.
* * *
THAT SACRAMENTO.
* * *
IS A second Los Angeles.
* * *
AND IT is fellows.
* * *
LIKE GEORGE W. Peltier.
* * *
AND THE Real Estate Board.
* * *
OF SACRAMENTO.
* * *
THAT IS putting Sacramento.
* * *
ON THE map.
* * *
AND ONLY recently John Davis,
* * *
WHO KNOWS a lot.

ABOUT PUBLICITY and advertising.
* * *
SAID THAT George Peltier.
* * *
AND CLARENCE Sandy Pratt.
* * *
WERE THE best advertised men.
* * *
IN THE Sacramento Valley.
* * *
ANYWAY, MANY do read.
* * *
ABOUT GEORGE and Sandy.
* * *
AND THEIR ads.
* * *
IN THE Sacramento Bee.
* * *
AND GEORGE and Sandy know.
* * *
"IT PAYS to advertise."

N. O. ADVERTISER, "leading" banker—real estate operator at DEADVILLE, who did not believe in advertising. This pathetic scene shows the non-advertiser and his sad family. U. R. A. HARDROCK, Sheriff, has just removed all the furniture but the old fashion sofa in the above picture (value one dollar) and the "leading" banker is busted. The wife and daughter cried so hard that the tears ran down the stairs and drowned a cat and her seven kittens in the basement. Sandy Pratt, producer of clear sand, clean rock and clean gravel never tells sad stories, but Sandy broke the rule this time.

STOCKTON, San Joaquin Co., Cal.—John Hachman, Sonora Rd. and Walker Lane, at $23,810, submitted low bid to Harmony Grove School District trustees, to erect brick veneer school and accessory buildings with furnishings. Victor Galbraith architect, 208 Elks Bldg., Stockton. Other bids received are:

H. W. Johnson, Stockton	$24,900
Joseph Chirhort, Stockton	24,969
Fay Zinck, Stockton	25,320
J. E. Toothacre, Stockton	25,239
J. F. Sheperd, Stockton	26,750

Bids for furniture not included in these figures and will be given later.

SANTA BARBARA, Cal.—Until Oct. 4, 4 p. m. bids will be received by Cold Spring School District, 40 Palm Drive, Santa Barbara, for 3 compartment septic tank to provide for 75 people with sufficient bed to waste the effluent; tank to be connected with house plumbing with c i pipe. Further information obtainable from above address.

LOS ANGELES, Cal.—Salih Bros., Detwiler Bldg., were low bidders at $254,000 on genl. contr. for erecting new bldgs. at Luther Burbank junior high school site at s.e. cor. of Annandale Blvd. and Meridian St; Noerenberg & Johnson, archts. Low bidders on other contracts were: Flinn Bros. Pipe & Supply Co., on heating at $27,-198; O. E. Ross on plumbing at $24,478; and American Electric Constr. Co. on wiring at $9900. There will be four bldgs., brick and concrete constr., press brick and terra cotta exter., clay tile and comp. rfg.

NORTH SACRAMENTO, Cal. — Peter F. Bender, 1012 Del Paso Blvd., North Sacramento, awarded contract by the North Sacramento School District to erect 4-room addition to present school building. Dean & Dean, architects, Calif. State Life Bldg., Sacramento, Calif.

Official Proposals

NOTICE TO CONTRACTORS

(Compass House—12th Naval District)

SEALED PROPOSALS, indorsed "Proposals for Moving and Altering the Compass House at the Radio Station, Point Montara, California, Specification No. 5257" will be received at the office of the Commandant, Twelfth Naval District, 100 Harrison Street, San Francisco, California, until 11 o'clock A. M., October 6th, 1926, and then and there publicly opened, for moving the present compass house from its present location on the Radio Compass Station at Point Montara, California, to a new location on the same Station a distance of approximately 300 feet, and for making certain alterations and additions to the building after its removal to the new location. Specification No. 5257 and accompanying drawings may be obtained on application to the Bureau or to the Commandant, 12th Naval District, 100 Harrison Street, San Francisco, California. Deposit of a check or postal money order for $10.00, payable to the Chief of the Bureau of Yards and Docks, is required as security for the safe return of the drawings and specification.

NOTICE TO BIDDERS

Richmond Union High School District

Notice is hereby given that the High School Board of the Richmond Union High School District of Contra Costa County, California, hereby calls for sealed proposals to be delivered to the Secretary of said Board in the Lincoln School, 235 Tenth St., Richmond, California, **until the 25th day of October, 1926, at 8 o'clock P. M.,** at which time and place said proposals will be opened, for the supplying of all material and the construction of a group of high school buildings to be erected on a portion of lot 99 of the San Pablo Rancho, located at 23rd and Tulare Streets in said High School District, in accordance with plans and specifications prepared by Louis S. Stone and Franklyn E. Warner, authorized architects, 337 17th Street, Oakland, California.

Said plans and specifications may be seen at the architects' office, at the office of the High School Board, at the Builders' Exchange of Contra Costa County, 248 14th St., Richmond, California, or at the Builders' Exchange, 354 Hobart St., Oakland, California, during office hours.

Sealed proposals will be received on the following divisions of the work: Div. 1, General Work; Div. 2, Plumbing; Div. 3, Electrical Work; Div. 4, Heating; Div. 5, Linoleum; Div. 6, Pumping Plant. Proposals must be signed by the bidders on blanks obtained from the Architect.

Proposals must be addressed to W. T. Helms, Secretary of the said High School Board, and must be accompanied by a certified check, certified to by some solvent bank, and made payable to the Richmond Union High School District, to be retained by said high school district as agreed as liquidated damages should the party or parties to whom the contract or contracts are awarded fail to enter into the contract within ten (10) days after the date of award, or give the bonds required by law for the faithful performance of said contract. The amount of said certified check shall be for at least ten (10) per cent of the total amount of the highest bid submitted by the bidder. A bidders bond will be accepted in lieu of a certified check.

The Board reserves the right to reject any or all bids.

The Architect will require a deposit of $50 for Division 1, and a deposit of $25 for each of any of the other divisions, when plans and specifications are taken from his office.

By order of the High School Board of the Richmond Union High School District, California.

W. T. HELMS, Secretary.

Richmond, Calif., Sept. 13, 1926.

A call for bids published in this section indicates that bids are desired from other than local bidders Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section

NOTICE TO BIDDERS

(Salinas Union High School District)

The Board of Trustees of the Salinas Union High School will receive sealed bids for supplies needed for the construction of a farm mechanics building to be erected on the high school grounds. Specifications and list of supplies are on file in the office of the principal of the high school.

Sealed bids will also be received by the Board of Trustees of the Salinas Union High School for two Star lathes for use in the machine shop of the Salinas Union High School. Complete specifications are on file in the office of the principal of the high school.

The bids will be opened at a meeting of the Board of Trustees to be held **Thursday evening, October 7, at 7:30 o'clock** in the main building at the Salinas Union High School, Salinas, California. The board reserves the right to reject any and all bids.

SALINAS UNION HIGH SCHOOL BOARD OF TRUSTEES.
By E. L. VAN DELLEN, Clerk.

NOTICE TO CONTRACTORS

(Excavation and Earth Work—Merced Irrigation District)

Notice is hereby given that sealed proposals for the excavation and earth work necessary in the construction of certain canals will be received by the Board of Directors of Merced Irrigation District, at its office in the Barcroft Building, in the City of Merced, State of California, **at any time up to 10 o'clock A. M. of Monday, October 11, 1926,** at which time and place all bids so received will be opened in public by said Board. Thereafter, said Board will let said work, either in sections as indicated in the schedules below, or as a whole, to the lowest responsible bidder or bidders, but said Board reserves the right to reject any or all bids and readvertise for proposals or proceed to construct the work under their own superintendence.

The work for which proposals are hereby invited is divided into ten schedules as follows:

Schedule No. 1—About 15,000 cubic yards of grading an dexcavation.

Schedule No. 2—About 20,000 cubic yards of grading and excavation.

Schedule No. 3—About 7500 cubic yards of grading and excavation.

Schedule No. 4—About 2700 cubic yards of grading and excavation.

Schedule No. 5—About 500 cubic yards of grading and excavation.

Schedule No. 6—About 6000 cubic yards of grading and excavation.

Schedule No. 7—About 7500 cubic yards of grading and excavation.

Schedule No. 8—About 10,000 cubic yards of grading and excavation.

Schedule No. 9—About 10,500 cubic yards of grading and excavation.

Schedule No. 10—About 3000 cubic yards of grading and excavation.

Said work is more particularly described in the specifications and plans therefor, which may be seen at said office of said District. Copies of said specifications and plans may be obtained at said office upon deposit of Five Dollars for each copy, the deposit to be refunded upon the return of the specifications and plans in good condition not later than the date of receiving bids.

Any bidder may submit a proposal for doing the work in any or all of said schedules. A bidder to whom a contract for any of said work may be awarded must furnish bonds as provided by law, to-wit: A bond in the sum of at least one-half of the estimated contract price to secure the payment of the claims of materialmen, mechanics and laborers, and a bond in the sum of at least one-fourth of the estimated contract price conditioned upon the performance of the contract.

Each bid must be accompanied with cash or a certified or a cashier's check, payable to Merced Irrigation District, for an amount equal to at least five per cent of the amount of the bid as a guaranty that, if the bid is accepted, the bidder will, within ten days after its acceptance, enter into a contract with the district in the form attached to said specifications and furnish the bonds aforesaid.

The quantities given in the aforesaid schedules are approximations only but will be used in computing the amounts of the deposit and the bonds herein before required.

Bids must be on the proposal forms attached to the specifications, and must be in sealed envelopes addressed to the Board of Directors of Merced Irrigation District, and marked to indicate that each is a proposal for the doing of said work.

Dated at Merced, California, September 17, 1926.

By order of said Board of Directors.
H. P. SARGENT,
Secretary of Board of Directors of Merced Irrigation District.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of **the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M. on October 18, 1926,** at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Los Angeles County (VIII-LA-2-C) the following structures to be widened:

A concrete bridge having a 30-foot arch span across Las Virgenes Creek, about 4 miles west of Calabasas.

A concrete bridge having a 40-foot arch span across Vejor Creek, 8 miles west of Calabasas.

A concrete bridge having a 30-foot arch span across West Fork Vejor Creek, about 8 miles west of Calabasas.

Ventura County, a concrete girder bridge of eight 30-foot spans across Conejo Creek, about 2½ miles east of Camarillo (VII-Ven-2-B) to be repaired.

Plans may be seen, and forms of proposal, bonds, contract and specifica-

tions may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MINON, Secretary.

Dated: September 20, 1926.

NOTICE TO CONTRACTORS AND BUILDERS

(Manual Training Building—Santa Barbara)

The Board of Education of the Santa Barbara High School District, County of Santa Barbara, California, will receive sealed bids **up to 5 P. M., October 11, 1926,** at the office of the Board of Education, 1235 Chapala Street, Santa Barbara, at which time and place said bids will be opened and read in public for furnishing all the required labor and material for the construction, erection and completion of a manual training building to be located facing Nopal Street on the High School site, in accordance with revised plans and specifications prepared therefor by W. H. Weeks, Architect. Bids will be received separately for each kind of work as follows:

1. General.
2. Plumbing.
3. Electric.

A cashier's or certified check or bidder's bond issued by a Surety Company accredited by the Board of Education for an amount not less than ten per cent of the amount of the bid, shall accompany each proposal, drawn payable to the Board of Education, as a guarantee that the bidder will within five days after being informed of the acceptance of his bid enter into a contract with said Board in accordance with said bid and that he will furnish the necessary surety bonds; said check or bond to be forfeited to the said Board should the bidder fail to execute contract and furnish bond as above mentioned.

All bids must be made out in forms furnished by the architect. Plans and specifications for all the above work may be seen at the office of the architect, W. H. Weeks, 369 Pine Street, San Francisco, or at the office of the Board of Education, 1235 Chapala Street, Santa Barbara. A limited number of plans will be loaned out to bidders upon deposit of **$25.00 for each set,** said deposit to be refunded to bidder when plans and specifications are returned in good condition.

Said Board of Education reserves the right to reject any or all bids and to waive any informality in any bid received.

By order of the Board of Education of the Santa Barbara High School District, County of Santa Barbara, California.

E. CARLOTTA DENGATE,
Clerk.

September 15, 1926.

NOTICE TO CONTRACTORS AND BUILDERS

(School—Santa Barbara)

The Board of Education of the Santa Barbara School District will receive sealed bids **up to 5 P. M., October 11, 1926,** at the office of the Board of Education, 1235 Chapala Street, Santa Barbara, at which time and place said bids will be opened and read in public for furnishing all the required labor and materials for the construction, erection and completion of a one-story ten-room Elementary School Building to be located between West Arrellaga and Valerio Streets facing Robbins Street, in accordance with plans and specifications prepared therefor by Soule, Murphy & Hastings, Architects. Bids will be received separately for each kind of work as follows:

1. General
2. Plumbing and Heating.
3. Electric.
4. Painting.

A cashier's or certified check or bidder's bond issued by a Surety Company accredited by the Board of Education for an amount not less than five per cent of the amount of the bid, shall accompany each proposal, drawn payable to the Board of Education, as a guarantee that the bidder will within five days after being informed of the acceptance of his bid, enter into a contract with said Board in accordance with said bid and that he will furnish the necessary surety bonds; said check or bond to be forfeited to the said Board should the bidder fail to execute contract and furnish bond as above mentioned.

All bids must be made out on forms furnished by the architect. Plans and specifications for all the above work may be seen at the office of the architect, Soule, Murphy & Hastings, 116 East Sola St., Santa Barbara. A limited number of plans will be loaned out to bidders upon deposit of $10.00 for cash general contract set and $5.00 for each of the other sets, said deposit to be refunded to bidder when plans and specifications are returned in good condition.

Said Board of Education reserves the right to reject any or all bids and to waive any informality in any bid received.

By order of the Board of Education of the Santa Barbara School District, County of Santa Barbara, California.

E. CARLOTTA DENGATE,
Clerk.

September 15, 1926.

NOTICE TO CONTRACTORS

Kern County Union High School Dist.

Notice is hereby given that sealed bids will be received by the Clerk of the Board of Trustees, Kern County Union High School District, Bakersfield, California, **up to 7:30 P. M. of October 11th, 1926,** for furnishing all materials and labor necessary for the erection and completion of a two-story concrete and brick Physical Education Building on the High School site, in accordance with plans and specifications on file with the Clerk of said Board and open for the inspection of bidders. Copies of said plans and specifications may be had upon deposit of Ten Dollars ($10.00) at the office of Charles H. Biggar, Architect, 405 Bank of Italy Building, Bakersfield, California, and the work will be done under his supervision. Deposit will be returned upon receipt of plans and specifications in good condition at time specified.

Bids will be received for the work as a whole or segregated as noted on the bid form furnished with the specifications.

Bid must be accompanied by a certified check, or bidders' bond, in the amount of at least ten per cent (10%) of the amount bid, such check to be made payable to the Board of Trustees, Kern County Union High School District, and submitted as a guarantee that the bidder, if successful, will enter into a contract satisfactory to said Board of Trustees, and in addition thereto will furnish good and sufficient bonds therefor.

Board reserves the right to reject any or all bids not deemed advantageous to the said Kern County Union High School District, and to waive any informality in any bid received.

By order of the Board of Trustees, Kern County Union High School District, made September 13th, 1926.

NOTICE TO CONTRACTORS

(Blackboards—Oakland)

OFFICE OF THE SECRETARY OF THE BOARD OF EDUCATION OF THE CITY OF OAKLAND.

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland School District of Alameda County, hereby **calls** for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, **until Tuesday, the 28th day of September, 1926, at 9:45 A. M.,** at which time said bids will be opened for the furnishing and installing of Slate Blackboards for the Sequoia School to be erected on the northeast corner of Lincoln Avenue and Scenic Avenue, the McChesney School Annex to be erected on the northwest corner of Hampel Street and LaCresta Avenue and the Prescott Domestic Science Building to be erected on the southwest corner of Tenth and Peralta Streets for the Oakland School District. These bids shall be presented in accordance with the plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, 337 17th Street, Oakland, California.

On a deposit of Twenty-five ($25.00) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office hereinbefore mentioned, and plans shall be returned within five (5) days after securing same to the Superintendent of Buildings. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland and of Oakland School District, to be retained by said School District, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall not be less than ten (10%) per cent of the amount bid, provided, however, that in no case shall said check be required to be in excess of Five Thousand ($5,000.00) Dollars. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 28th day of September, 1926, at 9:45 A. M., in the Board Room, 211 second floor, of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. ELGEMOND,
Secretary of the Board of Education of Oakland California.

AMERICAN ENGINEERS AWARDED SOVIET CONTRACT

The largest concession of the soviet government that has ever been made to foreigners was afforded to a group of American engineers and capitalists represented by Hugh Cooper of New York, according to word from Moscow, Russia.

The Americans were asked to undertake the construction and financing of the great Dnieperstrey hydro-electric project on the Dnieper river, involving five years' work and the expenditure of $60,000,000.

Colonel Cooper, who was chief consulting engineer in the Muscle Shoals and St Lawrence river projects, has just completed a fortnight's survey of the soviet government's plan to supply the whole Ukraine with light and electric power by utilizing the waters of the Dnieper.

1926 Edition

San Francisco Building Laws

Ready For Distribution

With the issuance of this 1926 edition, the Building Ordinance Books heretofore published will be obsolete, inasmuch as many sections of the law have been amended and additional sections added.

This 1926 edition contains all revisions and additions to the code up to and including June 1926.

In addition to the Building Laws of San Francisco, the 1926 edition contains the FIRE ORDINANCES as regards the construction industry, the ELECTRICAL ORDINANCES, the SIGN ORDINANCE, the BILLBOARD ORDINANCE and other laws covering regulations concerning the construction interests.

Price $1.00 per copy.
